SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. Figures not available.
- ... Figures not appropriate or not applicable.
- Nil or zero.
- Amount too small to be expressed.
- P Preliminary figures.
- r Revised figures.
- x Confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. Nombres indisponibles.
- ... N'ayant pas lieu de figurer.
- Néant ou zéro.
- Nombres infimes.
- P Nombres provisoires.
- r Nombres rectifiés.
- x Confidentiels en vertu des dispositions de la Loi sur la statistique relatives au secret.

Industry Selling Price Index: Manufacturing (1961=100)

The industry selling price index (Total manufacturing) moved 0.8 % higher in January to 124.2 from the December index of 123.2. Of the 100 industry indexes included in the Total, 59 were higher, 11 declined and 30 were unchanged.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes in January were increases in the foods and beverages group mainly in response to higher prices registered in the sugar refineries, slaughtering and meat packing, and fish products industries. Increases in the wood products group reflected higher prices in the sawmills and planing mills, and veneer and plywoods industries. More moderate advances occurred in the non-metallic mineral products, and primary metals groups. Declines in January were relatively insignificant.

Indice des prix de vente dans l'industrie: Industries manufacturières (1961=100)

L'indice général des prix de vente dans l'industrie (toutes industries manufacturières) a augmenté de 0.8 % en janvier pour s'établir à 124.2, contre 123.2 en décembre. Sur les 100 indices des prix industriels qui composent le total, 59 indices ont augmenté, 11 ont diminué tandis que 30 sont restés inchangés.

Pour ce qui est de l'apport de chacune des industries à l'indice total de l'activité manufacturière, les changements les plus appréciables en janvier sont les progressions observées dans le groupe des aliments et boissons, principalement imputables à la hausse des prix observée dans les raffineries de sucre, les abattoirs et les usines de conditionnement de la viande et dans l'industrie des produits de la pêche. Les augmentations observées dans le groupe des produits du bois sont imputables à la hausse des prix exigés par les scieries et les ateliers de rabotage ainsi que par les fabriques de placages et de contre-plaqué. Des progressions moins prononcées ont eu lieu dans le groupe des produits minéraux non métalliques et celui de la première transformation des métaux. Les diminutions observées en janvier sont relativement peu importantes.

December to January Changes in Industry Indexes

Variations de décembre à janvier des indices dans l'industrie

	January/December			Major Group Indexes — Indice des groupes principaux		
	Number of Industries — Nombre d'industries			Jan. 1972	Déc. 1971	Jan. 1971

(1) Indexes not available at this level of aggregation. — Indices non disponibles à ce niveau d'agrégation.

General Wholesale Index (1935-39=100)

The general wholesale index moved up 1.4 % in January 1972 to 299.4 from the revised December 1971 index of 295.4. It was 5.1 % higher than the January 1971 index of 285.0. The eight major group indexes were higher.

The vegetable products group index rose 2.7 % in January to 242.9 from 236.5 on higher prices for sugar and its products, grains, and tea, coffee and cocoa. An advance of 1.9 % to 347.4 from 341.0 in the animal products group index reflected price increases for fishery products, livestock, and fresh and cured meats. Higher prices for miscellaneous fibre products, worsted yarns, and raw cotton were mainly responsible for an increase of 1.5 % to 269.7 from 265.7 in the textile products group index. The wood products group index moved up 1.0 % to 415.0 from the revised December index of 410.8 on higher prices for newsprint, cedar and spruce. An increase of 0.9 % occurred in the non-ferrous metal products group index on price increases for refined copper (export sales) and silver. The non-metallic mineral products group index advanced 0.7 % to 229.1 from 227.6 on higher prices for sand and gravel, window glass and cement. More moderate increases occurred in two major group indexes; chemical products to 241.1 from 240.4 and iron products to 321.4 from 321.0.

The following table shows some of the more noteworthy changes:

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros a augmenté de 1.4 % en janvier 1972 pour se fixer à 299.4; l'indice rectifié de décembre 1971 atteignait 295.4. Il est de 5.1 % supérieur à l'indice rectifié de janvier 1971 (285.0). Les indices des huit groupes principaux ont tous augmenté.

L'indice des produits d'origine végétale a progressé de 2.7 % en janvier, passant de 236.5 à 242.9, à la suite d'une majoration des prix du sucre et dérivés, des céréales, du thé, du café et du cacao. La progression de 1.9 % observée pour l'indice des produits d'origine animale, qui est passé de 341.0 à 347.4, s'explique par la hausse des prix des produits de la pêche, du bétail, des viandes fraîches et des viandes salées ou fumées. L'augmentation de 1.5 % de l'indice des produits textiles, de 265.7 à 269.7, est surtout imputable à la hausse des prix des produits divers en fibre, des filés en laine peignée et du coton brut. L'indice des produits du bois a avancé de 1.0 % pour atteindre 415.0, contre 410.8 en décembre (indice rectifié), à la suite de la hausse des prix du papier journal, du thuya et de l'épinette. On a observé une progression de 0.9 % de l'indice des produits des métaux non ferreux à la suite d'une majoration des prix du cuivre affiné (ventes à l'exportation) et de l'argent. L'indice des produits minéraux non métalliques a augmenté de 0.7 %, passant de 227.6 à 229.1, en raison de l'avance des prix du sable et du gravier, du verre à vitre et du ciment. On a observé des progressions moins importantes pour deux indices, celui des produits chimiques, qui est passé de 240.4 à 241.1 et celui des produits du fer, de 321.0 à 321.4.

On trouvera ci-dessous un aperçu des variations les plus importantes:

Commodity group and sub-group — Groupe et sous-groupe de produits	Percentage changes — Variation en pourcentage		
	Jan. — 1972 — Janv. Dec. — 1971 — Déc.		
	Jan. — 1972 — Janv. Dec. — 1971 — Déc.	Jan. — 1971 — Janv. Dec. — 1970 — Déc.	Jan. — 1972 — Janv. Jan. — 1971 — Janv.
Vegetable products group — Produits d'origine végétale	+ 2.7	+ 0.8	—
Sugar and its products — Sucre et dérivés	+ 22.3	+ 6.3	+ 36.6
Livestock and poultry feeds — Nourriture pour bétail et volaille	+ 2.5	— 1.2	— 2.3
Tea, coffee and cocoa — Thé, café et cacao	+ 1.8	— 3.3	— 6.3
Grains — Céréales	+ 1.0	+ 0.4	— 9.2
Animal products group — Produits d'origine animale	+ 1.9	+ 0.3	+ 10.0
Hides and skins — Peaux d'animaux brutes	+ 9.0	— 6.6	+ 20.5
Fishery products — Produits de la pêche	+ 5.3	+ 2.6	+ 4.1
Meats, fresh — Viande fraîche	+ 2.6	+ 0.9	+ 13.3
Meats, cured — Viande fumée ou salée	+ 2.6	— 1.3	+ 2.2
Livestock — Bétail	+ 2.3	+ 2.0	+ 14.3
Eggs — Oeufs	— 7.6	— 4.1	+ 4.9
Textile products group — Produits textiles	+ 1.5	+ 0.4	+ 4.5
Worsted yarns — Filés en laine peignée	+ 8.5	— 1.9	+ 8.5
Miscellaneous fibre products — Produits divers en fibre ...	+ 4.5	+ 0.6	+ 15.2
Cotton, raw — Coton brut	+ 3.9	+ 0.7	+ 14.0
Wood products group — Produits du bois	+ 1.0	+ 0.6	+ 10.9
Spruce — Épinette	+ 3.1	+ 0.3	+ 32.8
Cedar — Thuya	+ 2.4	+ 4.4	+ 33.3
Pine — Pin	+ 1.9	—	+ 10.7
Newsprint — Papier journal	+ 1.2	— 0.2	+ 8.8
Non-ferrous metal products group — Produits des métaux non ferreux	+ 0.9	— 0.6	— 1.0
Silver — Argent	+ 6.9	+ 1.4	— 12.3
Copper, refined (export sales) — Cuivre, affiné (ventes à l'exportation)	+ 1.4	— 0.7	— 2.5

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, advanced 2.7 % to 277.1 in January from the December index of 269.8. Prices were higher for sixteen commodities, and unchanged for fourteen. Principal changes included increases for sugar, beef hides, linseed oil, raw cotton, raw wool, hogs, oats, raw rubber, white lead, fir timber, export wheat and steers.

Indices des prix de trente produits industriels (1935-39=100)

L'indice des prix de trente produits industriels, calculé sous forme de moyenne géométrique non pondérée, a avancé de 2.7 %, passant de 269.8 en décembre à 277.1 en janvier. Le prix de seize produits a augmenté et celui des quatorze autres est resté stationnaire. Les principaux changements comprennent une augmentation du prix du sucre, des peaux de boeuf, de l'huile de lin, du coton cru, de la laine crue, du porc, de l'avoine, du caoutchouc brut, du blanc de plomb, du sapin, des céréales exportées et des bouvillons.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets advanced 0.7 % to 272.6 in January from the December index of 270.7. An increase of 0.9 % to 375.2 from 371.7 in the animal products index reflected higher prices for lambs, raw wool, and steers on both Eastern and Western markets, for hogs in the East, and for calves in the West. Lower prices were shown for eggs on both markets. The field products index rose 0.1 % to 170.0 from 169.8 on higher prices for hay and flax on the Western market. Lower prices were shown for hay and potatoes in the East and for rye in the West.

Security Price Indexes (1961=100)

The January average level of the Investors Index of common stock prices at 164.0 was 9.3 % above the average for December 1971. Indexes for the three major groups registered all time highs, with industrials up 10.0 % to 165.0, utilities rising 6.9 % to 159.1 and finance up 9.4 % to 168.7. Amongst the thirteen industrial sub-groups, beverages at 222.8, metal fabricating at 173.0, and petroleum at 256.6 registered all time highs. Construction rose 19.4 % to 75.0 followed by chemicals up 14.9 % to 160.4. The remaining sub-groups each showed increases of over 6%. In utilities, all sub-groups gained, the largest being pipelines at an all time high of 187.4. In finance, banks reached an all time high of 197.4, while investment and loan climbed 10.2 % to 124.6.

In the same period, the index of Mining stock prices rose 11.7 % to 101.0 in response to increases in Golds and Base Metals of 11.5 and 11.9 % respectively.

Of the two supplementary price indexes, Uraniums jumped 16.7 % to 155.2 and Primary Oils and Gas rose 5.9 % to 447.5.

The Preferred stock index rose 5.4 % to 70.3 from 66.7 in December.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens aux marchés terminaux a avancé de 0.7 %, passant de 270.7 en décembre à 272.6 en janvier. L'indice des produits d'origine animale a progressé de 0.9 %, passant de 371.7 à 375.2, en raison de la hausse du prix des agneaux, de la laine crue et des bouvillons sur les marchés de l'Est et de l'Ouest, du porc sur les marchés de l'Est et des veaux sur les marchés de l'Ouest. Le prix des oeufs a diminué dans l'Est et dans l'Ouest. L'indice des produits de grande culture a augmenté de 0.1 %, passant de 169.8 à 170.0, en raison de la hausse du prix du foin et du lin sur les marchés de l'Ouest. On a noté une baisse du prix du foin et des pommes de terre sur les marchés de l'Est et du seigle sur les marchés de l'Ouest.

Indice des cours des valeurs mobilières (1961=100)

En janvier, la valeur moyenne de l'indice des valeurs ordinaires de placement s'est établie à 164.0, ce qui représente une hausse de 9.3 % par rapport à décembre 1971. Les indices des trois principaux groupes ont atteint des niveaux sans précédent: les valeurs industrielles ont augmenté de 10.0 %, passant à 165.0; les services d'utilité publique, de 6.9 %, passant à 159.1, et les finances, de 9.4 %, passant à 168.7. Parmi les treize sous-groupes industriels, les boissons (222.8), les produits métalliques (173.0) et le pétrole (256.6) ont atteint un niveau record. La construction a enregistré une hausse de 19.4 %, s'élevant à 75.0, suivie des produits chimiques qui ont progressé de 14.9 %, pour s'établir à 160.4. Les autres sous-groupes ont tous connu une augmentation de plus de 6 %. Dans les services d'utilité publique, tous les sous-groupes ont augmenté, la plus forte augmentation étant enregistrée dans les pipe-lines, qui ont atteint un niveau record de 187.4. En ce qui concerne les finances, l'indice des banques a atteint le chiffre sans précédent de 197.4, tandis que les placements et les prêts ont grimpé de 10.2 % pour s'établir à 124.6.

Au cours de la même période, l'indice des prix des titres miniers s'est accru de 11.7 % pour atteindre 101.0, par suite d'un relèvement des indices de l'or et des métaux communs (11.5 et 11.9 %).

En ce qui concerne les deux catégories supplémentaires, l'indice des prix de l'uranium a augmenté de 16.7 % pour se chiffrer à 155.2 et celui du pétrole et des gaz primaires, de 5.9 % pour atteindre 447.5.

L'indice des actions préférentielles a progressé de 5.4 %, passant de 66.7 en décembre à 70.3 en janvier.

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix des livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

Consumer price Movements

The Consumer Price Index for Canada (1961=100) increased 0.3 % to 136.7 in January from 136.3 in December, a rise close to the average increase recorded between these two months in recent years. The main contributors to the latest month's rise were Food and Housing, which advanced 0.7 % and 0.5 % respectively. Other components that registered increases were Transportation (0.6 %), Health and Personal Care (0.1 %), and Recreation and Reading (0.1 %). The only major component that declined was Clothing, which fell seasonally 0.7 %. The Tobacco and Alcohol index remained unchanged in the latest month. In the twelve months since January 1971, the All-Items index increased 4.9 %.

The Food index advanced 0.7 % to 136.4 in January from 135.5 in December. Restaurant meal prices rose 0.3 % while the level of prices for food consumed at home increased 0.8 %. Although higher quotations were recorded for a wide range of items, the major contributors to the increase in the price of food home consumption were meats, poultry, eggs and certain miscellaneous groceries which more than offset declines in some vegetables and bakery and cereal products. The retail price of beef rose 3.4 % in the latest month with all beef cuts contributing to the advance, while chicken prices moved up 3.9 % in the same period. Pork prices rose 1.2 % as specials on centre cut chops partially offset increases of over 2 % on other pork cuts. The meat, fish and poultry index rose 2.5 % in the latest month and 8.4 % in the twelve months from January 1971. Between December and January egg prices rose 3.4 %. The vegetable index, however, decreased 5.8 % as lower tomato and lettuce prices outweighed increases in other fresh vegetables. Higher quotations for grapefruit, apples and some canned and dried fruits outweighed lower orange and banana prices, to fractionally advance the fruit index. In the twelve months since January 1971, the general levels of vegetable and fruit prices have increased 16.2 % and 11.1 % respectively. Though fluid milk prices remained unchanged, other dairy products, including cheese, powdered and evaporated milk and ice cream rose in price to advance the index for dairy products (excluding butter) 0.5 % in the latest month. Among staple foods, butter prices increased 0.6 % while the bakery and cereal products index fell 0.6 % mainly because of special prices for bread in a number of cities. Among other food items, sugar prices rose almost 28 % to reach a level over 42 % above that of a year earlier, thus recording the largest twelve month increase in more than five years. In the latest month, increases were also recorded for other items including jelly powder, honey, soft drinks and infants' food. Between January 1971 and January 1972, the total Food index advanced 7.8 % with the price level of food consumed at home increasing 8.3 % and that for restaurant meals 4.9 %.

The Housing index rose 0.5 % to 140.5 in January from 139.8 in December as increases occurred in both the shelter and household operation components. A 0.4 % rise in the shelter index was mainly attributable to higher mortgage interest costs, new house prices and repair charges. The household operation index advanced 0.6 % with the largest increases recorded for postage rates and household help wages which rose by over 9 % and 5 % respectively. Among other household operation items, higher domestic gas rates were registered in Alberta, and electricity charges increased in some cities in southern Ontario and Alberta. Floor covering and household textile quotations advanced marginally, whereas the furniture index recorded a small decline as sale prices took effect in some cities. Higher prices were also recorded for toilet paper, light bulbs, dishes, food wrap, soap flakes and detergent. In

Mouvements des prix à la consommation

L'indice des prix à la consommation au Canada (1961=100) a progressé de 0.3 % en passant de 136.3 en décembre à 136.7 en janvier, soit à peu près le même accroissement qu'au cours des dernières années entre ces deux mois. Les principaux facteurs d'augmentation du mois dernier ont été l'alimentation (0.7 %) et l'habitation (0.5 %). Les autres éléments qui ont enregistré une augmentation sont les transports (0.6 %), les soins personnels et de santé (0.1 %), la lecture et les loisirs (0.1 %). Le seul élément important qui a marqué un recul a été celui de l'habillement qui a enregistré une diminution saisonnière de 0.7 %. L'indice des tabacs et des alcools est demeuré stationnaire le mois dernier. Au cours des douze mois suivant janvier 1971, l'indice général a augmenté de 4.9 %.

L'indice de l'alimentation a avancé de 0.7 % pour atteindre 136.4 en janvier, contre 135.5 en décembre. Le prix des repas pris au restaurant a augmenté de 0.3 % tandis que celui des aliments consommés à la maison s'est accru de 0.8 %. Même s'il y a eu hausse du prix d'un grand nombre d'articles, les éléments principaux qui ont fait monter l'indice des prix des aliments consommés à la maison ont été les viandes, la volaille, les oeufs et certains produits alimentaires divers qui ont plus que compensé la baisse du prix de certains légumes et de certains produits de boulangerie et de céréales. Le prix de détail du boeuf a augmenté de 3.4 % le mois dernier, tous les morceaux de boeuf ayant subi une hausse; le prix des poulets s'est accru de 3.9 % au cours de la même période. Le prix du porc a augmenté de 1.2 %, les offres spéciales sur les côtelettes de la partie du centre n'ayant que partiellement compensé l'augmentation de plus de 2 % sur les autres morceaux de porc. L'indice de la viande, du poisson et de la volaille a marqué une avance de 2.5 % le mois dernier et de 8.4 % durant les douze mois suivant janvier 1971. Entre décembre et janvier, le prix des oeufs a augmenté de 3.4 %. Toutefois, l'indice du prix des légumes a diminué de 5.8 %, la baisse du prix des tomates et de la laitue ayant été plus forte que l'augmentation enregistrée sur d'autres légumes frais. La hausse du prix des pamplemousses, des pommes et de certains fruits séchés et en conserve a été supérieure à la baisse du prix des oranges et des bananes, contribuant ainsi à faire légèrement monter l'indice des fruits. Pendant les douze mois suivant janvier 1971, l'indice général des fruits et des légumes s'est accru de 11.1 % et de 16.2 % respectivement. Même si le prix du lait liquide est demeuré le même, d'autres produits laitiers, y compris le fromage, le lait en poudre et évaporé et la crème glacée ont augmenté de prix, ce qui a fait monter l'indice des produits laitiers (beurre non compris) de 0.5 % le mois dernier. Parmi les denrées de base, le prix du beurre a augmenté de 0.6 %, tandis que l'indice des produits céréaliers et de boulangerie a fléchi de 0.6 % en raison principalement des prix spéciaux du pain dans certaines villes. Dans le cas des autres aliments, le prix du sucre a augmenté de presque 28 %, pour atteindre un niveau de 42 % supérieur à celui de janvier 1971, ce qui représente l'accroissement annuel le plus considérable depuis cinq ans. Le mois dernier, le prix d'autres articles dont la gelée en poudre, le miel, les boissons gazeuses et les aliments pour bébés, ont également augmenté. Entre janvier 1971 et janvier 1972, l'indice total de l'alimentation a progressé de 7.8 % en raison d'une hausse de 8.3 % du prix des aliments consommés à la maison et de 4.9 % des repas pris au restaurant.

L'indice de l'habitation a avancé de 0.5 %; il est passé de 139.8 en décembre à 140.5 en janvier en raison de l'avance des éléments "logement" et "entretien du ménage". L'avance de 0.4 % de l'indice du logement est en majeure partie attribuable à l'augmentation des taux d'intérêt hypothécaire, du prix des maisons neuves et des frais de réparation. L'indice de l'entretien du ménage a avancé de 0.6 %; les plus fortes augmentations ont été celles des tarifs postaux et des gages versés au personnel domestique (ces augmentations ont été respectivement supérieures à 9 % et 5 %). Parmi les autres frais d'entretien du ménage, on enregistre des augmentations du prix du gaz consommé à domicile en Alberta et de l'électricité dans certaines villes du sud de l'Ontario et en Alberta. Le prix des revêtements de sol et des textiles ménagers n'a que légèrement augmenté; par contre, le prix des meubles a enregistré une faible diminution en raison des soldes en vigueur dans certaines villes. On a également enregistré des augmentations du prix

January 1972, the Housing index stood 4.8 % above its level of January 1971.

The Clothing index decreased 0.7 % to 130.2 in January from 131.1 in December, equalling the decline between these two months in each of the two preceding years. In the latest month, price decreases of 1.1 % for men's wear, 1.0 % for women's wear, 0.9 % for children's wear, 0.3 % for footwear and 0.4 % for piece goods reflected mid-winter sales on many items. Among articles of men's wear, prices of suits fell seasonally 1.5 % while overcoat, slacks and ski parka prices were approximately 3 % lower. The women's wear decline was mainly a result of sale prices on winter coats, though woollen dresses and skirts, sweaters and slips were also on sale in some cities. Seasonal reductions for boys' parkas and slacks, and girls' snowsuits and coats caused the decline in the children's wear index, while sales on women's snowboots reduced the footwear index. Between January 1971 and January 1972, the Clothing index increased 2.5 %.

The Transportation index rose 0.6 % to 132.3 in January from 131.5 in December. This advance was mainly attributable to a rise of 1.6 % in new car prices as increases became more widespread following scattered rises registered in December. Among other automobile operation items, motor oil prices rose in a number of cities. Inter-city travel fares increased by 1.2 % in the latest month as a result of seasonal increases in the train fare index. Between January 1971 and January 1972, the Transportation index rose by 4.7 %.

The Health and Personal Care index edged up 0.1 % to 146.3 in January from 146.1 in December mainly as a result of higher dentists' fees in Saskatchewan. Among toiletry items, minor price increases for toilet soap, shaving cream and toothpaste were offset by reductions for razor blades and cleansing tissues. Between January 1971 and January 1972, the Health and Personal Care index increased 4.0 %.

The Recreation and Reading index edged up 0.1 % to 136.5 in January from 136.3 in December solely because of higher newspaper subscription rates in Saint John, Montreal, Peterborough and Sudbury. In the twelve months to January 1972, the Recreation and Reading index increased 1.7 %.

In January 1972, the Tobacco and Alcohol index was unchanged from its December 1971 level of 129.7 and stood 2.1 % above its level of January 1971.

Consumer price index items when classified by commodities and services offer another view of the incidence of the change in prices. In the latest month, the total commodities index rose 0.3 %, because food quotations advanced 0.7 % and durables prices moved up 0.6 %; higher new car prices were chiefly responsible for the durables increase. On the other hand, the index for non-durable commodities excluding food declined 0.2 % as a result of reduced prices for clothing. A 0.4 % rise in the service index reflected higher charges for postage, household help and dentists together with increased shelter prices.

du papier hygiénique, des ampoules électriques, de la vaisselle, des emballages pour aliments, du savon en flocons et des détergers. En janvier 1972, l'indice de l'habitation était de 4.8 % supérieur à son niveau de janvier 1971.

L'indice de l'habillement a fléchi de 0.7 %; il est passé de 131.1 en décembre à 130.2 en janvier; cette diminution est égale à la baisse enregistrée entre ces deux mois au cours des deux dernières années. Les soldes de mi-saison sur plusieurs articles se sont traduits par des diminutions de prix de 1.1 % pour les vêtements pour hommes, 1.0 % pour les vêtements pour dames, 0.9 % pour les vêtements pour enfants, 0.3 % pour les chaussures et 0.4 % pour le tissu à la verge. Ainsi, parmi certains articles d'habillement pour hommes, on enregistre des diminutions saisonnières de 1.5 % du prix des costumes et de 3 % du prix des paletots, des pantalons et des anoraks. La diminution du prix des vêtements pour dames est en majeure partie attribuable aux soldes de manteaux d'hiver, bien que les robes et les jupes de laine, des chandails et les sous-vêtements aient également été en solde dans certaines villes. Le fléchissement de l'indice des vêtements pour enfants est attribuable à la réduction saisonnière des anoraks et des pantalons pour garçons ainsi que des costumes de neige et des manteaux pour filles. La baisse de l'indice des chaussures est attribuable aux soldes des couvre-chaussures pour dames. Entre janvier 1971 et janvier 1972, l'indice de l'habillement a avancé de 2.5 %.

L'indice des transports a avancé de 0.6 %; il est passé de 131.5 en décembre à 132.3 en janvier. Cette avance est en majeure partie attribuable à la hausse de 1.6 % du prix des voitures neuves, les augmentations clairsemées de décembre s'étant étendues à tout le marché en janvier. Parmi les autres frais de voitures, on enregistre une hausse du prix de l'huile à moteur dans plusieurs villes. Les frais de transport interurbains ont augmenté de 1.2 % suite à une hausse saisonnière du prix des billets de train. Entre janvier 1971 et janvier 1972, l'indice des transports a avancé de 4.7 %.

L'indice des soins personnels et de santé a avancé de 0.1 %; il est passé de 146.1 en décembre à 146.3 en janvier; cette avance est en majeure partie attribuable à l'augmentation des honoraires des dentistes en Saskatchewan. Au chapitre des articles de toilette, les légères augmentations du prix du savon de toilette, de la crème à raser et de la pâte dentifrice ont été compensées par des diminutions du prix des lames de rasoir et des papiers de démaquillage. Entre janvier 1971 et janvier 1972, l'indice des soins personnels et de santé a avancé de 4.0 %.

L'indice des loisirs et de la lecture a avancé de 0.1 %; il est passé de 136.3 en décembre à 136.5 en janvier; cette avance est uniquement attribuable à la hausse des frais d'abonnement aux journaux à Saint-Jean (N.-B.), Montréal, Peterborough et Sudbury. Au cours des 12 derniers mois, l'indice des loisirs et de la lecture a avancé de 1.7 %.

En janvier 1972, l'indice des tabacs et alcools est demeuré le même qu'en décembre 1971 (129.7) et il était de 2.1 % supérieur à celui de janvier 1971.

Si l'on classe les articles qui entrent dans l'indice des prix à la consommation par biens et services on obtient une image différente du mouvement des prix à la consommation. Ainsi, le mois dernier, l'indice pour l'ensemble des marchandises a avancé de 0.3 %, le prix des aliments ayant avancé de 0.7 % et celui des biens durables de 0.6 %; l'augmentation du prix des voitures neuves a été le principal facteur de la hausse de l'indice des biens durables. Par contre, l'indice des biens non durables (sauf les aliments) a fléchi de 0.2 %, suite à une diminution du prix des vêtements. La hausse de 0.4 % de l'indice des services est imputable à l'augmentation des tarifs postaux, des gages versés au personnel domestique et des honoraires des dentistes ainsi qu'à l'augmentation du prix du logement.

TABLE 1. Summary of Current Price Indexes
TABLEAU 1. Récapitulation des indices des prix courants

	Indexes Indices				Percentage changes Variation proportionnelle		
	Jan. 1972	Déc. 1971	Jan. 1971	Déc. 1970	Jan. 1972 Dec. 1971	Jan. 1971 Dec. 1970	Jan. 1972 Jan. 1971

Non-ferrous metals(4) - Métaux non ferreux(4)	1967	337.7	341.7	341.7	341.7	341.7	341.7	344.4</						

(1) Includes gold. - Y compris l'or. (2) Consists of iron products and non-ferrous metals groups above but excluding gold. - Se compose des groupes élémentaires des produits du fer et des produits des métaux non ferreux moins l'or. (3) These two series comprise the General Wholesale Index. - Ces deux séries comprennent l'indice général de gros. (4) Excludes gold. - Sauf l'or. (5) Indexes for 1971 and 1972 are subject to revision. - Les indices pour 1971 et 1972 sont sujets à révision.

(1) Final to July 1970. See page 76 for details on Western grain prices and specific publications wherein final indexes or earlier years may be found. -- Indices définitifs jusqu'en juillet 1970. Pour des données détaillées sur le prix des céréales de l'Ouest, voir page 76 ainsi que les publications spéciales qui contiennent les derniers indices ou ceux des années précédentes.

(2) Indexes for 1971 and 1972 are subject to revision. -- Les indices pour 1971 et 1972 sont sujets à révision.

TABLE 4. Wholesale Price Indexes of Selected Primary Commodities(1)

TABLEAU 4. Indices des prix de gros de certains produits bruts(1)

(1935-39=100)

Primary commodities — Produits bruts	Months — Mois				Annual averages — Moyenne annuelle		
	Jan. 1972 Janv.	Dec. 1971 Déc.	Jan. 1971 Janv.	Dec. 1970 Déc.	1970	1969	1968
Asbestos, crude — Amiante brut	429.7	429.7	411.6	411.6	411.6	399.7	377.6
Beans, cocoa — Graines de cacao	532.4	503.2	659.8	697.3	752.7	1,032.8	788.2
Beans, coffee — Grains de café	318.5	319.9	371.2	371.2	391.7	302.6	285.0
Coal — Charbon	210.3	210.3	210.3	210.3	210.3	210.3	208.8
Copper, electrolytic — Cuivre électrolytique ...	469.7	469.7	501.1	501.1	541.6	483.6	447.5
Cotton, raw — Coton brut	324.1	311.8	284.4	282.3	282.0	276.3	308.2
Eggs — Oeufs	129.7	140.3	123.6	128.9	139.6	161.7	143.0
Fruits, fresh — Fruits frais	194.5	190.6	223.7	227.6	229.6	225.8	257.1
Grains — Céréales	183.1	181.3	201.6	200.8	193.7	200.4	210.2
Hides and skins — Cuirs et peaux vertes	185.3	170.0	153.8	164.6	171.4	185.6	159.4
Lead, electrolytic — Plomb électrolytique	283.0	283.0	283.0	304.0	331.0	318.8	281.2
Livestock — Bétail	419.3	410.0	367.0	358.9	396.2	400.3	354.8
Nickel	474.1	474.1	474.1	474.1	474.8	390.6	351.7
Oil, crude — Pétrole brut	199.7	195.7	191.0	191.6
Onions — Oignons	159.9	152.6	166.7	164.1	261.6	221.9	276.2
Potatoes — Pommes de terre	164.8	166.7	204.5	191.7	247.2	170.5	184.3
Rubber, raw — Caoutchouc brut	114.8	112.3	120.5	124.9	140.8	179.3	137.2
Scrap iron and steel — Déchets de fer et d'acier	258.3	269.5	326.0	326.5	328.9	250.0	252.7
Silver — Argent	383.5	358.7	437.2	431.0	478.1	497.5	602.8
Steers — Bouvillons	588.1	580.1	507.3	495.5	510.8	496.6	453.5
Sugar, raw — Sucre brut	282.8	214.9	185.8	169.9	160.9	144.1	102.4
Tin — Étain	328.4	326.1	315.3	324.6	349.6	338.0	305.8
Wool, raw domestic — Laine brute indigène	146.2	138.5	150.8	151.3	152.4	169.1	156.4
Wool, raw, imported — Laine brute importée	144.1	134.0	135.5	139.5	149.3	163.0	158.8
Zinc, prime, western — Zinc de première qualité, de l'Ouest	378.0	378.0	333.6	333.6	341.0	326.1	300.2

(1) Indexes for 1971 and 1972 are subject to revision. — Les indices pour 1971 et 1972 sont sujets à révision.

Excluding shelter — Total — Sauf logement ..	159.8	159.1	151.7	150.9	155.3	148.9	141.8

(1) For explanation see page 83. — Pour de plus amples explications, voir la page 83.

(2) Includes oranges and orange juice, grapefruit, bananas, grapes, canned pineapple, raisins, tea and coffee. — Oranges et jus d'orange, pamplemousse, bananes, raisins, ananas en conserve, raisins secs, thé et café.

(3) Includes television and radio. — Téléviseur et radio.

TABLE 10. Consumer Price Indexes for Canada - Selected Food Items

TABLEAU 10. Indices des prix à la consommation pour le Canada - Denrées alimentaires choisies

	Jan. 1972 Janv.	Dec. 1971 Déc.	Jan. 1971 Janv.	Dec. 1970 Déc.	1971	1970	1969
<u>Dairy products - Produits laitiers</u>							
Milk, fresh - Lait frais	149.0	149.0	140.3	140.2	145.1	138.9	137.1
Milk, evaporated - Lait condensé	129.2	126.8	110.1	109.9	119.6	112.5	112.9
Powdered skim milk - Poudre de lait écrémé	152.3	151.1	124.5	124.9	139.9	130.3	128.3
Butter, creamery, first grade - Beurre laitier, 1 ^{re} qualité	108.5	107.8	101.8	101.5	104.0	102.3	103.0
Cheese, plain, processed - Fromage ordinaire fondu	147.3	145.9	124.3	125.6	133.4	130.3	127.9
<u>Poultry and eggs - Volaille et oeufs</u>							
Chicken, grade A evisc. - Poulet, qualité A, évis- céré	118.9	114.4	105.7	101.3	112.0	107.7	111.2
Turkey, grade A evisc. - Dinde, qualité A, éviscérée	96.7	95.2	95.6	97.9	95.8	99.1	101.6
Eggs, fresh, grade A large - Oeufs frais, qualité A gros	100.0	96.7	88.7	89.8	87.3	99.0	109.9
Eggs, fresh, grade A medium - Oeufs frais, qualité A moyens	103.6	99.0	86.3	86.9	86.8	98.6	114.1
<u>Beef - Boeuf</u>							
Sirloin steak - Bifteck de faux filet	149.4	145.3	135.0	127.0	143.4	139.7	139.3
Round steak - Bifteck dans la ronde	159.0	152.6	142.4	137.1	148.0	143.7	135.6
Prime rib roast(1) - Rôti de plat de côtes(1)	150.6	146.0	130.0	126.6	139.9	134.4	133.5
Blade roast(2) - Rôti de haut-côté(2)	143.8	139.7	126.5	123.5	133.1	133.5	131.8
Stewing beef - Boeuf pour ragoût	152.4	149.2	141.2	138.5	145.9	142.1	138.3
Hamburg - Boeuf haché	160.2	155.0	142.5	139.3	148.5	144.8	138.8
Liver, sliced - Foie en tranches	118.0	120.2	119.4	120.0	119.1	132.3	115.3
<u>Pork - Porc</u>							
Rib chops, fresh - Côtelettes fraîches	130.2	132.7	118.5	124.3	122.7	137.2	140.8
Shoulder roast, Boston butt, fresh - Rôti dans l'épaule, soc de Boston, frais	109.9	106.9	100.8	101.5	102.4	120.5	129.9
Sausage, pure pork - Saucisse pur porc	119.3	119.6	119.1	119.6	119.6	127.2	127.4
Bacon, side, fancy, sliced, rind off - Bacon, flanc, de fantaisie, en tranches, sans couenne	77.2	75.7	82.3	82.8	76.4	102.2	101.1(6)
Ham, smoked, boneless(3) - Jambon fumé, désossé(3)	125.9	118.0	118.4	116.4	115.4	135.2	138.4
<u>Other meats - Autres viandes</u>							
Lamb, leg roast - Agneau, gigot	116.3	115.0	111.9	111.4	113.7	114.8	109.1
Veal, loin chops, rib end - Veau, côtelettes, bout de côte	171.3	166.8	162.6	161.5	165.0	162.6	151.5
Wieners or frankfurters - Saucisses de Francfort ...	121.5	118.9	116.4	116.1	119.0	121.5	120.1
Meat loaf, canned, mainly pork - Pain de viande, en conserves, principalement de porc	122.1	121.4	124.3	125.0	123.0	130.7	125.0
<u>Fish - Poisson</u>							
Cod fillets, frozen(5) - Filets de morue, conge- lés(5)	196.3	180.0	146.3	143.7	160.6	143.3	135.4
Salmon, canned, fancy pink - Saumon, en boîte, de fantaisie, rose	146.9	146.5	141.1	141.1	143.0	144.1	129.9
<u>Fats and oils - Huiles et corps gras</u>							
Margarine	112.1	111.8	116.1	114.2	114.8	112.1	105.5
Lard, pure - Saindoux pur	115.5	113.7	112.0	112.4	111.4	118.7	103.6
Shortening	120.3	120.2	113.2	114.5	118.7	114.1	109.4
Salad dressing - Vinaigrette	106.7	107.9	102.9	104.0	105.4	104.7	102.7
<u>Cereals and bakery products - Céréales et produits de la boulangerie</u>							
Flour, white, all purpose - Farine blanche, tout usage	131.9	130.2	127.4	125.1	131.3	133.5	134.3
Corn flakes - Flocons de maïs	124.3	123.6	112.9	113.4	119.6	117.4	116.2(7)
Macaroni - Macarons secs	126.9	127.1	125.3	124.7	126.0	126.4	119.4
Cake mix, white - Mélange à gâteaux, blanc	124.5	123.1	113.8	113.5	118.5	122.1	123.5
Bread, plain, white, wrapped, sliced - Pain blanc uni, enveloppé, coupé	129.8	131.9	124.7	124.5	130.5	125.5	123.8

Pears, canned, choice - Poires en conserve de choix	123.7	122.7	117.6	118.5	120.7	123.7	121.4
Peaches, canned, choice, halves - Pêches en conserve, de choix, moitiés	139.5	139.0	131.3	133.0	135.5	139.0	140.4
Pineapple, Hawaiian, sliced - Ananas de Hawaii, en tranches	95.8	96.0	95.5	97.1	96.1	100.2	99.8
Raisins, Californian and Australian - Raisins secs de Californie et d'Australie	149.4	149.0	150.8	150.9	150.2	153.0	149.2
Vegetables - Légumes							
Potatoes, No. 1 table - Pommes de terre n° 1 de table	109.5	108.3	108.4	93.8	114.7	134.0	123.1
Onions, No. 1 cooking - Oignons n° 1 à cuire	121.7	122.2	110.0	107.2	128.5	157.4	136.4
Carrots - Carottes	116.6	111.0	83.4	80.4	123.4	109.1	108.8
Turnips, Canada No. 1 - Navet canadien n° 1	124.6	124.1	115.1	116.7	125.1	171.0	141.8
Cabbage - Chou	178.1	123.3	147.9	106.3	150.4	167.4	145.2
Tomatoes, fresh - Tomates fraîches	157.6	233.3	143.9	183.4	162.2	143.7	140.5
Celery stalks, green - Céleri en branche, vert	217.9	201.1	135.7	131.9	141.6	150.3	146.7
Lettuce, head, fresh - Laitue pommée fraîche	195.9	255.0	138.2	137.8	160.8	139.9	158.1
Green peas, frozen, fancy - Pois verts congelés, de fantaisie	119.2	118.8	116.4	115.7	118.1	116.1	115.0
Green beans, fr. cut, frozen - Haricots verts coupés, congelés	105.1	104.4	101.5	101.9	102.7	102.4	102.2
Tomatoes, canned, choice - Tomates en boîte, de choix	131.4	131.0	126.7	127.1	128.9	131.6	126.7
Peas, canned, choice - Pois en boîte, de choix	120.7	120.8	117.5	116.4	117.0	125.7	126.5
Corn, canned, cream, choice - Mais en boîte, en crème, de choix	121.2	119.6	117.9	119.4	119.9	124.7	123.3
Infants' food, vegetable - Aliments pour bébés, légumes	129.9	129.5	119.3	115.9	124.8	118.9	120.1
Beans, with pork and tomato sauce - Haricots au porc à la sauce tomate	135.1	135.0	127.2	126.9	131.6	129.3	126.8
Soup, vegetable - Soupe aux légumes	99.7	99.6	97.1	95.1	99.3	99.7	97.9
Tomato juice, fancy - Jus de tomate de fantaisie	104.8	103.9	95.9	95.4	100.4	100.3	98.9(8)
Beverages - Breuvages							
Tea bags - Thé, sachets, orange pekoe	102.6	100.8	98.0	97.5	100.3	101.9	102.5
Coffee, medium quality - Café, qualité moyenne	128.0	128.2	133.5	134.3	132.2	132.4	115.5
Coffee, instant, dried - Café instantané, séché	112.9	112.2	111.1	111.1	112.3	112.9	107.2
Miscellaneous Groceries - Denrées diverses							
Tomato catsup - Ketchup aux tomates	124.0	122.4	108.7	107.4	115.9	112.6	111.6
Peanut butter, plain - Beurre d'arachides, ordinaire	132.8	133.5	137.6	138.4	136.9	139.8	125.0
Pickles, sweet, mixed - Cornichons sucrés variés	130.1	128.8	123.2	121.7	127.7	125.3	121.4
Jelly powders, flavoured - Gelée en poudre aromatisée	126.7	121.3	114.8	107.8	121.5	118.0	117.1

(1) Includes cuts with bone-in and boned and rolled. - Y compris les morceaux avec os, sans os et roulés.

(2) Includes cuts with blade-in and blade removed. - Y compris les morceaux avec ou sans palette.

(3) Indexes based on chain store prices in 7 cities. - Les indices sont fondés sur les prix dans les magasins à succursales multiples de 7 villes.

(4) Indexes based on prices for pectin and pure jam combined. - Les indices sont basés sur les prix de la confiture avec pectine et de la confiture pure.

(5) Indexes based on prices in 16 cities. - Les indices sont fondés sur les prix dans 16 villes.

(6) 1965=100. - 100 en 1965.

(7) 1963=100. - 100 en 1963.

(8) June 1968=100. - 100 en juin 1968.

TABLE 11. Consumer Price Indexes, Regional Cities, 1962-72(1)

TABEAU 11. Indices des prix à la consommation, agglomérations urbaines, 1962-72(1)

Note: (i) These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. (ii) For inter-city indexes of retail price differentials refer to Table 13. — Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au Tableau 13.

TABLE 19. Price Indexes of Electric Utility Construction, Canada, Annually 1956 Forward
1961=100

TABLEAU 19. Indice des prix à la construction dans les services d'électricité, Canada, par année depuis 1956

Item - Article	Year - An														
	1956	1957	1958	1959	1960	1961	1962	1963	1964	1965	1966	1967	1968	1969	1970P
Distribution systems - Total(6) - Réseaux de distribution	95.1	96.5	93.2	96.8	100.3	100.0	101.8	102.5	104.6	107.1	112.4	116.1	115.6	120.3	129.0
Construction - Construction	92.7	91.9	93.5	96.3	98.5	100.0	102.5	105.2	107.7	112.3	118.4	125.3	126.3	133.0	144.0
Equipment - Matériel	100.4	106.6	92.5	97.9	104.3	100.0	100.4	96.4	97.6	95.4	99.0	95.7	91.8	91.8	95.4
Transmission lines - Total(6) - Lignes de transmission	92.1	94.4	95.7	97.0	98.9	100.0	100.9	102.3	102.7	108.5	113.0	118.7	121.9	127.5	137.0
Transformer stations - Total(6) - Postes de transformation	115.2	118.1	109.0	113.5	109.8	100.0	105.1	107.6	112.0	118.3	122.5	121.2	117.1	120.4	
Structures and improvements - Installations et améliorations	110.1	105.6	101.3	102.6	103.3	100.0	102.6	108.9	112.9	124.0	131.0	127.2	123.5	131.3	137.4
Equipment - Matériel	127.9	132.6	118.4	123.2	115.7	100.0	105.9	107.3	111.9	117.4	120.4	115.1	106.7	106.1	
Hydro-electric generating stations(7) - Centrales d'énergie hydro-électrique(7)						100.0	102.7	106.0	109.5	114.8	121.8	126.2	131.3	139.2	147.4

(1) To assist comparison with other published series the indexes presented have been arithmetically converted from 1956=100 to 1961=100. The 1956=100 indexes are available on request. - Afin de faciliter la comparaison avec les autres séries publiées, les indices qui figurent ici ont été l'objet d'une conversion arithmétique portant l'indice à 100 en 1961 au lieu de 1956. Les indices calculés sur la base de 100 en 1956 sont fournis sur demande.

(2) The years referred to are fiscal years. For example 1956 represents the period April 1, 1956 to March 31, 1957. - Les années données ici sont des années financières. Par exemple, l'année 1956 représente la période allant du 1^{er} avril 1956 au 31 mars 1957.

(3) Major components for the provincial indexes were presented in the November 1970 issue of Prices and Price Indexes. - Les principaux éléments des indices pour les provinces ont paru dans la livraison de novembre 1970 de Prices and Price Indexes.

(4) Direct comparisons should not be made between this index and the highway index published by the Ont. Dept. of highways. The item content of the indexes is different. - On ne peut comparer directement cet indice avec celui de la voirie publié par le Ministère de la voirie de l'Ontario. Les éléments des deux indices sont différents.

(5) For further detailed explanation see Prices and Price Indexes - March 1971. - Pour plus de renseignements, voir Prices and Price Indexes - mars 1971

(6) For further detailed explanation see occasional paper 62-526. - Pour plus de renseignements, voir le bulletin hors série N° 62-526 au catalogue.

(7) For further detailed explanation see occasional paper 62-533. - Pour plus de renseignements, voir le bulletin hors série N° 62-533 au catalogue.

TABLE 20. Building Construction Price Indexes*

TABLEAU 20. Indices des prix des matériaux de construction*

1961=100

7) National Income and Expenditure Accounts, Catalogue 13-001, quarterly. - (N° 13-001 au catalogue, trimestriel).

This series contains an engineering component as well as a building component, and is therefore not precisely comparable in coverage with the non-residential composite index. The implicit price indexes are adjusted for changes in contractors profit and productivity. - Cette série comprend une composante génie aussi bien qu'une composante construction: elle n'a donc pas tout à fait la même portée que l'indice synthétique pour la construction non-résidentielle. Les indices synthétiques sont corrigés des variations des profits et de la productivité des entrepreneurs.

The indexes as originally published utilized the weights given above in the preparation of the fixed-weighted composite indexes. Because of the arithmetic rebasing of the indexes to the 1961=100 base, users can no longer apply the published weights to the indexes in columns 1, 2 & 3 and obtain the indexes given in columns 4 & 5. - Dans les indices publiés auparavant, on s'est servi des coefficients de pondération susmentionnés pour établir les indices synthétiques à coefficient de pondération fixe. Comme les indices ont été arithmétiquement ramenés à 1961=100, les utilisateurs ne peuvent plus appliquer ces coefficients de pondération publiés aux indices des colonnes 1, 2 et 3 et obtenir aussi les indices donnés dans les colonnes 4 & 5. For further detailed explanation see Prices and Price Indexes - May 1970. - Pour des explications détaillées voir Prix et indices de prix - mai 1970.

Explanation of Methods Used and Additional
Sources for Price Series

Industrial Price Indexes

Industry Selling Price Indexes (1961=100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue No. 62-528.

General Wholesale Index (1935-39=100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

Explication des méthodes utilisées et sources
supplémentaires des séries de prix

Indices des prix industriels

Indices des prix de vente dans l'industrie (1961=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", n° 62-528 au catalogue.

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue No. 62-501).

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (Vol. 23) (n° 62-501 au catalogue).

Farm Input Price Indexes (1961=100)

Indices de prix des entrées dans l'agriculture (1961=100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961=100 time base.

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961=100.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services Used by Farmers, 1935-39=100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39=100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

A detailed description of concepts, methods and data sources is contained in the occasional paper, Farm Input Price Indexes, 1961=100, Catalogue No. 62-534, and is reproduced in the September 1971 issue of Prices and Price Indexes, Catalogue No. 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Le bulletin hors série Farm Input Price Indexes, 1961=100 (n° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans Prices and Price Indexes de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Current price indexes will be published on a regular basis in the quarterly publication, Farm Input Price Indexes, 1961=100, Catalogue No. 62-004, and in the monthly publication Prices and Price Indexes, Catalogue No. 62-002.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel Farm Input Price Indexes, 1961=100 (n° 62-004) et dans le bulletin annuel Prices and Price Indexes (n° 62-002).

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterpart, and publication has been suspended.

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de le publier.

Canadian Farm Products Price Index (1935-39=100)

Indice des prix des produits agricoles canadiens (1935-39=100)

Wheat prices used in the index are buying prices of the Canadian Wheat Board for Nos. 1, 2 and 3 Manitoba Northern at Thunder Bay. Prices for western oats and barley are also supplied by the Wheat Board and quotations relating to No. 2 C.W., No. 3 C.W. and No. 1 Feed Oats and to Nos. 1 and 2 feed barley are included in the price index. Initial payments are first used in the index calculation and are revised as further payments are announced.

Les prix du blé canadien sur lesquels on se base pour calculer l'indice sont les prix payés par la Commission canadienne du blé pour les numéros 1, 2 et 3 Manitoba-nord à Thunder Bay. Les prix de l'avoine et de l'orge de l'Ouest sont également établis par la Commission du blé et les cotes se rapportant au numéro 2 O.C., au numéro 3 O.C. et à l'avoine fourragère n° 1 ainsi qu'à l'orge fourragère n° 1 et 2 font partie de l'indice des prix. Pour calculer l'indice on se sert d'abord des premiers paiements et on les rectifie à mesure que d'autres paiements sont annoncés.

Final payments for the crop year August 1969 - July 1970 were announced on February 4, 1971 for oats and barley, and on June 17, 1971 for wheat.

Les paiements définitifs pour la campagne agricole allant d'août 1969 à juillet 1970 ont été annoncés le 4 février 1971 en ce qui concerne l'avoine et l'orge, et le 17 juin en ce qui concerne le blé.

Unit — Unité	Initial and total participation payments 1969-70 and 1970-71 — Paielements initiaux et ensemble des paiements de participation 1969-70 et 1970-71

- (2) Incorporated retroactively in revised final indexes August 1969 to July 1970. — Inclus rétroactivement dans les indices finals révisés d'août 1969 à juillet 1970.
- (3) Used in indexes August 1970 to present. — Utilisé dans les indices d'août 1970 jusqu'à présent.
- (4) Not yet announced by Wheat Board. — Pas encore annoncé par la Commission canadienne du blé.

Residential and Non-Residential Building Construction Price Indexes

The fixed-weighted input price indexes of materials and wage rates for residential and non-residential building construction are being published here for the convenience of users (Table 20). A more complete description of the characteristics of the indexes appeared in the May 1970 issue of Prices and Price Indexes, and this explanation is available on request from the Prices Division, as is historical monthly data for the series.

Because the indexes measure the impact of price change on the materials and labour inputs to construction, and not the effects of changes in profit margins or productivity, there is thought to be an upward bias in these indexes as indicators of price change for the output of building construction, or buildings in place. Users are therefore warned to exercise caution in making use of the series, for this purpose. A comparison of these series with the implicit price deflators (1) providing an estimate of price change for the output of the industry, derived from the measurement of gross fixed capital formation in constant dollars, will provide some insight into the effects on the price movement of

(1) National Income and Expenditure Division, Statistics Canada.

Indices des prix de la construction résidentielle et non résidentielle

Les indices à pondération fixe des prix des entrées de matériaux et de salaires dans la construction résidentielle et non résidentielle sont publiés ici pour faciliter la tâche aux utilisateurs (Tableau 20). On trouvera une description plus détaillée des caractéristiques des indices dans Prices and Price Indexes de mai 1970. On peut s'en procurer un exemplaire ainsi que les données mensuelles chronologiques sur cette série en s'adressant à la Division des prix.

Comme les indices mesurent l'influence des variations de prix sur les entrées de matériaux et de main-d'oeuvre du bâtiment plutôt que les répercussions des variations de marges bénéficiaires ou de productivité, on les croit surestimés en tant qu'indicateurs des variations de prix de la construction, ou des bâtiments construits. Les utilisateurs devront donc faire preuve de discernement quant ils se serviront des séries à cette fin. Si l'on compare ces séries avec les facteurs de dégonflement (1) des prix implicites (qui donnent une estimation de la variation du prix pour la production de l'industrie), obtenus en mesurant la formation brute de capital fixe en dollars constants, on aura un aperçu des effets de l'ajustement sur l'évolution des prix des indices à pondération fixe des entrées pour

(1) Division du revenu national et de la défense nationale, Statistique Canada.

adjusting the fixed-weighted input indexes for changes in productivity and profit margins.

During the period from 1926-1966 a special sample of respondents supplied materials prices for the index. As of 1961 this sample has been replaced with prices from the ISPI system(2). The latter are published monthly in Table 2 of this publication.

The Construction wage rate series is based on wage rate material supplied by the Labour Standards Branch, Dept. of Labour, and relates to minimum wages paid on government contracts for construction in a variety of trades and cities.

Users are reminded that the indexes were arithmetically rebased to the year 1961=100 and therefore combining the components with the weights as shown will not provide the composite index provided. Users able to provide their own weights for the components can recombine the components to suit their particular needs.

Price Indexes of Machinery & Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Highway Construction Price Indexes (1961=100) (3)

The Price Indexes of Highway Construction in Canada express prices paid by provincial governments in contracts awarded for highway construction each year, as a percentage of prices paid in 1961. The arithmetic conversion of the indexes to a 1961 time base does not change their percentage movements as compared to the

tenir compte des variations de productivité et de marges bénéficiaires.

Au cours de la période 1926-1966, un échantillon spécial d'enquêtés a donné les prix pour l'indice. En 1961, on a remplacé cet échantillon par les prix tirés du système I.P.V.I.(2). Ces prix sont publiés par mois dans le Tableau 2 du présent bulletin.

La série consacrée au taux de rémunération dans l'industrie du bâtiment est basée sur les chiffres fournis par la Direction des normes du travail du ministère du Travail; elle a trait au salaire minimum versé aux termes de marchés signés avec le gouvernement pour des travaux de construction dans divers corps de métiers et dans diverses villes.

Nous rappelons aux utilisateurs que les indices ont été recalculés sur la base 1961=100 et qu'ils n'obtiendront pas l'indice synthétique fourni en combinant les éléments et les pondérations donnés. Les utilisateurs qui sont à même de fournir leur propre pondération pour les éléments peuvent procéder à leur propre combinaison adaptée à leurs besoins spécifiques.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices de prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente des fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labor Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix des marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de la construction routière (1961=100) (3)

Les indices des prix de la construction routière au Canada représentent les prix payés chaque année par les administrations provinciales au titre des marchés de construction routière, en pourcentages des sommes payées en 1961. La conversion des indices à la base 1961=100 ne modifie pas leur évolution en pourcentages comparativement aux indices publiés

(2) Industry Selling Price Indexes 1956-1968 Cat. 62-528.

(3) The years refer to fiscal years. Thus 1968 refers to the period April 1, 1968 to March 31, 1969.

(2) Indices des prix de vente dans l'industrie, 1956-1968, n° 62-528 au catalogue.

(3) Il s'agit d'exercices financiers. 1968 représente donc la période du 1^{er} avril 1968 au 31 mars 1969.

previously published indexes to a 1956=100 time base. Users are warned that an aggregation of the converted major group indexes with the published weights will not yield the published 1961=100 all items indexes. The conversion does not create this problem for a user wishing to reweight the converted major group indexes using weights appropriate to his own purpose.

Base-weighted indexes are published annually and measure, for the period 1956 to 1968, the effect of price change on the cost of specific programmes of highway construction in Canada represented by highway construction contracts of approximately \$50,000 or more awarded by specified provincial governments during the weight-base period. Weights of items in the index, representing the relative importance of units of construction in the year 1956 are held constant. Only the estimates of prices change from year to year, and the indexes thus measure the movement of prices through time. For a more complete statement of the problems of estimating price change for highway construction see pages vi & vii of the December 1967 issue of Prices and Price Indexes, Catalogue 62-002 and pages 9 & 10 of the reference paper Price Indexes of Highway Construction in Catalogue 62-520. The all-items index or its components are useful for planning and budgeting for highway construction programmes, in escalating or up-dating previously costed roadwork, in estimating replacement cost of previously completed roadwork, and as historical measurements of price trends in highway construction.

The indexes do not necessarily reflect the price movements of non-contract construction or maintenance work. The indexes are designed to measure price changes for a fixed programme of highway construction, in each of the seven provinces. Because price levels in the time base-period (1961) varied from province to province the indexes cannot be used to compare price differences between provinces, but only to compare differences in the rate at which prices are changing in the provinces.

Prices contained in the index are not for units of labour and materials as is usually the case in construction price indexes but rather for units of construction work put in place such as an acre of clearing, a cubic yard of earth excavation or a ton of bituminous hot-mix paving. In addition, the index contains prices of some materials, such as culvert pipe, usually supplied to the contractor by the highway departments. Prices of highway construction work are annual weighted averages of bid prices of units of construction in groups of contracts awarded, classified by price-determining characteristics of the contracts and the bid items such as volume of the bid item, type of contract and geographic location. Prices of material items of supply are prices paid by government departments to suppliers.

Price Indexes of Electric Utility Construction

In electric utility terms, the index is designed to provide an estimate of the impact of price change on the cost of materials, labour and equipment used in constructing and equipping electric utilities in a specified base period. The index provides an estimate of how much more, or less it would cost to reproduce the base-period programme of construction in another period, using the same construction technology as in the base period and assuming rates of profit and productivity in construction are the same in both periods.

As the market does not yield comparable selling prices for such unique transactions as, for example, the sale of a transmission line, it was not possible to produce an index of the prices of completed structures. Completed structure indexes would be appropriate for

précédemment et dont la base était 1956=100. Les utilisateurs ne doivent pas s'attendre à ce que le groupement des indices convertis des grands groupes et des pondérations publiées donne l'indice général publié (1961=100). Cette conversion ne pose aucun problème à l'utilisateur qui désire réviser la pondération des indices convertis des grands groupes en utilisant les poids adaptés à ses fins propres.

Les indices pondérés en fonction de la base sont publiés chaque année; ils mesurent, pour la période allant de 1956 à 1968, l'influence de l'évolution des prix sur le coût des programmes spécifiques de construction de routes au Canada représentés par les marchés de construction de routes d'environ \$50,000 ou plus accordés par certaines administrations provinciales au cours de la période visée par la base de pondération. Les poids des éléments des indices qui représentent l'importance relative des unités de construction en 1956 sont constants. Seules les estimations de prix varient d'une année à l'autre; les indices mesurent donc l'évolution des prix dans le temps. Pour plus de détails sur l'estimation de l'évolution des prix pour la construction routière, se reporter aux pages vi et vii du numéro de décembre de Prices and Price Indexes (n° 62-002 au catalogue de Statistique Canada) et aux pages 9 et 10 du bulletin intitulé Price Indexes of Highway Construction in Canada (n° 62-520 au catalogue de Statistique Canada). L'indice général ou ses éléments servent à la planification et à la budgétisation des programmes de construction routière, à indexer ou à mettre à jour les prix de travaux de routes effectués précédemment, à estimer le coût de remplacement des travaux routiers achevés précédemment et à mesurer chronologiquement l'évolution des prix de la construction routière.

Les indices ne reflètent pas nécessairement l'évolution des prix de la construction effectuée hors marché ou des travaux d'entretien; ils servent à mesurer les variations de prix pour un programme déterminé de construction routière dans chacune des sept provinces. Au cours de la période qui a servi de base (1961), les niveaux de prix ont varié d'une province à l'autre; aussi, on ne peut utiliser les indices pour comparer des différences de prix entre les provinces mais on peut seulement les employer pour comparer les différences entre taux de variation des prix dans les provinces.

Les prix compris dans l'indice ne se rapportent pas aux unités de travail ni de matériaux comme c'est habituellement le cas dans l'indice des prix de la construction; ils se rapportent plutôt aux unités de travail de construction effectué, comme le défrichement d'une acre de terrain, l'excavation d'une verge cube ou l'épandage à chaud d'une tonne de béton bitumineux. En outre, l'indice comprend le prix de certains matériaux, par exemple, les tuyaux de ponceau fournis habituellement à l'entrepreneur par les ministères de la Voirie. Les prix des travaux de construction routière sont des moyennes pondérées des prix de soumission pour les unités de construction par groupe de marchés classés selon les caractéristiques des marchés qui déterminent le prix et les éléments d'offre tels que le volume de chaque poste, le type de marché et la situation géographique. Les prix des matériaux fournis sont les prix payés par les ministères aux fournisseurs.

Indices des prix à la construction dans les services d'électricité

En ce qui concerne les services d'électricité, l'indice a pour but de fournir une estimation des conséquences des variations de prix sur le coût des matériaux, de la main-d'oeuvre et du matériel utilisés dans la construction et l'équipement des services d'électricité au cours d'une période de référence donnée. L'indice sert à mesurer combien il faudrait payer en plus ou en moins pour réaliser un programme de construction identique à celui de la période de référence en utilisant les mêmes techniques de construction et en supposant que les taux de rentabilité et de productivité de la construction soient les mêmes pour les deux périodes.

Comme il est impossible d'obtenir directement sur le marché des prix de vente comparables pour des opérations de caractère aussi unique, par exemple, que la vente d'une ligne de transport d'énergie, Statistique Canada n'a pu établir un indice du prix des installations en place. Un tel indice ne

users wishing either to estimate reproduction costs or to deflate capital formation. For such uses the indexes introduced in this publication have specific shortcomings. Nonetheless, they may be helpful for such purposes provided the users understand the deficiencies. Thus the reader is asked to make particular note of Section III, of Occasional Paper Catalogue 62-526 Price Indexes of Electrical Utility Construction - The Necessity for Compromise and Section XI, (of the same paper) Uses and Limitations. In addition, because particular construction projects are unique, the aggregate indexes will not likely be appropriate to specific projects since they relate to an average mix of materials, labour and equipment derived from a variety of projects in a specific base period. Thus, if the component price indexes and their weights included in the aggregate index presented herein are inappropriate for a particular purpose the user should consider selecting appropriate component indexes from among those published herein. These indexes could then be combined into an aggregate index by utilizing weights derived from the projects or assets to be costed or deflated.

Prices used in the indexes are for the most part selling prices reported monthly by manufacturers for materials or equipment. The price reported is for units and terms of sale representative of the volume sales of the manufacturer. Where sales to electric utilities form a small share of the total sales of the manufacturer, the price reported may not adequately represent the price to the construction trade and others directly involved in constructing and equipping electric utility facilities. In such cases, prices charged other manufacturers or wholesalers have been included in the index. Federal sales tax changes are reflected in the index but no adjustments have been made for provincial tax changes. Until December 1964 wage rate data were supplied by the Federal Department of Labour and represented minimum hourly rates paid to construction workers in major cities employed on federal government contracts. In 1965 union basic wage rates reported by major utilities and some contractors were incorporated into the index. The sample selected provides an estimate of wage rate change for urban own account and contract electric utility construction. Some further improvements will be made to improve the coverage relating to rural non-union work for transmission lines.

Construction has been defined as new construction or major reconstruction for distribution systems, transmission lines and transformation or switching stations. Maintenance and operating costs are excluded. Cost data were supplied by major utilities, relating to own account and to contract construction erected during the last half of the 1950's. Weights were derived from these data which indicated the relative importance of the major inputs to the construction. The components of cost relating to distribution and transmission facilities encompass such items as poles, hardware, conductors, insulators, meters, distribution transformers and expenditures for labour, e.g. - linemen and groundmen. Costs relating to construction equipment such as trucks, and components of equipment operating costs such as tires, gasoline and repairs were also included. Transformation and switching stations encompass some of the items listed above but the most important elements of cost relate to transformers and switching equipment. Expenditures for land and rights-of-way have been excluded.

The term Canadian electric utility has been defined to include municipal as well as nonmunicipal utilities but the majority of the cost data tabulated was derived from the major nonmunicipal utilities. Manufacturers who produce electricity for their own use and who may also sell electricity have been excluded from the cost survey.

serait utile que si l'on désirait obtenir une estimation des sommes qu'il faudrait engager pour réaliser à nouveau un programme de construction identique ou encore pour dégonfler une formation de capital. Les indices publiés ici présentent en ce sens certaines lacunes. Ils peuvent néanmoins servir à de telles fins pourvu que les utilisateurs en comprennent les limites. Les lecteurs peuvent se reporter aux Sections III et XI de la publication Price Indexes of Electrical Utility Construction (Statistique Canada, 62-526): "The Necessity for Compromise" et "Uses and Limitations". De plus, en raison du caractère unique de chaque projet de construction, l'indice synthétique ne pourra sans doute pas s'appliquer à un projet bien précis car il porte justement sur une moyenne des matériaux, de la main-d'oeuvre et du matériel utilisés dans la réalisation de plusieurs projets au cours d'une période de référence donnée. Ainsi, si les indices détaillés et les poids correspondants qui composent les indices synthétiques présentés ici ne conviennent pas à un usage bien précis, l'utilisateur pourra toujours se servir des autres indices détaillés et construire, à l'aide des coefficients de pondération, les indices de son choix, soit pour évaluer le coût d'un projet, soit pour établir des facteurs de dégonflement.

La plupart des prix des matériaux et du matériel utilisés pour établir les indices sont les prix de vente déclarés mensuellement par les fabricants. Ces prix sont représentatifs des unités de mesure et des conditions de vente valables pour les ventes en grande quantité des fabricants. Lorsque les ventes aux services électriques ne représentent qu'un faible pourcentage du chiffre d'affaires d'un fabricant, il est possible que le prix déclaré ne représente pas de façon satisfaisante le prix consenti aux entreprises en construction et aux autres industries s'occupant directement de construction et d'installation de services d'électricité. Dans ces cas, on a inclus dans l'indice les prix facturés aux autres fabricants ou grossistes. On a tenu compte, dans l'établissement de l'indice, des variations de la taxe de vente fédérale; toutefois, il n'a été fait aucun redressement pour les variations de taxe provinciale. Jusqu'en décembre 1964, les données sur les taux de rémunération étaient fournies par le ministère fédéral du Travail et représentaient le salaire horaire minimum versé aux personnes travaillant au titre d'un marché accordé par le gouvernement fédéral dans certaines grandes villes. En 1965, on fit entrer dans l'indice le salaire de base exigé par les syndicats et déclaré par les principaux services et par certains entrepreneurs. L'échantillon choisi représente donc une estimation des variations du taux de rémunération dans la construction en ville de services électriques pour compte propre ou au titre d'un marché. Certaines améliorations à l'indice sont prévues de façon à l'étendre aux personnes non syndiquées travaillant dans les régions rurales à la construction de lignes de transport d'énergie.

Le terme "construction" a été défini comme étant la construction neuve ou la réparation de réseaux de distribution, de lignes de transport d'énergie, de postes de transformation ou de postes de manœuvre. L'entretien et les frais d'exploitation ne sont pas compris. Les données sur les prix de revient sont fournies par les principaux services d'électricité et portent sur la construction exécutée pour compte propre ou au titre d'un marché au cours de la deuxième moitié des années cinquante. Les poids tirés de ces données représentent l'importance relative des principaux éléments entrant dans la construction. Les composantes du coût de la distribution et du transport comprennent certains éléments comme les poteaux, la quincaillerie, les conducteurs, les isolateurs, les compteurs, les transformateurs de distribution et les dépenses en main-d'oeuvre (monteurs, personnel de service, etc.). Les dépenses entraînées par le matériel de construction (camions et pièces d'équipement) et les frais d'exploitation (pneus, essence et réparations) sont également inclus. Les postes de transformation et les postes de manœuvre comprennent certains des éléments ci-dessus; les frais les plus importants sont cependant entraînés par les transformateurs et les appareils de connexion. Les dépenses foncières et les droits de passage ont été exclus.

Par définition, l'expression "service d'électricité canadien" englobe aussi bien les services municipaux que les autres; toutefois, la majeure partie des données de coût ont été tirées des déclarations des services non municipaux. Les fabricants qui produisent de l'électricité destinée à l'auto-consommation et qui peuvent également vendre de l'électricité ont été exclus de cette enquête.

Price Indexes of Hydro-electric Generating Stations

The following additional points may be of assistance to users of the hydro-electric generating stations index which was described in some detail in Statistics Canada Occasional Paper, Catalogue 62-533.

- (a) Wage rate data are derived from a variety of sources but mainly from the Canadian Construction Association surveys of union agreements and from Federal Pay Research Bureau studies of salaries paid professional, technical and clerical personnel. Basic wage rates, excluding fringe benefits, were used in index calculations.
- (b) Prices for ready-mix concrete and for earth and gravels in place have been utilized as replacements for input prices of labour, materials and equipment rental for concrete production and embankments in place.
- (c) Prices are included for some categories of expense not previously included in input price indexes for construction: interest during construction, overhead expense and the provision and operation of temporary camp accommodation.
- (d) Weighting patterns exclude expenditure for ancillary facilities for logging and navigation, permanent houses, etc.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto, Montreal and Canadian stock exchanges. The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the common and mining stock indexes are Thursday's closing quotations as reported in the *Globe and Mail* and the *Montreal Gazette*. For preferred stocks, prices are monthly weighted averages of the daily closing prices in which weights are daily total sales. The price reference base for the indexes is the year 1956 which has been adopted as an interim base for recently developed Statistics Canada indexes. The indexes express prices as a percentage of prices in 1956 and arithmetically converted to the 1961=100 base.

Revised indexes on the base 1956=100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the index, apart from the shift in the price reference base, is the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) have been replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-Metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) have been continued. The major group Utilities is continued but the Pipelines index has been added as a sub-group and the previous Power and

Indices de prix des centrales hydroélectriques

Les points supplémentaires ci-après peuvent aider les utilisateurs de l'indice des centrales hydroélectriques décrit en détail dans le bulletin hors-série de Statistique Canada portant le numéro 62-533.

- a) Les données sur le taux de rémunération proviennent de diverses sources et surtout des enquêtes sur les accords syndicaux de l'Association canadienne de la construction et des études du Bureau de recherche sur les traitements portant sur la rémunération des travailleurs intellectuels, des techniciens et du personnel administratif. Pour le calcul de l'indice, on a utilisé les taux de rémunération de base, avantages sociaux non compris.
- b) Au lieu du prix des entrées de main-d'oeuvre, de matériaux et de location de matériel pour la production de béton et des remblais effectués, on a utilisé le prix du béton préparé et celui de la terre et du gravier en place.
- c) L'indice comprend les prix correspondant à certains postes de dépenses qui n'étaient pas repris auparavant dans les indices de prix des entrées dans la construction: intérêts pendant la construction, frais généraux, fourniture et entretien de baraquements temporaires.
- d) Les facteurs de pondération ne comprennent pas les dépenses affectées aux installations auxiliaires pour l'exploitation forestière et la navigation, les maisons permanentes, etc.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières donnent une mesure dans le temps de l'effet du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un placeur hypothétique (et non pas un spéculateur). Le portefeuille représente des titres des sociétés canadiennes cotées à la Bourse de Toronto, de Montréal et à la Bourse canadienne. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres ordinaires et des titres miniers sont les cours de fermeture de la Bourse du jeudi indiqués dans le *Globe and Mail* et dans la *Montreal Gazette*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles du total des ventes quotidiennes. La base de pondération entre les sous-groupes est l'année 1956. Toutes les séries ont été recalculées sur la base de 1961=100. Les indices sont pondérés d'après le nombre d'actions en circulation.

Les indices révisés sur la base 1956=100 ont été publiés pour la première fois dans la livraison de juin 1962 de ce bulletin. La plus importante modification à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice: mines industrielles, boissons, textiles et habillement, pâtes et papiers, et huiles (sous la désignation de pétrole). Le grand groupe des services d'utilité publique a été conservé mais l'indice des pipe-lines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et

Traction sub-group has been replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A new major group Finance is composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights, which were previously limited to major groups, have been extended to sub-groups. Weights in the index continue to be based on shares outstanding.

For the list of stocks currently included in the Investors Index and Preferred Index, see Prices and Price Indexes for February 1971.

Retail Price Indexes

Consumer Price Index for Canada (1961=100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services of items for which there is a continually measurable market price over time, corresponding to a specific quantity of the item.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index is unlikely to represent closely the experience of any one family within the group nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families - (a) living in cities with over 30,000 population, (b) ranging in size from two adults to two adults with four children, and (c) with annual incomes during 1957 ranging from \$2,500 to \$7,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In 1952, the time base was updated to 1949=100 from 1935-39=100 and, at the same time, weights were revised to reflect family expenditure patterns in 1947-48. A subsequent revision of weights based on 1957 expenditures was introduced at the beginning of 1961 and the time base was revised from 1949=100 to 1961=100 at the beginning of 1969.

Full details on the latest weighting patterns and time base revisions are available in the occasional paper "The Consumer Price Index for Canada 1949=100" - Revision based on 1957 Expenditures", Statistics Canada Catalogue No. 62-518 and in the January 1969 issue of the monthly bulletin, Prices and Price Indexes, Catalogue No. 62-002.

traction a été remplacé par deux nouveaux sous-groupes: l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans Prix et indices des prix de février 1971.

Indices des prix de détail

Indice des prix à la consommation au Canada (1961=100)

L'indice des prix à la consommation sert à mesurer le taux de variation du prix qu'il en coûte pour acheter un "panier" de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" demeure le même; il équivaut tout au moins à une quantité égale de biens et services de qualité égale; de plus, il est constitué de produits pour lesquels on peut toujours trouver sur le marché un prix mesurable et correspondant à une quantité déterminée de ce produit.

L'indice porte sur un groupe étendu mais bien déterminé de familles urbaines et rend compte des variations des prix auxquelles l'échantillon en question a dû faire face. Il est fort peu probable que l'indice représente fidèlement l'expérience d'une famille en particulier; de même, il ne faut pas s'attendre à ce qu'il rende compte des variations des prix auxquelles ont fait face des groupes sensiblement différents par le revenu, la taille de la famille et le lieu de résidence. L'échantillon sur lequel porte l'indice est composé de familles - a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille oscille entre deux adultes et deux adultes avec quatre enfants et c) dont le revenu annuel en 1957 oscillait entre \$2,500 et \$7,000. Pour évaluer l'influence des variations de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation porte sur les variations d'environ 300 articles.

L'indice des prix à la consommation au Canada remonte au début du siècle; depuis lors, on a révisé périodiquement la période de référence et les schémas de pondération. Ainsi, en 1952, la période de référence est passée de 1935-1939=100 à 1949=100; à la même occasion, les poids ont été revus de façon à présenter un reflet de la structure des dépenses des familles en 1947-48. La révision suivante des facteurs de pondération était fondée sur les dépenses des consommateurs en 1957 et fut introduite au début de 1961. Enfin, c'est au début de 1969 qu'on porta la période de 1949=100 à 1961=100.

Le lecteur trouvera de plus amples renseignements sur les dernières révisions du schéma de pondération et de la période de référence dans la publication occasionnelle "The Consumer Price Index for Canada (1949=100) - Revision based on 1957 Expenditures" (n° 62-518) et dans la livraison de janvier 1969 du bulletin mensuel "Prices and Price Indexes" (n° 62-002).

Consumer Price Indexes for Regional Cities (1961=100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). The regional indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada except for their individual weighting systems.

Also, city indexes are not as comprehensive in price content as the Canada consumer price index and may underestimate slightly the degree of price movements occurring. In this connection, the shelter component of the city indexes moves on the basis of changes in rents only, whereas changes in both rents and homeownership costs are included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and all-items indexes for cities have tended to underestimate somewhat the rates of price increase, particularly over longer periods. Studies are under way to incorporate homeownership prices in city indexes.

Each index is designed to measure the influence of changes in retail prices taking place in the localities specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in those particular areas.

In using the city indexes, it should be remembered that they are not indicators of comparative levels of prices as between the cities. That is, they do not in any way indicate whether prices are higher or lower in one city than in another.

For comparisons of retail price differentials between cities see Table 13 of this publication and the relevant explanatory note.

Historical Consumer Price Indexes (1969=100) for "Thunder Bay" and "Quebec City" are available, with explanatory notes on request from Retail Prices Section, Prices Division, Statistics Canada.

Measuring the Purchasing Power of Earnings

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Indices des prix à la consommation dans certaines agglomérations urbaines (1961=100)

Ces indices sont publiés mensuellement dans le présent bulletin (voir Tableau 11). Par leur conception et par les éléments qui les composent, ces indices sont en général similaires à l'indice des prix à la consommation au Canada, seuls leurs coefficients de pondération diffèrent.

Aussi, les indices de prix dans les villes ne représentent pas les prix de façon aussi complète que l'indice des prix à la consommation au Canada et ils peuvent sous-estimer légèrement l'importance des mouvements de prix. C'est ainsi que l'élément "logement" des indices des villes varie en fonction des changements dans les loyers uniquement, alors que l'indice pour l'ensemble du Canada comprend les loyers et les coûts de propriété. À la suite d'une augmentation des coûts de propriété plus rapide que celle des loyers, les indices de l'habitation et de tous les éléments pour les villes ont tendu à sous-estimer quelque peu les taux de croissance des prix, surtout sur de plus longues périodes de temps. On étudie actuellement l'incorporation des prix de propriété dans les indices des villes.

Chaque indice est conçu de façon à mesurer les conséquences des variations des prix de détail survenues dans les agglomérations en question sur le prix d'un panier constant de biens et de services représentant la consommation d'un groupe représentatif de familles appartenant à ces secteurs.

Le lecteur devra toujours garder en mémoire que ces indices ne sont pas des indicateurs qui permettent de comparer le niveau des prix d'une ville à l'autre et qu'ils n'indiquent en aucune façon si les prix sont plus ou moins élevés dans une ville que dans une autre.

Pour étudier les différences de prix au détail entre les villes, il faut consulter le Tableau 13 de ce bulletin et les notes explicatives qui l'accompagnent.

Les indices chronologiques des prix à la consommation (1969=100) pour Québec et Thunder Bay et les notes explicatives qui les accompagnent peuvent être obtenus de la Section des prix de détail de la Division des prix de Statistique Canada.

Calcul du pouvoir d'achat

Toute variation des prix à la consommation influe directement sur la quantité de biens et de services qu'on peut acheter avec un dollar et par conséquent sur le revenu moyen. Pour mesurer le revenu en tenant compte de la variation des prix à la consommation, on peut déduire du revenu moyen réel le montant proportionnel qui correspond à l'augmentation des prix à la consommation ou ajouter au revenu réel le montant qui équivaut à la diminution des prix à la consommation. Ces moyennes corrigées peuvent ensuite servir à déterminer la quantité de biens et de services qu'on aurait pu acheter grâce à un revenu moyen, les prix à la consommation et les habitudes de consommation n'ayant pas changé. On trouvera ci-dessous des exemples de cette méthode.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of 100.00 by the amount of the consumer price increase. The adjusted average is \$90.91 ($100.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$80.00 and the week B figure of \$90.91. Taking the week A average of \$80.00 as equal to 100.0, the week B index becomes 113.6 ($90.91/80.00 \times 100.0$). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than those received in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the rise of 25% in money wages ($100.00/80.00 \times 100.0$).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the periods covered by the price index, and in addition to these factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual and real wages uses 1961 as a reference year. However, the adjustment made in the foregoing illustration can be applied to any reference level; percentage change between any two periods will be the same regardless of the reference period selected.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B et que dans la même période de temps l'indice des prix à la consommation progresse de 100.0 à 110.0. En raison de l'augmentation de 10 % des prix à la consommation, on n'obtiendra plus autant avec \$1 au cours de la semaine B que pendant la semaine A. De même il serait exagéré de dire que, pour une augmentation de la rémunération de \$80 à \$100 le pouvoir d'achat du salaire hebdomadaire moyen s'est élevé de 25 %. On peut ramener cette augmentation à des proportions plus justes en déduisant du nouveau salaire hebdomadaire moyen l'augmentation des prix à la consommation. La rémunération moyenne corrigée s'établira donc à \$90.91 ($100.00/110.0 \times 100.0$), dont on peut dire qu'elle exprime la rémunération hebdomadaire moyenne de la semaine B en dollars de la semaine A, ou encore qu'elle rend compte du niveau effectif de la rémunération hebdomadaire de la semaine B par rapport à la semaine A.

On peut pousser plus loin les calculs et exprimer à l'aide d'un indice la relation entre le salaire moyen de la semaine A (\$80) et celui de la semaine B (\$90.91). Ainsi, si l'on considère que la rémunération moyenne de \$80 de la semaine A était égale à 100.0, l'indice de la semaine B deviendra 113.6 ($90.91/80.00 \times 100.0$). On pourrait appeler cet indice l'indice de la rémunération hebdomadaire effective; il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6 % de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10 % des prix à la consommation. L'augmentation de 25 % des salaires se ramène donc à une augmentation effective de 13.6 % ($100.0/80.00 \times 100.0$).

Il convient de souligner que, même si les estimations de la rémunération moyenne effective résument assez bien la situation d'un large éventail de travailleurs, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur le revenu porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur le revenu ajustées par l'indice des prix à la consommation (les habitudes de consommation étant "fixes") perdront graduellement de leur valeur. Enfin, il ne faut pas oublier qu'une partie du revenu peut être consacrée à l'épargne et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations du revenu effectif calculées à partir de moyennes du revenu brut peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés et de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente la rémunération tant réelle qu'effective prend pour base l'année 1961. Toutefois, les ajustements illustrés dans les exemples ci-dessus peuvent s'appliquer à tout niveau de référence; la variation proportionnelle entre deux périodes sera en effet identique quelle que soit la période de référence choisie.

Inter-City Retail Price Comparisons

Statistics relating to differences in retail prices between Canadian cities were initially developed for food, and subsequently extended to cover such other elements of the family budget as clothing, transportation, household operation, health and personal care, recreation and reading, and tobacco and alcohol. In all, intercity price comparisons are drawn for commodities and services comprising nearly three-quarters of the budget on which the Consumer Price Index for Canada is currently based. Major omissions are shelter (both rented and owned), domestic utilities (fuel, light and water), and restaurant meals. While recognizing the importance of shelter differentials in any overall comparison of the general price level being encountered by consumers in different urban centres, the problems inherent in drawing valid comparisons between cities are such as to require a good deal more research. Meanwhile, it is considered that, despite the absence of shelter differentials at this time, publication of retail price comparisons for other elements of the budget will go some distance towards serving the varied needs of users.

Table 13 presents the results of an updating of earlier spatial retail price measurements to May 1969, and broadens the scope of the study to include several more cities. A fuller explanation of the study from which this table is derived is contained in the November 1968 and November 1969 issues of Prices and Price Indexes (Statistics Canada, Catalogue Number 62-002).

The original data base of this study was the wide range of retail price quotations collected in the course of production of the national and urban Consumer Price Indexes. In developing these spatial price comparisons efforts were made to achieve comparability by equating qualities of goods and services and by matching types of retail outlets, as far as possible. Price relationships between pairs of cities were derived and subsequently converted to a common base of Winnipeg prices equalling 100 to facilitate comparisons over the whole range of cities. The updating of these measurements of inter-city retail price differentials was accomplished by application of the relative movement of prices, at the item level in each city, over the intervening periods as derived from the relevant city consumer price indexes. These price relationships at the item level were aggregated on the basis of the Canada urban consumer spending pattern, rather than the patterns applicable to individual cities. While differences in spending patterns exist among cities, the magnitude of these differences in the cities covered is not such as to affect most of the spatial comparisons significantly. Because of the previously mentioned absence of shelter price relationships, which may be of considerable significance in any overall comparison of inter-urban retail price differentials, aggregative indexes beyond major budget groupings are not shown.

It should be noted that the retail prices used in this comparisons, being those faced by consumers, include sales and excise taxes as applicable. Variations between provinces in the scale of sales taxes imposed on a wide range of non-food commodities can be of significance in explaining inter-city price differentials for these items.

While these indexes have been expressed in terms of Winnipeg = 100, the selection of Winnipeg as the base city has no special significance, and the indexes may be expressed on the base of any of the individual cities included.

Comparaisons entre les prix de détail d'une ville à l'autre

A l'origine, la statistique des différences entre les prix de détail d'une ville du Canada à l'autre a été mise au point pour l'alimentation; par la suite, on l'a étendue à d'autres postes du budget familial tels que l'habillement, les transports, l'entretien du ménage, la santé et les soins personnels, les loisirs et la lecture, et le tabac et l'alcool. Au total, les comparaisons d'une ville à l'autre portent sur des biens et des services constituant près des trois quarts du budget servant actuellement à construire l'indice des prix à la consommation au Canada. Les comparaisons omettent de mentionner principalement le logement (location et frais de possession), les services publics au profit des ménages (combustible, éclairage et eau) et les repas pris au restaurant. Sans vouloir nier l'importance des différences en ce qui concerne le logement dans toute comparaison globale du niveau général des prix auxquels les consommateurs doivent faire face dans divers centres urbains, il faut bien dire que les problèmes que comporteraient l'établissement d'une comparaison valable d'une ville à l'autre sont tels qu'ils nécessitent encore pas mal de recherche. Entre-temps, on estime que malgré l'absence actuelle de données sur les différences entre les dépenses de logement, la publication de comparaisons des prix de détail pour d'autres postes du budget permettra de faire de gros progrès en ce qui concerne la satisfaction des besoins variés des utilisateurs.

On trouvera au Tableau 13 le résultat d'une mise à jour de mesures de prix de détail tirées précédemment jusqu'à mai 1969; ce tableau élargit la portée de l'étude en y incorporant plusieurs autres villes. Une explication plus détaillée de l'étude dont le tableau en question est tiré figure dans les livraisons de novembre 1968 et novembre 1969 de Prices and Price Indexes (n° 62-002 au catalogue).

Les premières données de base pour la présente étude ont été constituées par l'importante collection de prix de détail recueillie lors de la confection des indices nationaux et urbains des prix à la consommation. Au moment d'établir ces comparaisons géographiques de prix, on s'est efforcé d'assurer la comparabilité en prenant des biens et des services de qualité égale et en assortissant autant que possible les points de vente au détail par type. Les relations de prix entre paires de villes ont été calculées puis converties à la base commune des prix de Winnipeg = 100 afin de faciliter des comparaisons pour l'ensemble de toutes les villes. La mise à jour de ces mesures des différences de prix de détail entre les villes a été assurée grâce à l'extension des mouvements relatifs de prix au niveau de chaque article dans chaque ville aux périodes observées selon le calcul établi à partir de l'indice des prix à la consommation pour la ville en question. Ces relations entre les prix au niveau de l'article ont été agrégées sur la base des habitudes de consommation du citoyen pour l'ensemble du Canada et non pas selon les habitudes de dépense applicables à des villes individuelles. Même s'il existe des différences dans les habitudes de dépense d'une ville à l'autre, l'importance de ces différences en ce qui concerne les villes dont il est question ici ne sont pas suffisantes pour influencer sensiblement sur la plupart des comparaisons géographiques. Du fait de l'absence des relations de prix en ce qui concerne le logement, dont il a déjà été question ci-dessus et qui pourrait avoir une importance considérable chaque fois que l'on voudrait tirer une comparaison globale entre les différences de prix à la consommation au détail d'une ville à l'autre, on ne trouvera ici aucun indice synthétique agrégé au-delà des principales composantes du budget.

Il faut remarquer que les prix de détail ayant servi à la présente comparaison sont ceux que doit payer le consommateur et comprennent donc les taxes de vente et les taxes d'accises qui peuvent s'appliquer. Les différences d'une province à l'autre entre les barèmes de taxe de vente imposés sur une grande variété de biens non alimentaires peut avoir une grande importance pour expliquer les différences de prix d'une ville à l'autre pour les articles en question.

Le fait que ces indices aient été exprimés en prenant Winnipeg = 100 ne signifie pas que le choix de Winnipeg comme ville de référence ait une signification particulière et les indices pourraient être exprimés sur la base de n'importe laquelle des villes qui y figurent.

PRICES & PRICE INDEXES

PRIX ET INDICES DES PRIX

FEBRUARY - 1972 - FÉVRIER

Price Indexes of Highway Construction in Canada, Seven Province composite 1961=100, Quebec 1964=100 are presented on pages iv to x of this issue. Combined, all-items provincial indexes and major group indexes are presented for the period 1956 to 1970 for the Composite; for 1964—1970 for Quebec. A description of recent price movements is included as well as related charts and tables.

Les indices des prix de la construction routière au Canada, pour sept provinces (1961=100) et pour le Québec (1964=100) sont présentés de la page iv à x de cette publication. Un indice synthétique et ceux des principaux éléments des provinces pour la période 1956 à 1970, Québec 1964—1970. Une description des variations des prix, des diagrammes ainsi que des tableaux sont inclus.

Price Indexes of Highway Construction in Canada

Seven Province Composite 1961=100(1) Quebec 1964=100(1)

The base-weighted highway construction price indexes presented herein include the all items and major group indexes for grading, granular base courses and surface courses. The seven province composite to a 1961=100 base is presented for the period 1956 to 1970. The Quebec index, to a 1964=100 base, encompasses the period 1964 to 1970.

The indexes express the relationship of prices provincial highway departments are paying in any given year, to prices paid in the base period for an unchanging programme of construction. Prices included in the index relate to bid items of contracts awarded and to materials purchased by the department which are supplied free to the contractor. Bid items included are for units of construction work such as a cubic yard of earth excavation or a ton of bituminous hot mix pavement in place.(2)

Computer conversion problems have delayed the publication of the 1970 indexes a delay which will not affect publication of the 1971 indexes. The Quebec indexes presented for 1970 are an estimate of 1970 index levels. Any necessary corrections to the 1970 indexes will be released with the 1971 indexes.

Characteristics of Recent Price Movement

In 1970 the all items, 7 province composite index rose to 145.7 an increase of 5.6 % over 1969. All three major categories of the composite index indicated similar increases i.e. grading 5.4 %, granular base courses 4.2 % & surface courses 8.7 %.

The all items index for the province of Quebec rose to 109.5 an increase of 2.2 % over 1969. All three major categories also recorded increases i.e. grading 0.2 % granular base courses 3.9 % and surfacing courses 4.2 %. These changes were accompanied by an increase of 5.2 % in provincial expenditures in roads.

With the exception of British Columbia price increases were general throughout the provinces both in terms of all items indexes & the major categories.

During this period, the rise in prices at the combined level was similar to the rise in construction expenditures. Public & private expenditure for construction in Canada recorded an increase of 3.6 % in 1970 over 1969. Public & private expenditure for road highway construction in Canada showed an increase of 2 %, with the provincial government expenditure for roads indicating an increase of 4.3 %.

There has been no significant change in the relative importance of road expenditure as a proportion of the total construction dollar in 1970 over 1969; provincial governments continue to spend somewhat more than 60 % of every construction dollar.

(1) The years refer to fiscal years. Thus 1961 refers to the period April 1, 1961 to March 31, 1962.
(2) For a more complete statement of the problems of estimating price change for highway construction see pages vi & vii of the December 1967 issue of Prices and Price Indexes, DBS publication 62-002 and pages 9 & 10 of the reference paper Price Indexes of Highway Construction in Canada DBS publication 62-520.

Indice des prix de la construction routière au Canada

Indice synthétique pour sept provinces (1961=100)(1) et pour le Québec (1964=100)(1)

Les indices pondérés en fonction de la base qui sont présentés ici comprennent un indice synthétique et les indices des principaux éléments qui entrent dans le nivellement, la construction des couches de base granuleuse et la construction des couches de surface. L'indice synthétique pour sept provinces (1961=100) correspond à la période 1956 - 1970. L'indice pour le Québec (1964=100) couvre la période 1964 - 1970.

Ces indices servent à établir une comparaison entre le prix payé par les administrations publiques provinciales au cours d'une année donnée et le prix payé au cours de la période de base pour un programme de construction identique. Les prix qui composent l'indice portent sur les éléments d'offre des contrats traités par voie d'adjudication et sur les matériaux achetés par les ministères et donnés aux entrepreneurs; ces éléments d'offre se rapportent aux unités de travail de construction telles que l'excavation d'une verge cube de terre ou l'épandage à chaud d'une tonne de béton bitumineux en place(2).

Des difficultés de conversion mécanographique ont retardé la publication des indices de 1970 (cette situation ne devrait toutefois pas entraîner de retards dans la publication des indices de 1971). Les indices de 1970 pour le Québec ne sont que provisoires; s'il y avait lieu de les corriger, les chiffres définitifs paraîtraient avec les indices de 1971.

Caractéristiques du mouvement des prix

En 1970, l'indice synthétique pour les sept provinces est passé à 145.7, ce qui représente une augmentation de 5.6 % par rapport à 1969; de même, les trois principaux éléments de l'indice synthétique (nivellement, couches de base granuleuses et couches de surface) ont enregistré des avances respectives de 5.4 %, 4.2 % et 8.7 %.

L'indice synthétique pour le Québec est passé à 109.5, ce qui représente une augmentation de 2.2 % par rapport à 1969; les trois principaux éléments ont également enregistré des hausses: le nivellement a avancé de 0.2 %, les couches de base granuleuses de 3.9 % et les couches de surface de 4.2 %. Ces mouvements ont été accompagné d'une augmentation de 5.2 % des dépenses des provinces en construction routière.

À l'exception de la Colombie-Britannique, les augmentations de prix ont frappé toutes les provinces, tant pour ce qui est de l'indice synthétique que des principaux éléments.

Au cours de cette période, l'augmentation des prix qui entrent dans l'indice synthétique a été équivalente à l'augmentation des dépenses de construction. En 1970, les dépenses de construction du secteur public et du secteur privé ont augmenté de 3.6 % par rapport à 1969. De même, les dépenses du secteur public et du secteur privé pour la construction routière se sont accrues de 5.2 %, l'augmentation des dépenses des administrations provinciales s'élevant à 4.3 %.

L'importance relative du rapport "dépenses de construction routière sur dépenses totales de construction" n'a presque pas varié entre 1969 et 1970; la part des dépenses de construction des administrations provinciales est restée légèrement supérieure à 60 %.

(1) Années financières (du 1er avril 1961 au 31 mars 1962, par exemple).
(2) On trouvera une analyse détaillée des problèmes que pose l'estimation du mouvement des prix de la construction routière aux pages vi & vii de la livraison de décembre 1967 de Prices and Price Indexes (no 62-002 au catalogue) et aux pages 9 et 10 de la publication Price Indexes of Highway Construction in Canada (no 62-520 au catalogue).

Road expenditures were financed at still higher bond yields with 9.0 % being the average bond yield in 1970 compared to 8.4 % in 1969.

In Ontario the combined index moved up by 3.4 %. This resulted mainly from a 5.4 % & 6.1 % rise in grading & surface courses indexes respectively. These were then offset by a fractional change of 0.4 % in the granular base courses index. During the year the provincial road expenditure registered an increase of 5.7 % over 1969.

With the exception of British Columbia, provinces in Western Canada showed increases in 1970 over 1969. Saskatchewan showed an increase of 9.7 % in the all items index and similar increases in the major categories. Manitoba recorded an increase of 11.4 % in the all items index. A sharp increase of 18.5 % was recorded in Manitoba's grading index which was reduced by less severe increases of 7.3 % & 4.2 % in the granular base courses & surface courses indexes respectively. British Columbia's all items index showed a decline of 6.1 % with similar declines of 7.1 % & 9.0 % in grading & granular base courses. An increase of 2.4 % was recorded in the surface course index.

During the period, investment in roads declined in British Columbia & Saskatchewan by about 8 %. Manitoba showed an increase of 3.8 %.

In the Atlantic provinces very sharp increases have been recorded in all three provinces. Newfoundland's all items index rose by 24.9 % in 1970 over 1969 with the major categories registering equally substantial increases. New Brunswick recorded an increase of 18.7 % in the all items index & equally high increases in the major categories. Nova Scotia's all items index showed a rise of 8.9 % with about the same increase in the major categories. Provincial expenditures for roads & highways showed sharp increases in 1970 over 1969 for all three Atlantic Provinces.

Les dépenses de construction routière ont été financées à l'aide d'émissions d'obligations dont le rendement moyen s'élevait à 9.0 % en 1970, contre 8.4 % en 1969.

En Ontario, l'indice synthétique a avancé de 3.4 %. Cette augmentation est en majeure partie attribuable aux augmentations de 5.4 % de l'indice du nivellement et de 6.1 % de l'indice des couches de surface. Ces avances ont elles-mêmes été compensées par une faible variation de 0.4 % de l'indice des couches de base granuleuses. En 1970, les dépenses des provinces en construction routière ont marqué une avance de 5.7 % par rapport à 1969.

À l'exception de la Colombie-Britannique, les dépenses des provinces de l'Ouest ont toutes augmenté entre 1969 et 1970. En Saskatchewan, l'indice synthétique s'est accru de 9.7 % et les principaux éléments ont enregistré des avances du même ordre. Au Manitoba, l'indice synthétique a avancé de 11.4 %, la forte augmentation de 18.5 % de l'indice du nivellement ayant été compensée par des augmentations moins sensibles de l'indice des couches de base granuleuse (7.3 %) et de l'indice des couches de surface (4.2 %). En Colombie-Britannique, l'indice synthétique a fléchi de 6.1 %, l'indice du nivellement de 7.1 % et l'indice des couches de base granuleuses de 9.0 %; par contre, l'indice des couches de surface a avancé de 2.4 %.

En 1970, les dépenses de construction routière ont diminué d'environ 8 % en Colombie-Britannique et en Saskatchewan; au Manitoba, elles ont augmenté de 3.8 %.

Les trois provinces de l'Atlantique ont enregistré de très fortes avances. L'indice synthétique de Terre-Neuve a augmenté de 24.9 % entre 1969 et 1970, les trois principaux éléments ayant considérablement progressé. Au Nouveau-Brunswick, l'indice synthétique s'est accru de 18.7 %; les principaux éléments ont également marqué de fortes avances. En Nouvelle-Écosse, l'indice synthétique a avancé de 8.9 %; les principaux éléments ont enregistré des avances du même ordre. De 1969 à 1970, les dépenses des provinces en construction routière se sont considérablement accrues dans les trois provinces de l'Atlantique.

Industry Selling Price Index: Manufacturing (1961=100)

The industry selling price index (Total manufacturing) moved 0.6 % higher in February to 125.2 from the January index of 124.5. Of the 101 industry indexes included in the Total, 44 were higher, 16 declined and 41 were unchanged.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes were increases recorded in the foods and beverages group, principally for the slaughtering and meat packing industry. Increases in the wood products group resulted from higher prices registered for the sawmills and planing mills industry. More moderate advances occurred in the petroleum and coal products group, and in the paper and allied products group, reflecting higher prices for the petroleum refining and pulp and paper mills industries respectively. Declines during the month were relatively insignificant.

Indices de prix de vente dans l'industrie: Industries manufacturières (1961=100)

L'indice des prix de vente dans l'industrie pour l'ensemble des industries manufacturières a augmenté de 0.6 % pour passer de 124.5 en janvier à 125.2 en février. Pour les 101 industries comprises dans le total, les indices ont été plus élevés dans 44 industries, plus faibles dans 16 et stationnaires dans 41.

Les variations les plus importantes ont été des augmentations dans le groupe des aliments et boissons, plus particulièrement dans les établissements d'abattage et les salaisons. Des augmentations se sont produites dans le groupe des produits du bois par suite de la hausse des prix dans les scieries et les ateliers de rabotage. Des progressions moins fortes ont été enregistrées dans le groupe des produits du pétrole et du charbon et dans celui du papier et des activités connexes, en raison de l'augmentation des prix dans l'industrie du raffinage du pétrole et dans celle de la pâte et du papier. Les diminutions au cours du mois étaient relativement peu importantes.

1) Indexes not available at this level of aggregation. - Indices non disponibles à ce niveau d'agrégation.

The general wholesale index moved up 0.6 % in February to 301.3 from the revised January index of 299.6. It was 5.4 % higher than the February 1971 index of 285.9. Six of the eight major group indexes were higher, while two declined.

The animal products group index advanced 2.8 % in February to 357.4 from 347.6 on higher prices for livestock, fresh and cured meats, and fishery products. A rise of 0.7 % to 418.8 from 415.7 in the wood products group index was mainly attributable to price increases for newsprint. Higher prices for electrolytic lead and refined copper (export sales) resulted in an increase of 0.5 % to 258.8 from 257.4 in the non-ferrous metal products group index. More moderate advances were recorded in the textile products group index to 271.3 from 270.1, the non-metallic mineral products group index to 230.6 from 229.7 and the iron products group index to 321.6 from 321.3.

The vegetable products group index declined 1.2 % to 240.1 from 242.9 on lower prices for sugar and its products and tea, coffee and cocoa. A decrease of 0.4 % to 240.9 from 241.9 in the chemical products group index reflected lower prices for soaps and detergents.

The following table shows some of the more noteworthy changes:

L'indice général des prix de gros a progressé de 0.6 %, passant de 299.6 (indice rectifié) en janvier à 301.3 en février, ce qui représente une hausse de 5.4 % par rapport à l'indice de février 1971 (285.9). Six des huit indices des groupes principaux ont augmenté, tandis que deux ont diminué.

L'indice des produits d'origine animale a avancé de 2.8 en février, passant de 347.6 à 357.4, en raison de la hausse des prix du bétail, des viandes fraîches, des viandes salées ou fumées et des produits de la pêche. L'indice des produits du bois a augmenté de 0.7 %, passant de 415.7 à 418.8, par suite surtout de la hausse du prix du papier journal. Des prix plus élevés pour le plomb électrolytique et le cuivre affiné (ventes à l'exportation) ont entraîné une augmentation de 0.5 (257.4 à 258.8) de l'indice des produits métalliques non ferreux. Des hausses moins prononcées ont été enregistrées pour l'indice des produits textiles (270.1 à 271.3), l'indice des produits de minéraux non métalliques (229.7 à 230.6) et l'indice des produits du fer (321.3 à 321.6).

L'indice des produits d'origine végétale a régressé de 1.2 %, passant de 242.9 à 240.1 en raison de la baisse du prix du sucre et de ses dérivés, du thé, du café et du cacao. L'indice des produits chimiques a diminué de 0.4 % (241.9 à 240.9) par suite de la baisse du prix du savon et des détergents.

Le tableau ci-dessous présente les variations les plus importantes:

Commodity group and sub-group — Groupe et sous-groupe de produits	Percentage changes — Variations en pourcentage		
	Feb. — 1972 — Fév. Jan. — 1972 — Janv.	Feb. — 1971 — Fév. Jan. — 1971 — Janv.	Feb. — 1972 — Fév. Feb. — 1971 — Fév.
Animal products group — Produits d'origine animale	+ 2.8	+ 2.3	+ 10.6
Meats, cured — Viandes salées ou fumées	+ 9.5	— 0.1	+ 12.1
Livestock — Bétail	+ 5.1	+ 5.4	+ 13.9
Fishery products — Produits de la pêche	+ 4.1	+ 1.3	+ 7.0
Meats, fresh — Viandes fraîches	+ 2.7	+ 4.2	+ 11.6
Leather — Cuir	+ 2.5	—	+ 7.8
Eggs — Oeufs	— 13.2	— 5.6	— 3.5
Wood products group — Produits du bois	+ 0.7	+ 0.5	+ 11.6
Spruce — Épinette	+ 6.3	+ 8.6	+ 30.1
Newsprint — Papier journal	+ 0.8	— 0.3	+ 10.3
Building board — Panneaux de construction	— 2.3	+ 0.2	— 6.9
Non-ferrous metal products group — Produits métalliques non ferreux	+ 0.5	— 1.4	+ 1.0
Lead electrolytic — Plomb électrolytique	+ 7.4	—	+ 7.4
Silver — Argent	+ 1.1	— 4.1	+ 1.0
Copper, refined (export sales) — Cuivre affiné (ventes à l'exportation)	+ 0.4	— 3.4	+ 1.3
Vegetable products group — Produits d'origine végétale	— 1.2	— 0.8	— 0.1
Tea, coffee and cocoa — Thé, café et cacao	— 5.7	— 0.9	— 10.9
Sugar and its products — Sucre et des dérivés	— 5.4	— 0.1	+ 29.4
Livestock and poultry feeds — Aliments pour bétail et volaille	— 1.9	— 6.5	+ 2.5
Rubber and its products — Caoutchouc et ses dérivés	— 1.1	— 0.3	+ 0.4
Fruits, fresh — Fruits frais	+ 7.3	+ 6.0	— 12.0

Security Price Indexes (1961=100)

The Investors index of common stock prices rose 2.1 % in February to an all time high of 167.5 from 164.0 in January. Amongst the three major groups, industrials rose 1.6 % to 167.7, utilities eased 0.3 % to 158.6 and finance gained 7.7 % to a record level of 181.7. Within the industrial major groups, construction up 12.0 % to 84.0 registered the largest gain of any of the thirteen sub-groups. Primary metals were up 7.7 % to 100.8, chemicals and printing & publishing each rose 6.7% to 107.1 and 305.3 (an all time high) respectively. Decreases occurred in three of the sub-groups, foods, petroleum and industrial mines. In the utilities major group decreases outnumbered gains 3 to 2; the greatest rise 3.1 % being an increase which pushed pipelines to the highest point it has so far attained. The greatest loss of 3.8 % was for gas distribution. Within finance, both major groups banks and investment & loan continued their upward swing, rising 8.3 % and 5.6 % to 213.8 and 131.6 respectively.

In the same period, the index of mining stock prices rose 5.4 % to 106.5. Golds rose 11.6 % to 101.8 whilst Base Metals increased 2.5 % to 110.0.

Of the two supplementary price indexes, uraniums eased 0.7 % to 154.1 and Primary Oils & Gas dropped 1.7 % to 439.9 from 447.5.

The preferred stock index remained unchanged at 70.3.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, moved up 2.1 % to 282.8 in February from the January index of 277.1. Prices were higher for eleven commodities, lower for four and unchanged for fifteen. Principal changes included increases for spruce lumber, hogs, domestic lead, raw sugar, raw wool, linseed oil, steers, beef hides, raw cotton and fir timber.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets advanced 1.7 % to 277.1 in February from the January index of 272.6. An increase of 2.4 % to 384.1 from 375.2 in the animal products index reflected higher prices for hogs and raw wool on both Eastern and Western markets, and for calves, steers and lambs in the East. Lower prices were shown for eggs and cheesemilk in the East and for lambs and calves in the West. The field products index rose fractionally to 170.1 from 170.0. Prices were higher for potatoes and hay on the Eastern market and for flax and rye in the West. Lower prices were shown for oats and corn in the East.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

Indices des cours des valeurs mobilières (1961=100)

L'indice des cours des actions ordinaires a progressé de 2.1 % en février pour atteindre le sommet sans précédent de 167.5 à comparer à 164.0 en janvier. Parmi les trois grands groupes, les valeurs industrielles ont monté de 1.6 % pour atteindre 167.7, les services publics ont fléchi de 0.3 % pour tomber à 158.6 et les finances ont gagné 7.7 % pour atteindre un niveau record de 181.7. Dans les grands groupes industriels, la construction, qui a augmenté de 12.0 % pour atteindre 84.0, a enregistré le gain le plus élevé parmi les treize sous-groupes. La première transformation des métaux a monté de 7.7 % pour atteindre 100.8, les produits chimiques et l'imprimerie et l'édition ont chacun augmenté de 6.7 % pour atteindre 107.1 et 305.3 (sommet jamais encore atteint) respectivement. Trois des sous-groupes, les aliments, le pétrole et les mines, ont enregistré des diminutions. Dans les services publics, les diminutions ont dépassé les gains dans une proportion de 3 contre 2; la hausse la plus forte (3.1 %) est survenue dans les pipelines qui se sont placés au niveau le plus élevé de leur histoire, et la baisse la plus forte (3.8 %) a été enregistrée par les services de distribution du gaz. Dans les finances, les banques et les placements et prêts ont poursuivi leur marche ascendante en montant de 8.3 % et de 5.6 % pour atteindre 213.8 et 131.6 respectivement.

Au cours de la même période, les cours des titres miniers ont progressé de 5.4 % pour atteindre 106.5. Les aurifères ont monté de 11.6 % pour se placer à 101.8 et les métaux de base, de 2.5 % (110.0).

Chez les deux autres éléments, l'uranium a fléchi de 0.7 % pour tomber à 154.1 et les huiles et gaz primaires, de 1.7 % (de 447.5 à 439.9).

L'indice des actions privilégiées est demeuré inchangé (70.3).

Indice des prix des trentes matières industrielles (1935-39=100)

L'indice des prix des trente matières industrielles, calculé comme moyenne géométrique non pondérée, a progressé de 2.1 % pour atteindre 282.8 en février contre 277.1 en janvier. Les prix de onze marchandises ont monté, ceux de quatre marchandises ont baissé et ceux de quinze autres sont demeurés inchangés. Les principaux changements se sont produits dans le bois d'épinette, les porcs, le plomb canadien, le sucre brut, la laine brute, l'huile de graine de lin, les bouvillons, les peaux de boeuf, le coton brut et le sapin de charpente.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a progressé de 1.7 % pour atteindre 277.1 en février (272.6 en janvier). L'indice des produits d'origine animale a monté de 2.4 % (384.1 contre 375.2), avance reflétant la hausse des prix pratiqués pour les porcs et la laine brute sur les marchés de l'Est et de l'Ouest, ainsi que pour les veaux, les bouvillons et les agneaux dans l'Est. Le prix des oeufs et du lait de fromage a baissé dans l'Est et celui des agneaux et des veaux a baissé dans l'Ouest. L'indice des produits de grandes cultures a monté d'une fraction (170.1 contre 170.0). Les prix ont été plus élevés pour les pommes de terre et le foin dans l'Est et pour le lin et le seigle dans l'Ouest. Toutefois, le prix de l'avoine et du maïs a baissé dans l'Est.

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix des livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

The Consumer Price Index for Canada (1961=100) increased 0.4 % to 137.3 in February from 136.7 in January, a rise similar to those recorded between these two months in the previous two years. The main contributor to the latest month's rise was Food which advanced 0.9 %. Other components which registered increases were Housing (0.3 %), Recreation and Reading (1.2 %), and Health and Personal Care (0.6 %). The Clothing index fell (0.3 %), and the Tobacco and Alcohol component declined marginally (0.1 %). The Transportation index remained unchanged in the latest month. Between February 1971 and February 1972, the All-Items index increased 4.9 %.

The Food index rose 0.9 % to 137.6 in February from 136.4 in January. This increase was similar to the January to February advances of the previous two years but was larger than the average of increases between these two months in the 1960's. The level of prices for food consumed at home rose 1.0 % in the latest month, whereas restaurant meal prices increased 0.2 %. Meat, poultry and fresh produce were the main contributors to the advance in the price of food for home consumption but all major elements registered increases. The meat, fish and poultry index advanced 2.9 %. Pork prices rose, on average, 7.7 %, with increases of over 10 % registered for rib chops, shoulder roast and bacon. The retail price of beef rose 1.7 % with all beef cuts contributing to the advance, while chicken prices moved up 2.4 %. Since February 1971, the meat, fish and poultry index rose 10.7 %, as poultry prices stood almost 15 % above their level of a year earlier, and pork and beef prices rose over 13 % and 10 % respectively in the same period. In the latest month, the vegetable index advanced 4.8 % because of price increases for most fresh and some canned vegetables. Fruit prices, on average, increased 3.8 % as specials on oranges and grapefruit partially offset higher quotations for most other fruits. In the twelve months since February 1971, vegetable and fruit prices increased 18.7 % and 12.5 % respectively. The bakery and cereal products index advanced 1.2 % in the latest month mainly because of the removal of some earlier bread price specials. The price of home delivered milk rose in a number of cities. Amongst other food items, advances were also recorded for infants' food, soft drinks, jelly powder, margarine and honey, but ground and instant coffee, sugar and jam fell in price. Egg prices fell 15.0 % in the latest month and stood 0.6 % below their level of twelve months previous. However, all major components of the index of food consumed at home recorded advances in the past twelve months, resulting in an average increase of 8.4 %; restaurant meal prices rose 5.0 % in the same period. In February 1972, the total Food index stood 7.9 % above its level of February 1971.

The Housing index rose 0.3 % to 140.9 in February from 140.5 in January solely as a result of a 0.5 % increase in shelter prices. The shelter advance resulted from higher new house prices and increased homeowner and tenant repair charges; rents edged up 0.1 %. No change was recorded in the household operation component mainly because lower furniture prices offset increases for a number of other household items. The decrease in furniture prices reflected scattered seasonal sales on a number of items, and lower quotations were also recorded for household contents insurance in Toronto. However, fuel oil prices rose as increases were reported in St. John's, Halifax, Saint John, Charlottetown and Saskatoon. Among other household items, linoleum, drapery material, woollen blankets, scouring powder, dishes, food-wrap and soap flakes advanced in price. In February 1972, the Housing index stood 4.8 % above its level of February 1971.

L'indice des prix à la consommation pour le Canada (1961=100) est passé de 136.7 en janvier à 137.3 en février, ce qui représente une augmentation de 0.4 %; cette hausse est semblable à celle qui avait été enregistrée à pareille époque les deux années précédentes. La principale cause de cette avance est l'augmentation de 0.9 % de l'indice de l'alimentation. Les autres éléments de l'augmentation sont l'habitation (0.3 %), les loisirs et la lecture (1.2 %) et les soins personnels et de santé (0.6 %). L'indice de l'habillement a fléchi de 0.3 % et celui des tabacs et alcools de 0.1 %. L'indice des transports est demeuré inchangé. Entre février 1971 et février 1972, l'indice synthétique a avancé de 4.9 %.

L'indice de l'alimentation est passé de 136.4 en janvier à 137.6 en février, ce qui représente une avance de 0.9 %. Cette augmentation est semblable aux hausses enregistrées entre janvier et février au cours des deux dernières années mais était supérieur à l'augmentation moyenne entre ces deux mois au cours des années 60. Le prix des aliments consommés à la maison s'est accru de 1.0 % et celui des repas pris au restaurant de 0.2 %. La viande, la volaille et les produits frais ont été les principaux facteurs de l'avance de l'indice des aliments consommés à la maison; cependant tous les autres éléments ont enregistré des augmentations. L'indice de la viande, du poisson et de la volaille a avancé de 2.9 %. Le prix du porc a avancé, en moyenne, de 7.7 %, le prix des côtelettes, de l'épaule à rôti et du bacon ayant avancé de plus de 10 %. Le prix de tous les morceaux de bœuf ayant augmenté, le prix du bœuf au détail a progressé de 1.7 %; le prix du poulet a augmenté de 2.4 %. Depuis février 1971, l'indice de la viande, du poisson et de la volaille a avancé de 10.7 % (le prix de la volaille a avancé d'environ 15 %, celui du porc de plus de 13 % et celui du bœuf de plus de 10 %). En février 1972, l'indice des légumes a avancé de 4.8 % en raison de l'augmentation du prix de la plupart des légumes frais et de certains légumes en conserve. Le prix des fruits a, en moyenne, avancé de 3.8 %, la réduction du prix des oranges et des pamplemousses ayant partiellement compensé l'augmentation du prix de la plupart des autres fruits. Au cours des douze derniers mois, le prix des légumes a avancé de 18.7 % et celui des fruits de 12.5 %. L'indice des produits céréaliers et de boulangerie a avancé de 1.2 %; cette augmentation est en majeure partie attribuable à la suppression de certaines réductions du prix du pain. Le prix du lait livré à domicile a augmenté dans plusieurs villes. Parmi les autres aliments, on enregistre également une augmentation du prix de la nourriture pour bébés, des boissons gazeuses, de la gelée en poudre, de la margarine et du miel; par contre, le prix du café moulu, de café soluble, du sucre et des confitures a diminué. Le prix des oeufs est tombé de 15.0 %, pour s'établir à un niveau de 0.6 % inférieur à celui des douze derniers mois. Par contre, tous les principaux éléments de l'indice des aliments consommés à la maison ont progressé au cours des douze derniers mois, ce qui s'est traduit par une augmentation moyenne de 8.4 % de cet indice; au cours de la même période, le prix des repas pris au restaurant a avancé de 5.0 %. En février 1972, l'indice de l'alimentation était de 7.9 % supérieur à son niveau de février 1971.

L'indice de l'habitation est passé de 140.5 en janvier à 140.9 en février, ce qui représente une augmentation de 0.3 %; cette avance est uniquement attribuable à la hausse de 0.5 % du prix du logement. L'augmentation de l'indice du logement est attribuable à la hausse du prix des maisons neuves et des réparations à la charge des propriétaires et des locataires; les loyers ont augmenté de 0.1 %. L'élément entretien du logement n'a pas varié; cette situation s'explique principalement par le fait que la diminution du prix des meubles a compensé l'augmentation de plusieurs autres articles ménagers. La diminution du prix des meubles provient des soldes saisonniers sur plusieurs articles; on a également enregistré une diminution des primes d'assurances sur biens ménagers à Toronto. Toutefois, le prix du mazout a augmenté du fait des hausses constatées à Saint-Jean (T.-N.), à Halifax, à Saint-Jean (N.-B.), à Charlottetown et à Saskatoon. Parmi les autres articles ménagers, on a enregistré une augmentation du prix du linoléum, du tissu à rideau, des couvertures de laine, de la poudre à récurer, de la vaisselle, des emballages pour aliments et du savon en flacon. En février 1972, l'indice de l'habitation était de 4.8 % supérieur à son niveau de février 1971.

The Clothing index decreased 0.3 % to 129.8 in February from 130.2 in January mainly as the result of seasonal sales on a number of items. Declines were recorded for men's wear (1.0 %), women's wear (0.1 %), children's wear (0.2 %), footwear (0.1 %), and piece goods (0.5 %). The decrease in the men's wear index was mainly attributable to seasonal sales for overcoats, suits, ski parkas and socks, although higher prices were recorded for some items, notably slacks and undershirts. Lower prices for woollen dresses, suits, skirts and hosiery outweighed higher quotations for sweaters, slips and cotton dresses, to decrease the women's wear component. Within children's wear, sale prices were recorded for some items, the most notable being boys' slacks. The footwear index fell marginally because of sales in eastern Canada for women's snow boots, while the piece goods index declined largely as a result of sales in Toronto. Since February 1971, the Clothing index advanced 3.1 %.

L'indice de l'habillement est passé de 130.2 en janvier à 129.8 en février, ce qui représente une diminution de 0.3 %; cette baisse est surtout attribuable aux soldes saisonniers sur plusieurs articles. Ainsi, on a enregistré des diminutions du prix des vêtements pour hommes (1.0 %), des vêtements pour dames (0.1 %), des vêtements pour enfants (0.2 %), des chaussures (0.1 %) et du tissu à la verge (0.5 %). La diminution de l'indice des vêtements pour hommes est en majeure partie imputable aux soldes saisonniers sur les paletots, les costumes, les anoraks de ski et les chaussettes, par contre on a enregistré une augmentation du prix de certains articles et plus particulièrement des pantalons et des maillots de corps. L'indice des vêtements pour dames a diminué, la baisse du prix des robes de laine, des tailleurs, des jupes et des bas ayant compensé l'augmentation du prix des chandails, des jupons et des robes de coton. Au chapitre des vêtements pour enfants, on a enregistré des soldes sur certains articles, notamment sur les pantalons pour garçons. L'indice des chaussures a fléchi en raison des soldes dans l'Ouest du Canada sur les bottes d'hiver pour dames; l'indice du tissu à la verge a diminué en raison des soldes à Toronto. Depuis février 1971, l'indice de l'habillement a avancé de 3.1 %.

The Transportation index was unchanged in February from its January level of 132.3, despite some higher bus fares in Newfoundland and some increased rail fares. In the twelve months to February 1972, train fares advanced over 20 %. In the latest month, no change was recorded in the automobile operation component as marginally higher new car and motor oil prices offset scattered reductions in insurance rates. Between February 1971 and February 1972, the Transportation index increased 3.1 %.

L'indice des transports est demeuré à son niveau de 132.3 malgré l'augmentation du prix des billets d'autobus à Terre-Neuve et de certaines augmentations du prix des billets de chemin de fer. Au cours des douze derniers mois, le prix des billets de chemin de fer a avancé de plus de 20 %. En février 1972, on n'a enregistré aucune variation de l'élément "entretien de l'automobile", la faible augmentation du prix des voitures neuves et de l'huile à moteur ayant compensé les diverses diminutions des primes d'assurance. Entre février 1971 et février 1972, l'indice des transports a avancé de 3.1 %.

The Health and Personal Care index advanced 0.6 % to 147.2 in February from 146.3 in January as a result of increases of 0.7 % and 0.6 % in the personal care and the health care components respectively. Personal care service prices advanced 1.0 % because of scattered rises in women's hairdressing and men's haircut charges across the country; in the twelve months to February 1972, men's haircut prices have increased 10.6 % and women's hairdressing charges 4.3 %. Toiletry items, on average, increased in price 0.4 % as higher quotations for face cream, tooth-brushes, cleansing tissues and sanitary napkins outweighed lower prices for toilet soap. The main contributors to the advance in the health care component were higher prices for a number of pharmaceuticals including prescriptions, antiseptics and vitamins. Dental fees also rose in Vancouver. Since February 1971, the Health and Personal Care index advanced 4.6 %.

L'indice des soins personnels et de santé est passé de 146.3 en janvier à 147.2 en février, ce qui représente une augmentation de 0.6 %; cette hausse est attribuable à l'augmentation de 0.7 % de l'indice des soins personnels et de 0.6 % de l'indice des soins de santé. L'indice des services (soins personnels) a avancé de 1.0 % en raison des augmentations dispersées, des prix demandés par les coiffeurs pour dames et dans plusieurs villes des prix des coupes de cheveux; depuis février 1971 ces deux éléments ont respectivement augmenté de 4.3 % et de 10.6 %. Le prix des articles de toilette a augmenté, en moyenne, de 0.4 %, l'augmentation du prix de la crème de beauté, des brosses à dents, du tissu à démaquillage et des serviettes sanitaires ayant compensé la diminution du prix du savon de toilette. La progression de l'indice des soins de santé est en majeure partie attribuable à la hausse du prix de plusieurs produits pharmaceutiques (y compris les produits de prescription, les antiseptiques et les vitamines). De plus, les honoraires des dentistes ont augmenté à Vancouver. Depuis février 1971, l'indice des soins personnels et de santé a avancé de 4.6 %.

The Recreation and Reading index increased 1.2 % to 138.1 in February from 136.5 in January, mainly as a result of a 3.9 % advance in the price of reading material. This increase reflected higher newspaper subscription rates in Montreal and Thunder Bay, and increased magazine subscription rates caused, in part, by the return from lower Christmas rates. Among recreation items, camera film and processing prices rose 0.4 % while scattered increases in theatre admission charges were recorded in New Brunswick, Ontario, Manitoba and Saskatchewan. In the twelve months to February 1972, the Recreation and Reading index rose 2.4 %.

L'indice des loisirs et de la lecture est passé de 136.5 en janvier à 138.1 en février, ce qui représente une augmentation de 1.2 %; cette avance est en majeure partie attribuable à l'augmentation de 3.9 % de l'élément lecture. Cette augmentation est attribuable à la hausse des tarifs d'abonnement aux journaux à Montréal et Thunder Bay et des tarifs d'abonnement aux revues (celle-ci provient en partie du retour aux prix normaux qui a suivi les diminutions de la période de Noël). Le prix de la pellicule photographique et du développement a avancé de 0.4 %; de même on a enregistré diverses augmentations du prix d'entrée aux cinémas au Nouveau-Brunswick, en Ontario, au Manitoba et en Saskatchewan. Au cours des douze derniers mois, l'indice des loisirs et de la lecture a avancé de 2.4 %.

The Tobacco and Alcohol index declined 0.1 % to 129.6 in February from 129.7 in January as some beer price reductions were recorded in Montreal. Between February 1971 and February 1972, the Tobacco and Alcohol index rose 1.6 %.

L'indice des tabacs et alcools est passé de 129.7 en janvier à 129.6 en février, ce qui représente une diminution de 0.1 %; cette baisse est attribuable à la diminution du prix de la bière à Montréal. Entre février 1971 et février 1972, l'indice des tabacs et alcools a avancé de 1.6 %.

Consumer price index items, when classified by commodities and services offer another view of the incidence of the change in prices. Between January and February, the 0.9 % increase in food prices was the main contributor to the advance of 0.5 % in the total commodities index; the services index rose 0.3 % over

Si l'on classe les articles qui entrent dans l'indice des prix à la consommation par bien et service, on obtient une image différente du mouvement des prix à la consommation. Ainsi, le mois dernier, l'augmentation de 0.9 % du prix des aliments a été le principal facteur de l'avance de 0.5 % de l'indice des biens; l'indice des services a avancé de 0.3 % au

the same period. Non-durable commodities, excluding food, increased on average 0.2 % as higher newspaper and magazine subscription rates together with increased fuel oil, pharmaceutical and toiletries' prices, outweighed reductions for clothing. On the other hand, durable prices, on average, declined marginally as a result of lower furniture prices. The rise in service prices was chiefly attributable to higher men's haircut and women's hairdressing charges, dentist fees, train and bus fares, and theatre admission prices.

cours de la même période. L'indice des biens non durables (sauf les aliments) a avancé en moyenne de 0.2 %, l'augmentation des tarifs d'abonnement aux journaux et aux revues et la hausse du prix de l'huile à moteur, des produits pharmaceutiques et des articles de toilette ayant compensé la diminution du prix des vêtements. Par contre, les biens durables ont, en moyenne, fléchi légèrement en raison d'une baisse du prix des meubles. L'augmentation du prix des services est en majeure partie imputable à la hausse du prix demandé par les coiffeurs pour hommes et pour dames, des honoraires des dentistes, des billets de train et d'autobus et de l'entrée au cinéma.

TABLE 1. Summary of Current Price Indexes

TABLEAU 1. Récapitulation des indices des prix courants

	Indexes — Indices				Percentage changes — Variation proportionnelle		
	February 1972 Février	January 1972 Janvier	February 1971 Février	January 1971 Janvier	Feb. — Fév. 1972 Jan. — Janv.	Feb. — Fév. 1971 Jan. — Janv.	1972 Feb. — Fév. 1971
Industrial price indexes — Indices des prix dans l'industrie							
Industry selling price index: manufacturing — 1961=100(1) — Indices des prix de vente dans l'indus- trie: industries manufacturières:	125.2	124.5	119.8				
General wholesale index — (1935-39=100)(2) — L'indice général de gros			119.4		+ 0.6	+ 0.3	+ 4.5
Vegetable products — Substances végétales	301.3	299.6	285.9		+ 0.6	+ 0.3	+ 5.4
Animal products — Produits animaux	240.1	242.9	240.3		- 1.2	- 0.8	- 0.1
Textile products — Produits textiles	357.4	347.6	323.1		+ 2.8	+ 2.3	+ 10.6
Wood products — Produits du bois	271.3	270.1	259.0		+ 0.4	+ 0.5	+ 4.7
Iron products — Produits du fer	418.8	415.7	375.3		+ 0.7	+ 0.5	+ 11.6
Non-ferrous metals — Métaux non ferreux	321.6	321.3	313.6		+ 0.1	+ 0.2	+ 2.6
Non-metallic minerals — Minéraux non métalliques	258.8	257.4	256.2		+ 0.5	- 1.4	+ 1.0
Chemical products — Produits chimiques	230.6	229.7	223.5		+ 0.4	+ 0.2	+ 3.2
	240.9	241.9	232.3		- 0.4	+ 0.2	+ 3.7
Canadian farm products — (1935-39=100)(3) — Produits agricoles canadiens							
Eastern — Total — De l'est	277.1	272.6	267.9	262.6	+ 1.7	+ 2.0	(3)
Western — Total — De l'ouest	310.3	305.1	291.2	283.8	+ 1.7	+ 2.6	+ 6.6
Field — Cultures	243.8	240.0	244.5	241.4	+ 1.6	+ 1.3	(3)
Animal — Animaux	170.1	170.0	187.0	188.9	+ 0.1	- 1.0	(3)
	384.1	375.2	348.7	336.3	+ 2.4	+ 3.7	+ 10.2
Selected price indexes — (2) — Certains indices de prix							
Thirty industrial materials — (1935-39=100) — Trente matériaux industriels	282.8	277.1	266.8	264.8	+ 2.1	+ 0.8	+ 6.0
Residential building materials — (1961=100) — Matériaux de construction résidentielle	153.1	151.4	140.1	138.9	+ 1.1	+ 0.9	+ 9.3
Non-residential building materials — (1961=100) — Maté- riaux de construction non résidentielle	139.1	138.2	130.9	130.5	+ 0.7	+ 0.3	+ 6.3
Consumer price indexes — (1961=100) — Indices des prix à la consommation							
All-items — Tous les éléments	137.3	136.7	130.9	130.3	+ 0.4	+ 0.5	+ 4.9
Food — Alimentation	137.6	136.4	127.5	126.5	+ 0.9	+ 0.8	+ 7.9
Housing — Habitation	140.9	140.5	134.5	134.1	+ 0.3	+ 0.3	+ 4.8
Clothing — Habillement	129.8	130.2	125.9	127.0	- 0.3	- 0.9	+ 3.1
Transportation — Transports	132.3	132.3	128.3	126.4	-	+ 1.5	+ 3.1
Health and personal care — Soins personnels et de santé	147.2	146.3	140.7	140.7	+ 0.6	-	+ 4.6
Recreation and reading — Loisirs et lectures	138.1	136.5	134.8	134.2	+ 1.2	+ 0.4	+ 2.4
Tobacco and alcohol — Tabacs et alcools	129.6	129.7	127.6	127.0	- 0.1	+ 0.5	+ 1.6
Security price indexes — (1961=100) — Indices des cours des valeurs mobilières							
Investors index — Total — Indices des portefeuillistes	167.5	164.0	146.7	146.2	+ 2.1	+ 0.3	+ 11.4
Industrials — Total — Industriels	167.7	165.0	151.8	151.6	+ 1.6	+ 0.1	+ 11.0
Industrial mines — Mines industrielles	124.3	126.5	155.8	157.7	- 1.7	- 1.2	- 20.2
Foods — Aliments	132.9	136.2	137.0	136.1	- 2.4	+ 0.7	- 3.0
Beverages — Boissons gazeuses	230.2	222.8	187.0	187.6	+ 3.3	- 0.3	+ 23.1
Textiles and clothing — Textiles et vêtements	146.0	138.6	100.7	95.3	+ 5.3	+ 5.7	+ 45.0
Pulp and paper — Pâte et papier	102.2	98.5	105.7	107.2	+ 3.8	- 1.4	- 3.3
Printing and publishing — Impression et édition	305.3	286.1	242.6	236.3	+ 6.7	+ 2.7	+ 25.8
Primary metals — Métaux primaires	100.8	93.6	100.0	101.4	+ 7.7	- 1.4	+ 0.8
Metal fabricating — Fabrications des métaux	180.8	173.0	150.1	139.0	+ 4.5	+ 8.0	+ 20.5
Non-metallic minerals — Minéraux non métalliques	164.6	158.0	138.1	135.7	+ 4.2	+ 1.8	+ 19.2
Petroleum — Pétrole	251.1	256.6	179.7	179.4	- 2.1	+ 0.2	+ 39.7
Chemicals — Produits chimiques	107.1	100.4	83.6	88.8	+ 6.7	- 5.9	+ 28.1
Construction — Construction	84.0	75.0	57.7	53.6	+ 12.0	+ 7.6	+ 45.6
Retail trade — Commerce de détail	158.6	150.8	114.9	114.4	+ 2.5	+ 0.4	+ 34.6
Utilities — Total — Services publics	158.6	159.1	146.8	147.0	- 0.3	- 0.1	+ 8.0
Pipeline — Pipe-line	193.2	187.4	160.5	160.5	+ 3.1	-	+ 20.4
Transportation — Transport	292.5	290.3	268.1	264.9	+ 0.8	+ 1.2	+ 9.1
Telephone — Téléphone	94.0	95.7	96.2	96.4	- 1.8	- 0.2	- 2.3
Electric power — Énergie électrique	129.6	132.1	111.4	114.1	- 1.9	- 2.4	+ 16.3
Gas distribution — Distribution du gaz	205.4	213.6	218.0	217.4	- 3.8	+ 0.3	- 5.8
Finance — Total — Finances	181.7	168.7	124.4	122.2	+ 7.7	+ 1.8	+ 46.1
Banks — Banques	213.8	197.4	142.2	138.9	+ 8.3	+ 2.4	+ 50.4
Investment and loan — Placements et prêts	131.6	124.6	98.2	97.9	+ 5.6	+ 0.3	+ 34.0
Mining stocks — Actions minier							
General index — Indice général	106.5	101.0	111.3	107.7	+ 5.4	+ 3.3	- 4.3
Gold — Or	101.8	91.2	111.8	105.3	+ 11.6	+ 6.2	- 8.9
Base metals — Métaux communs	110.0	107.3	112.0	110.0	+ 2.5	+ 1.8	- 1.8
Supplementary indexes — Indices supplémentaires							
Uranium — L'uranium	154.1	155.2	169.5	156.7	- 0.7	+ 8.2	- 9.1
Primary oils and gas — Pétrole et gaz primaires	439.9	447.5	425.1	402.4	- 1.7	+ 5.6	+ 3.5

*) Gross weighted, including inter-industry shipments. For explanation see page xiii — Indice pondéré brut comprenant les livraisons inter-industrielles.
 *) Pour toute explication, voir page xiii.
 *) Indexes for 1972 are subject to revision. — Les indices pour 1972 sont sujets à révision.
 *) Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1970 are subject to revision. See notes page 76 for details of Western grain prices. — La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1970 sont sujets à révision. Voir les renvois de la page 76 pour les prix détaillés des grains de l'Ouest.

 TABLEAU 2. INDICE DES PRIX DE VENTE DANS L'INDUSTRIE PAR INDUSTRIE ET PAR CERTAINS PRODUITS

1961=100

Industries and selected commodities(1) Industrie et certains produits(1)		Month — Mensuel												Annual — Annuel
		J	F	M	A	M	J	J	A	S	O	N	D	
Dryers, mechanical, electric — Sécheuses mécaniques, électriques. 16 3320 016	1968	100.0	100.7	100.7	100.7	100.7	100.7	99.8	100.2	100.2	101.6	101.6	101.6	100.7
	1969	101.5	101.5	101.5	102.3	101.5	101.5	102.7	102.9	102.9	102.9	103.1	103.2	102.3
	1970	104.2	104.2	104.2	104.2	104.2	104.2	104.2	102.0	102.0	102.0	102.0	99.9	103.1
	1971	101.0	101.0	101.0	101.8	102.0	102.0	102.0	103.1	103.1	103.4	103.4	103.4	102.3
	1972	103.4	103.4											
Washing machines, domestic, electric, automatic type — Machines à laver, de ménage, électriques, automa- tiques. 16 3320 020	1968	104.2	104.3	104.6	104.6	104.6	104.6	104.7	104.9	105.0	105.4	105.4	105.4	104.8
	1969	106.2	106.2	106.2	106.2	105.5	105.5	106.2	106.4	106.4	106.4	106.9	106.9	106.2
	1970	108.2	108.2	108.2	108.2	108.2	108.2	108.2	106.1	106.1	106.1	106.1	103.5	107.1
	1971	103.3	103.3	103.3	104.3	104.5	104.5	104.5	105.2	105.2	105.4	105.4	105.4	104.5
	1972	105.4	105.4											
Washing machines, domestic, electric, conventional type — Machines à laver, de ménage, électriques, ordinaires. 16 3320 022	1968	105.8	105.8	106.5	106.5	106.2	106.2	106.2	106.2	106.2	106.7	107.2	107.2	106.4
	1969	109.6	109.1	109.1	109.1	109.1	109.1	109.0	109.0	109.0	109.0	109.0	109.0	109.1
	1970	110.6	110.6	110.6	110.6	110.6	110.6	110.6	110.6	110.0	110.0	110.0	110.0	110.4
	1971	109.2	109.2	109.2	112.9	112.9	112.9	112.9	113.5	113.5	113.5	113.5	113.5	112.2
	1972	113.5	113.5											
Home and farm freezers, chest — Congélateurs ménagers et agricoles, horizontaux. 16 3320 028	1968	85.2	85.2	85.2	85.2	83.9	83.9	83.9	83.9	83.9	83.9	83.9	83.9	84.3
	1969	84.1	84.1	84.1	84.1	84.1	84.1	84.1	84.1	84.7	84.7	84.7	84.7	84.3
	1970	84.9	85.7	85.7	85.7	85.7	85.7	85.7	85.7	85.7	85.7	85.7	81.5	85.3
	1971	79.7	80.1	80.2	80.5	80.8	80.2	80.7	80.7	80.7	80.7	80.7	80.7	80.4
	1972	80.4	80.4											
Household refrigerators, electric — Réfrigérateurs électriques, de ménage. 16 3320 029	1968	95.3	95.5	95.4	95.4	95.4	95.6	95.7	95.7	95.7	95.7	95.7	95.7	95.6
	1969	95.7	95.7	95.7	95.7	95.7	95.7	95.7	95.7	95.7	95.7	96.3	95.8	95.8
	1970	97.7	97.9	97.9	97.9	97.9	96.9	96.9	96.9	97.0	97.0	97.0	92.3	96.9
	1971	93.2	93.2	93.2	93.2	93.2	93.2	93.2	93.2	93.2	93.5	93.5	93.5	93.3
	1972	94.0	94.0											
Gas cooking stoves and ranges, domestic — Cuisinières à gaz, de ménage. 16 3320 043	1968	102.1	102.1	102.2	102.2	102.2	102.4	102.4	102.4	102.4	102.4	102.4	101.3	102.2
	1969	101.5	102.8	103.9	103.9	104.0	104.0	104.0	104.0	104.0	104.3	104.3	102.7	103.6
	1970	107.1	106.1	106.2	106.2	106.2	106.2	106.2	106.2	106.2	106.2	106.2	106.2	106.3
	1971	107.7	107.9	108.1	108.1	108.1	109.8	109.8	110.5	111.1	111.1	111.1	111.1	109.5
	1972	111.1	111.1											
Electric cooking stoves and ranges, domestic, over 35 amperes, less than 28" wide — Cuisinières élec- triques, de ménage, plus de 35 ampères, moins de 28 pouces de largeur. 16 3320 049	1968	94.9	94.9	97.0	97.0	97.0	97.0	97.0	97.0	97.0	97.0	97.0	97.0	96.6

	1971	105.1	103.7	105.1	105.1	105.1	105.9	105.9	105.9	106.6	106.6	106.6	106.6	105.7
	1972	106.6	106.6											
Electric cooking stoves and ranges, domestic, over 35 amperes, 28"-32" wide — Cuisinières électriques, de ménage, plus de 35 ampères, 28 à 32 pouces de largeur. 16 3320 050	1968	98.6	98.8	99.0	99.0	99.0	99.1	99.5	99.5	99.5	99.5	99.5	98.9	99.2
	1969	99.8	100.5	101.3	101.3	101.2	100.2	101.2	101.2	101.2	101.4	102.5	98.6	100.9
	1970	102.4	103.5	103.5	103.5	102.6	102.7	103.6	103.6	103.8	102.0	102.3	96.4	102.5
	1971	98.7	101.0	99.8	99.8	101.0	101.4	101.4	102.0	102.2	102.5	102.5	102.8	101.2
	1972	102.2	102.2											
Fuel oil (distillate) heating stoves and space heaters — Poêles à mazout (distillat). 16 3320 057	1968	116.9	118.0	118.5	118.5	118.5	118.5	118.5	118.5	118.5	118.5	118.5	118.5	118.3
	1969	120.2	120.4	121.2	121.2	121.2	121.2	121.2	121.2	121.2	121.2	121.2	121.2	121.0
	1970	123.5	122.5	122.5	122.5	122.5	122.5	122.5	122.5	122.0	122.0	122.5	122.5	122.5
	1971	126.5	126.5	126.5	126.0	126.0	126.0	126.0	130.0	130.4	130.4	130.4	130.4	128.0
	1972	132.5	132.5											
Manufacturers of household radio and television receivers — Fabricants d'appareils électro- ménagers, de radios et de téléviseurs. 16 3340	1968	99.4	99.2	99.3	99.3	99.3	99.1	99.1	98.7	98.5	98.5	98.5	98.5	99.0
	1969	99.6	99.6	99.6	99.6	99.4	99.4	99.6	99.3	99.3	99.3	99.3	99.3	99.4
	1970	99.0	99.0	96.8	96.7	96.7	96.0	95.5	95.1	95.0	95.1	95.1	95.1	96.3
	1971(2)	92.1	92.1	92.1	91.7	91.7	92.3	91.9	91.8	91.8	91.7	91.8	90.8	91.8
	1972	90.9	90.5											
Radio and phonograph combinations, multiband, console — Radio-phonographe, combinés, à bandes multiples, console. 16 3340 013	1968													
	1969													
	1970													
	1971	110.7	110.7	110.7	106.9	106.9	109.0	109.4	109.4	109.5	109.5	109.5	109.5	109.3
	1972	110.0	106.7											
T.V. receiving sets, portables, black and white 19" and over — Téléviseurs portatifs, en noir et blanc 19 pouces et plus. 16 3340 019	1968	96.0	95.6	95.6	95.6	95.6	95.6	95.6	95.0	94.8	94.8	94.8	94.8	95.3

	1972	124.5	125.2											

(1) Indexes for 1972 are subject to revision. - Les indices pour 1972 sont sujets à révision.

(2) An extensive revision of the weight and price sample (including the incorporation of goods purchased), necessitated by developments in the industry's production pattern since 1961 have resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision approfondie de l'échantillon des poids et des prix (y compris l'intégration des biens achetés), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix industriels:

	Old Series - Ancienne série	New series - Nouvelle série
December - 1970 - Décembre	95.1	92.3
January - 1971 - Janvier	95.1	92.1
Average - 1971 - Moyenne	95.2	91.8

TABLEAU 4. Indices des prix de gros de certains produits bruts(1)

(1935-39=100)

Primary commodities — Produits bruts	Months — Mois				Annual averages — Moyenne annuelle		
	Feb. 1972 Fév.	Jan. 1972 Janv.	Feb. 1971 Fév.	Jan. 1971 Janv.	1971	1970	1969
Asbestos, crude — Amiante brut	429.7	429.7	411.6	411.6	420.6	411.6	399.7
Beans, cocoa — Graines de cacao	532.4	532.4	605.5	659.8	582.7	752.7	1,032.8
Beans, coffee — Grains de café	313.3	318.5	362.9	371.2	317.4	391.7	302.6
Coal — Charbon	210.3	210.3	210.3	210.3	210.3	210.3	210.3
Copper, electrolytic — Cuivre électrolytique ...	469.7	469.7	475.5	501.1	492.5	541.6	483.6
Cotton, raw — Coton brut	322.0	318.8	281.1	284.4	292.1	282.0	276.3
Eggs — Oeufs	112.6	129.7	116.7	123.6	122.1	139.6	161.7
Fruits, fresh — Fruits frais	208.7	194.5	237.2	223.7	230.0	229.6	225.8
Grains — Céréales	182.5	183.1	201.1	201.6	192.3	193.7	200.4
Hides and skins — Cuirs et peaux vertes	190.0	185.3	156.9	153.8	157.6	171.4	185.6
Lead, electrolytic — Plomb électrolytique	304.0	283.0	283.0	283.0	283.0	331.0	318.8
Livestock — Bétail	440.5	419.3	386.9	367.0	386.0	396.2	400.3
Nickel	474.1	474.1	474.1	474.1	474.1	474.8	390.6
Onions — Oignons	156.5	159.9	161.4	166.7	180.8	261.6	221.9
Potatoes — Pommes de terre	167.5	164.8	182.4	204.5	194.2	247.2	170.5
Rubber, raw — Caoutchouc brut	113.0	114.8	116.7	120.5	117.4	140.8	179.3
Scrap iron and steel — Déchets de fer et d'acier	261.8	258.3	321.4	326.0	284.2	328.9	250.0
Silver — Argent	387.9	383.5	419.4	437.2	405.6	478.1	497.5
Steers — Bouvillons	596.4	588.1	542.2	507.3	548.8	510.8	496.6
Sugar, raw — Sucre brut	271.7	282.8	186.8	185.8	178.7	160.9	144.1
Tin — Étain	328.4	328.4	317.1	315.3	324.2	349.6	338.0
Wool, raw domestic — Laine brute indigène	151.9	146.2	144.1	150.8	141.1	152.4	169.1
Wool, raw, imported — Laine brute importée	164.4	150.2	134.7	135.5	135.0	149.3	163.0
Zinc, prime, western — Zinc de première qualité, de l'Ouest	378.0	378.0	333.6	333.6	357.6	341.0	326.1

	1972	99.6	100.6											
Cast iron — Fonte	1970	107.8	117.1	122.1	121.7	119.7	108.7	105.4	108.9	107.6	105.7	106.2	106.0	111.4
	1971	106.8	105.7	105.0	105.2	103.5	102.8	100.3	99.4	99.5	99.3	99.6	99.4	102.2
	1972	99.8	100.0											
Shredded — Ferraille déchiquetée	1970													
	1971	..	137.2	129.5	120.3	116.4	114.7	114.5	101.4	109.5	107.3	105.4	103.5	116.4
	1972	103.4	103.6											
Non-ferrous metals scrap — Total — Déchets de métaux non ferreux.	1970	107.8	109.2	109.7	110.1	108.9	102.2	96.9	91.3	85.7	82.7	80.4	78.1	96.9
	1971	74.6	75.6	77.9	81.7	81.0	77.3	77.0	74.8	72.3	70.8	69.3	68.8	75.1
	1972	69.2	70.6											
No. 1 Copper metals scrap — Déchets de cuivre n° 1	1970	111.3	111.8	114.8	119.0	115.0	106.4	94.7	91.2	86.9	82.2	77.4	72.4	98.6
	1971	69.5	71.8	74.4	82.3	81.1	75.9	76.6	74.6	75.1	74.3	72.4	71.2	74.9
	1972	71.4	75.2											
Red brass metal scrap — Déchets de cuivre rouge	1970	110.2	111.0	113.3	116.4	113.8	103.4	95.2	88.6	84.7	80.9	80.5	78.6	98.0
	1971	75.5	75.9	80.5	83.8	83.3	79.8	80.7	80.0	78.8	77.8	75.3	74.5	78.8
	1972	72.9	74.9											
Yellow brass metal scrap — Déchets de cuivre jaune	1970	110.8	110.2	113.8	115.3	112.6	108.2	102.8	98.4	92.1	91.3	90.1	84.3	102.5
	1971	79.4	79.1	81.6	92.6	90.6	86.1	84.7	84.9	84.3	81.5	80.0	78.0	83.6
	1972	81.1	81.9											
Copper metal scrap group — Total — Déchets de cuivre	1970	111.1	111.5	114.2	116.7	114.6	106.3	97.1	92.3	87.6	84.1	81.9	77.9	99.6
	1971	74.6	75.3	78.9	85.6	84.5	80.5	80.0	79.5	79.1	77.5	75.4	74.2	78.7
	1972	74.2	76.5											
Aluminum turnings, skimmings, dross and irony — Tournures, écume, scories.	1970	107.1	110.6	109.7	110.8	110.8	98.9	98.7	84.6	72.2	71.6	71.1	71.1	93.1
	1971	70.5	70.5	71.8	72.1	71.7	64.7	63.6	56.0	48.8	48.4	48.4	49.0	61.3
	1972	49.4	49.4											
New aluminum clips (low copper and dural) — Rognures d'aluminium neuf (à faible teneur en cuivre et duralumin).	1970	96.3	98.2	97.9	97.9	97.8	94.9	94.5	90.8	84.1	81.6	79.4	79.4	91.1
	1971	77.3	76.7	78.7	78.9	78.2	74.3	74.2	70.5	64.9	64.0	63.7	64.0	72.1
	1972	65.3	65.3											
Clean aluminum wire and sheets (1's and 2's) — Fil et tôles minces d'aluminium propres (1 ^{er} et 2 ^e choix).	1970	97.1	96.6	98.5	100.0	99.3	96.7	95.9	93.7	87.5	85.4	82.6	82.6	93.0
	1971	86.6	86.1	87.7	87.7	86.7	83.6	82.6	79.0	73.7	73.2	73.2	73.7	81.1
	1972	74.2	74.2											
Aluminum metal scrap group — Total — Déchets d'aluminium ..	1970	100.8	103.1	102.8	103.3	103.2	96.5	96.2	88.1	79.4	79.0	75.7	75.6	92.0
	1971	74.0	73.9	75.6	75.8	75.3	70.2	69.6	64.2	58.4	57.7	57.5	57.9	67.5
	1972	58.9	58.9											
Zinc metal scrap group — Total — Déchets de zinc	1970	102.8	104.1	111.6	107.8	104.2	103.7	100.6	97.2	92.3	90.5	89.3	89.3	99.4
	1971	88.9	89.3	93.9	102.8	97.7	99.1	94.7	91.3	92.0	90.9	89.1	91.0	93.4
	1972	94.3	94.3											
Battery plates, lugs and lead dross — Plaques, queues de plaques de batteries et rebut de plomb.	1970	111.9	115.3	108.3	99.6	99.1	98.8	97.0	93.9	93.0	85.2	85.0	83.9	97.6
	1971	74.0	79.1	77.6	78.6	78.6	78.3	80.5	80.3	77.0	74.1	71.8	71.4	76.8
	1972	71.6	72.4											
Scrap lead including cable lead — Déchets de plomb, y compris plomb pour câbles.	1970	108.2	108.2	104.7	97.2	96.5	98.3	96.2	95.6	91.1	85.0	81.7	88.9	96.0
	1971	84.5	86.1	77.0	78.0	83.7	95.2	87.7	83.5	82.4	81.1	75.6	80.7	83.0
	1972	79.1	79.9											
Lead metal scrap group — Total — Déchets de plomb	1970	112.2	115.3	108.4	99.9	99.4	99.3	97.4	94.5	93.2	85.7	85.2	84.6	97.9
	1971	75.3	80.1	80.1	79.0	79.5	80.1	81.5	81.0	77.8	75.2	72.6	72.6	77.8
	1972	72.7	73.5

Leather - Cuir	145.7	145.2	140.3	141.7	143.1	138.2	133.5
Rubber and plastic - Caoutchouc et plastique	112.5	118.3	121.9	121.9	123.9	123.7	123.4
Other non-durable - Autres non-durables ..	127.8	127.3	123.9	123.4	125.7	122.0	118.7
Services - Services:							
Total	148.0	147.7	142.0	141.2	144.1	138.7	132.3
Excluding shelter - Total - Sauf logement ..	160.1	159.8	152.5	151.7	155.3	148.9	141.8

(1) For explanation see page 85. - Pour de plus amples explications, voir la page 85.

(2) Includes oranges and orange juice, grapefruit, bananas, grapes, canned pineapple, raisins, tea and coffee. - Oranges et jus d'orange, pamplemousse, bananes, raisins, ananas en conserve, raisins secs, thé et café.

(3) Includes television and radio. - Téléviseur et radio.

TABLE 10. Consumer Price Indexes for Canada — Selected Food Items

TABLEAU 10. Indices des prix à la consommation pour le Canada — Denrées alimentaires choisies

	Feb. 1972 Fév.	Jan. 1972 Janv.	Feb. 1971 Fév.	Jan. 1971 Janv.	1971	1970	1969
<u>Dairy products — Produits laitiers</u>							
Milk, fresh — Lait frais	149.4	149.0	143.2	140.3	145.1	138.9	137.1
Milk, evaporated — Lait condensé	130.9	129.2	112.6	110.1	119.6	112.5	112.9
Powdered skim milk — Poudre de lait écrémé	152.8	152.3	125.8	124.5	139.9	130.3	128.3
Butter, creamery, first grade — Beurre laitier, 1 ^{re} qualité	108.7	108.5	101.7	101.8	104.0	102.3	103.0
Cheese, plain, processed — Fromage ordinaire fondu	149.4	147.3	126.3	124.3	133.4	130.3	127.9
<u>Poultry and eggs — Volaille et oeufs</u>							
Chicken, grade A visc. — Poulet, qualité A, évis- céré	121.7	118.9	103.9	105.7	112.0	107.7	111.2
Turkey, grade A visc. — Dinde, qualité A, éviscérée	100.3	96.7	97.5	95.6	95.8	99.1	101.6
Eggs, fresh, grade A large — Oeufs frais, qualité A gros	85.0	100.0	85.5	88.7	87.3	99.0	109.9
Eggs, fresh, grade A medium — Oeufs frais, qualité A moyens	86.8	103.6	82.6	86.3	86.8	98.6	114.1
<u>Beef — Boeuf</u>							
Sirloin steak — Bifteck de faux filet	150.4	149.4	136.8	135.0	143.4	139.7	139.3
Round steak — Bifteck dans la ronde	160.0	159.0	148.6	142.4	148.0	143.7	135.6
Prime rib roast(1) — Rôti de plat de côtes(1)	153.1	150.6	132.8	130.0	139.9	134.4	133.5
Blade roast(2) — Rôti de haut-côté(2)	152.6	143.8	129.2	126.5	133.1	133.5	131.8
Stewing beef — Boeuf pour ragoût	157.0	152.4	143.4	141.2	145.9	142.1	138.3
Hamburg — Boeuf haché	164.5	160.2	146.2	142.5	148.5	144.8	138.8
Liver, sliced — Foie en tranches	124.2	118.0	119.4	119.4	119.1	132.3	115.3
<u>Pork — Porc</u>							
Rib chops, fresh — Côtelettes fraîches	145.9	130.2	115.6	118.5	122.7	137.2	140.8
Shoulder roast, Boston butt, fresh — Rôti dans l'épaule, soc de Boston, frais	125.2	109.9	99.6	100.8	102.4	120.5	129.9
Sausage, pure pork — Saucisse pur porc	121.8	119.3	118.6	119.1	119.6	127.2	127.4
Bacon, side, fancy, sliced, rind off — Bacon, flanc, de fantaisie, en tranches, sans couenne	86.2	77.2	78.7	82.3	76.4	102.2	101.1(6)
Ham, smoked, boneless(3) — Jambon fumé, désossé(3)	129.0	125.9	118.6	118.4	115.4	135.2	138.4
<u>Other meats — Autres viandes</u>							
Lamb, leg roast — Agneau, gigot	116.9	116.3	111.3	111.9	113.7	114.8	109.1
Veal, loin chops, rib end — Veau, côtelettes, bout de côte	176.2	171.3	164.4	162.6	165.0	162.6	151.5
Wieners or frankfurters — Saucisses de Francfort ...	124.7	121.5	117.0	116.4	119.0	121.5	120.1
Meat loaf, canned, mainly pork — Pain de viande, en conserves, principalement de porc	121.7	122.1	123.1	124.3	123.0	130.7	125.0
<u>Fish — Poisson</u>							
Cod filets, frozen(5) — Filets de morue, conge- lés(5)	182.6	196.3	147.6	146.3	160.6	143.3	135.4
Salmon, canned, fancy pink — Saumon, en boîte, de fantaisie, rose	147.3	146.9	139.9	141.1	143.0	144.1	129.9
<u>Fats and oils — Huiles et corps gras</u>							
Margarine	113.3	112.1	117.0	116.1	114.8	112.1	105.5
Lard, pure — Saindoux pur	118.7	115.5	111.8	112.0	111.4	118.7	103.6
Shortening	121.3	120.3	114.7	113.2	118.7	114.1	109.4
Salad dressing — Vinaigrette	108.7	106.7	102.8	102.9	105.4	104.7	102.7
<u>Cereals and bakery products — Céréales et produits de la boulangerie</u>							
Flour, white, all purpose — Farine blanche, tout usage	134.2	131.9	130.2	127.4	131.3	133.5	134.3
Corn flakes — Flocons de maïs	123.1	124.3	112.8	112.9	119.6	117.4	116.2(7)
Macaroni — Macaronis secs	127.2	126.9	124.9	125.3	126.0	126.4	119.4
Cake mix, white — Mélange à gâteaux, blanc	123.9	124.5	115.7	113.8	118.5	122.1	123.5
Bread, plain, white, wrapped, sliced — Pain blanc uni, enveloppé, coupé	132.3	129.8	127.7	124.7	130.5	125.5	123.8
Soda crackers — Craquelins	116.6	113.6	108.5	107.6	113.1	117.9	116.3
<u>Sugar and sweets — Sucre</u>							
Sugar, granulated — Sucre cristallisé	164.5	164.9	125.4	115.9	126.9	117.2	113.0
Jam, strawberry(4) — Confiture de fraises(4)	121.1	123.2	121.6	121.8	122.7	126.4	120.8
Honey, No. 1, white — Miel n° 1, blanc	144.9	137.4	124.9	125.0	127.0	127.8	125.4

See footnote(s) at end of table. — Voir renvoi(s) à la fin du tableau.

TABLE 10. Consumer Price Indexes for Canada - Selected Food Items - Concluded

TABLEAU 10. Indices des prix à la consommation pour le Canada - Denrées alimentaires choisies - fin

	Feb. 1972 Fév.	Jan. 1972 Janv.	Feb. 1971 Fév.	Jan. 1971 Janv.	1971	1970	1969
Fruits							
Oranges, Californian, medium size (138) - Oranges de Californie, moyennes (138)	101.5	104.4	108.5	106.6	111.9	102.5	100.5
Grapefruit, white, 48's - Pamplemousses blancs, 48	127.8	129.4	119.5	99.6	154.8	140.9	122.3
Bananas, yellow - Bananes jaunes	77.7	70.5	74.0	63.8	76.2	85.7	90.7
Apples, volume seller - Pommes du type le plus vendu	107.6	102.1	103.4	100.6	118.8	112.8	128.0
Strawberries, frozen, fancy - Fraises congelées de fantaisie	121.6	122.5	122.0	122.0	121.6	127.6	122.9
Orange juice, conc., frozen, fancy - Jus d'orange concentré et congelé, de fantaisie	107.5	107.4	92.6	93.3	99.3	101.1	106.9
Apple juice, choice - Jus de pomme de choix	102.3	101.4	100.0	103.0	101.4	107.6	113.0(8)
Orange juice, unsweetened - Jus d'orange non sucré	115.2	114.6	104.2	105.1	108.9	108.6	109.5
Pears, canned, choice - Poires en conserve de choix	124.1	123.7	117.5	117.6	120.7	123.7	121.4
Peaches, canned, choice, halves - Pêches en conserve, de choix, moitiés	139.0	139.5	133.6	131.3	135.5	139.0	140.4
Pineapple, Hawaiian, sliced - Ananas de Hawaï, en tranches	96.5	95.8	94.9	95.5	96.1	100.2	99.8
Raisins, Californian and Australian - Raisins secs de Californie et d'Australie	149.2	149.4	150.3	150.8	150.2	153.0	149.2
Vegetables - Légumes							
Potatoes, No. 1 table - Pommes de terre n° 1 de table	110.4	109.5	109.0	108.4	114.7	134.0	123.1
Onions, No. 1 cooking - Oignons n° 1 à cuire	120.8	121.7	114.3	110.0	128.5	157.4	136.4
Carrots - Carottes	118.6	116.6	90.9	83.4	123.4	109.1	108.8
Turnips, Canada No. 1 - Navet canadien n° 1	126.1	124.6	115.8	115.1	125.1	171.0	141.8
Cabbage - Chou	206.0	178.1	168.1	147.9	150.4	167.4	145.2
Tomatoes, fresh - Tomates fraîches	186.8	157.6	159.9	143.9	162.2	143.7	140.5
Celery stalks, green - Céleri en branche, vert	214.5	217.9	130.1	135.7	141.6	150.3	146.7
Lettuce, head, fresh - Laitue pommée fraîche	224.6	195.9	144.6	138.2	160.8	139.9	158.1
Green peas, frozen, fancy - Pois verts congelés, de fantaisie	120.3	119.2	116.3	116.4	118.1	116.1	115.0
Green beans, fr. cut, frozen - Haricots verts coupés, congelés	104.9	105.1	102.1	101.5	102.7	102.4	102.2
Tomatoes, canned, choice - Tomates en boîte, de choix	132.0	131.4	126.1	126.7	128.9	131.6	126.7
Peas, canned, choice - Pois en boîte, de choix	123.0	120.7	116.0	117.5	117.0	125.7	126.5
Corn, canned, cream, choice - Maïs en boîte, en crème, de choix	120.1	121.2	119.8	117.9	119.9	124.7	123.3
Infants' food, vegetable - Aliments pour bébés, légumes	131.4	129.9	121.9	119.3	124.8	118.9	120.1
Beans, with pork and tomato sauce - Haricots au porc à la sauce tomate	134.3	135.1	128.8	127.2	131.6	129.3	126.8
Soup, vegetable - Soupe aux légumes	100.1	99.7	100.0	97.1	99.3	99.7	97.9
Tomato juice, fancy - Jus de tomate de fantaisie ...	105.6	104.8	96.2	95.9	100.4	100.3	98.9(8)
Beverages - Breuvages							
Tea bags - Thé, sachets, orange pekoe	103.3	102.6	98.2	98.0	100.3	101.9	102.5
Coffee, medium quality - Café, qualité moyenne	126.3	128.0	133.2	133.5	132.2	132.4	115.5
Coffee, instant, dried - Café instantané, séché	112.4	112.9	111.3	111.1	112.3	112.9	107.2
Miscellaneous Groceries - Denrées diverses							
Tomato catsup - Ketchup aux tomates	123.6	124.0	111.4	108.7	115.9	112.6	111.6
Peanut butter, plain - Beurre d'arachides, ordinaire	133.6	132.8	137.5	137.6	136.9	139.8	125.0
Pickles, sweet, mixed - Cornichons sucrés variés ...	130.7	130.1	124.7	123.2	127.7	125.3	121.4
Jelly powders, flavoured - Gelée en poudre aromatisée	129.2	126.7	119.1	114.8	121.5	118.0	117.1

(1) Includes cuts with bone-in and boned and rolled. - Y compris les morceaux avec os, sans os et roulés.

(2) Includes cuts with blade-in and blade removed. - Y compris les morceaux avec ou sans palette.

(3) Indexes based on chain store prices in 7 cities. - Les indices sont fondés sur les prix dans les magasins à succursales multiples de 7 villes.

(4) Indexes based on prices for pectin and pure jam combined. - Les indices sont basés sur les prix de la confiture avec pectine et de la confiture pure.

(5) Indexes based on prices in 16 cities. - Les indices sont fondés sur les prix dans 16 villes.

(6) 1965=100. - 100 en 1965.

(7) 1963=100. - 100 en 1963.

(8) June 1968=100. - 100 en juin 1968.

TABLE 11. Consumer Price Indexes, Regional Cities, 1962-72(1)

TABLEAU 11. Indices des prix à la consommation, agglomérations urbaines, 1962-72(1)

Note: (i) These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. (ii) For inter-city indexes of retail price differentials refer to Table 13. - Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au Tableau 13.

(1) For explanation see page 86. — Pour de plus amples explications, voir la page 86.

(2) The shelter element of regional cities housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and homeownership costs. See also page 87. — Au niveau des agglomérations urbaines, l'élément logement de l'indice de l'habitation varie selon les changements dans les prix des loyers; par contre, au niveau du Canada, l'élément logement tient compte à la fois des changements dans les prix des loyers et dans les frais de possession d'une maison. Voir la page 87.

(3) Includes shelter and household operation. The shelter element of regional city housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and home-ownership costs. See also page 87. — Comprend le logement et l'entretien du ménage. Au niveau des agglomérations urbaines, l'élément logement de l'indice de l'habitation varie selon les changements dans les prix des loyers; par contre, au niveau du Canada, l'élément logement tient compte à la fois des changements dans les prix des loyers et dans les frais de possession d'une maison. Voir aussi la page 87.

Sources for Price Series

Explication des méthodes utilisées et sources
supplémentaires des séries de prix

Industrial Price Indexes

Indices des prix industriels

Industry Selling Price Indexes (1961=100)

Indices des prix de vente dans l'industrie (1961=100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue No. 62-528.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", n° 62-528 au catalogue.

General Wholesale Index (1935-39=100)

Indice général des prix de gros (1935-39=100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue No. 62-501).

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (Vol. 23) (n° 62-501 au catalogue).

Farm Input Price Indexes (1961=100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961=100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services Used by Farmers, 1935-39=100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, Farm Input Price Indexes, 1961=100, Catalogue No. 62-534, and is reproduced in the September 1971 issue of Prices and Price Indexes, Catalogue No. 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, Farm Input Price Indexes, 1961=100, Catalogue No. 62-004, and in the monthly publication Prices and Price Indexes, Catalogue No. 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterpart, and publication has been suspended.

Canadian Farm Products Price Index (1935-39=100)

Wheat prices used in the index are buying prices of the Canadian Wheat Board for Nos. 1, 2 and 3 Manitoba Northern at Thunder Bay. Prices for western oats and barley are also supplied by the Wheat Board and quotations relating to No. 2 C.W., No. 3 C.W. and No. 1 Feed Oats and to Nos. 1 and 2 feed barley are included in the price index. Initial payments are first used in the index calculation and are revised as further payments are announced.

Final payments for the crop year August 1969 - July 1970 were announced on February 4, 1971 for oats and barley, and on June 17, 1971 for wheat.

Indices de prix des entrées dans l'agriculture (1961=100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961=100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39=100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série Farm Input Price Indexes, 1961=100 (n° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans Prices and Price Indexes de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel Farm Input Price Indexes, 1961=100 (n° 62-004) et dans le bulletin annuel Prices and Price Indexes (n° 62-002).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de le publier.

Indice des prix des produits agricoles canadiens (1935-39=100)

Les prix du blé canadien sur lesquels on se base pour calculer l'indice sont les prix payés par la Commission canadienne du blé pour les numéros 1, 2 et 3 Manitoba-nord à Thunder Bay. Les prix de l'avoine et de l'orge de l'Ouest sont également établis par la Commission du blé et les cotes se rapportant au numéro 2 O.C., au numéro 3 O.C. et à l'avoine fourragère n° 1 ainsi qu'à l'orge fourragère nos 1 et 2 font partie de l'indice des prix. Pour calculer l'indice on se sert d'abord des premiers paiements et on les rectifie à mesure que d'autres paiements sont annoncés.

Les paiements définitifs pour la campagne agricole allant d'août 1969 à juillet 1970 ont été annoncés le 4 février 1971 en ce qui concerne l'avoine et l'orge, et le 17 juin en ce qui concerne le blé.

Unit — Unité	Initial and total participation payments 1969-70 and 1970-71 — Paielements initiaux et ensemble des paiements de participation 1969-70 et 1970-71

- (2) Incorporated retroactively in revised final indexes August 1969 to July 1970. — Inclus rétroactivement dans les indices finals révisés d'août 1969 à juillet 1970.
- (3) Used in indexes August 1970 to present. — Utilisé dans les indices d'août 1970 jusqu'à présent.
- (4) Not yet announced by Wheat Board. — Pas encore annoncé par la Commission canadienne du blé.

Residential and Non-Residential Building Construction Price Indexes

The fixed-weighted input price indexes of materials and wage rates for residential and non-residential building construction are being published here for the convenience of users (Table 20). A more complete description of the characteristics of the indexes appeared in the May 1970 issue of Prices and Price Indexes, and this explanation is available on request from the Prices Division, as is historical monthly data for the series.

Because the indexes measure the impact of price change on the materials and labour inputs to construction, and not the effects of changes in profit margins or productivity, there is thought to be an upward bias in these indexes as indicators of price change for the output of building construction, or buildings in place. Users are therefore warned to exercise caution in making use of the series, for this purpose. A comparison of these series with the implicit price deflators (1) providing an estimate of price change for the output of the industry, derived from the measurement of gross fixed capital formation in constant dollars, will provide some insight into the effects on the price movement of

Indices des prix de la construction résidentielle et non résidentielle

Les indices à pondération fixe des prix des entrées de matériaux et de salaires dans la construction résidentielle et non résidentielle sont publiés ici pour faciliter la tâche aux utilisateurs (Tableau 20). On trouvera une description plus détaillée des caractéristiques des indices dans Prices and Price Indexes de mai 1970. On peut s'en procurer un exemplaire ainsi que les données mensuelles chronologiques sur cette série en s'adressant à la Division des prix.

Comme les indices mesurent l'influence des variations de prix sur les entrées de matériaux et de main-d'oeuvre du bâtiment plutôt que les répercussions des variations de marges bénéficiaires ou de productivité, on les croit surestimés en tant qu'indicateurs des variations de prix de la construction, ou des bâtiments construits. Les utilisateurs devront donc faire preuve de discernement quant ils se serviront des séries à cette fin. Si l'on compare ces séries avec les facteurs de dégonflement (1) des prix implicites (qui donnent une estimation de la variation du prix pour la production de l'industrie), obtenus en mesurant la formation brute de capital fixe en dollars constants, on aura un aperçu des effets de l'ajustement sur l'évolution des prix des indices à pondération fixe des entrées pour

(1) National Income and Expenditure Division, Statistics Canada.

(1) Division du revenu national et de la défense nationale, Statistique Canada.

adjusting the fixed-weighted input indexes for changes in productivity and profit margins.

During the period from 1926-1966 a special sample of respondents supplied materials prices for the index. As of 1961 this sample has been replaced with prices from the ISPI system(2). The latter are published monthly in Table 2 of this publication.

The Construction wage rate series is based on wage rate material supplied by the Labour Standards Branch, Dept. of Labour, and relates to minimum wages paid on government contracts for construction in a variety of trades and cities.

Users are reminded that the indexes were arithmetically rebased to the year 1961=100 and therefore combining the components with the weights as shown will not provide the composite index provided. Users able to provide their own weights for the components can recombine the components to suit their particular needs.

Price Indexes of Machinery & Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Highway Construction Price Indexes (1961=100) (3)

The Price Indexes of Highway Construction in Canada express prices paid by provincial governments in contracts awarded for highway construction each year, as a percentage of prices paid in 1961. The arithmetic conversion of the indexes to a 1961 time base does not change their percentage movements as compared to the

(2) Industry Selling Price Indexes 1956-1968 Cat. 62-528.

(3) The years refer to fiscal years. Thus 1968 refers to the period April 1, 1968 to March 31, 1969.

tenir compte des variations de productivité et de marges bénéficiaires.

Au cours de la période 1926-1966, un échantillon spécial d'enquêtés a donné les prix pour l'indice. En 1961, on a remplacé cet échantillon par les prix tirés du système I.P.V.I.(2). Ces prix sont publiés par mois dans le Tableau 2 du présent bulletin.

La série consacrée au taux de rémunération dans l'industrie du bâtiment est basée sur les chiffres fournis par la Direction des normes du travail du ministère du Travail; elle a trait au salaire minimum versé aux termes de marchés signés avec le gouvernement pour des travaux de construction dans divers corps de métiers et dans diverses villes.

Nous rappelons aux utilisateurs que les indices ont été recalculés sur la base 1961=100 et qu'ils n'obtiendront pas l'indice synthétique fourni en combinant les éléments et les pondérations données. Les utilisateurs qui sont à même de fournir leur propre pondération pour les éléments peuvent procéder à leur propre combinaison adaptée à leurs besoins spécifiques.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente des fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labor Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix des marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de la construction routière (1961=100) (3)

Les indices des prix de la construction routière au Canada représentent les prix payés chaque année par les administrations provinciales au titre des marchés de construction routière, en pourcentages des sommes payées en 1961. La conversion des indices à la base 1961=100 ne modifie pas leur évolution en pourcentages comparativement aux indices publiés

(2) Indices des prix de vente dans l'industrie, 1956-1968, n° 62-528 au catalogue.

(3) Il s'agit d'exercices financiers. 1968 représente donc la période du 1^{er} avril 1968 au 31 mars 1969.

previously published indexes to a 1956=100 time base. Users are warned that an aggregation of the converted major group indexes with the published weights will not yield the published 1961=100 all items indexes. The conversion does not create this problem for a user wishing to reweight the converted major group indexes using weights appropriate to his own purpose.

Base-weighted indexes are published annually and measure, for the period 1956 to 1968, the effect of price change on the cost of specific programmes of highway construction in Canada represented by highway construction contracts of approximately \$50,000 or more awarded by specified provincial governments during the weight-base period. Weights of items in the index, representing the relative importance of units of construction in the year 1956 are held constant. Only the estimates of prices change from year to year, and the indexes thus measure the movement of prices through time. For a more complete statement of the problems of estimating price change for highway construction see pages vi & vii of the December 1967 issue of Prices and Price Indexes, Catalogue 62-002 and pages 9 & 10 of the reference paper Price Indexes of Highway Construction in Catalogue 62-520. The all-items index or its components are useful for planning and budgeting for highway construction programmes, in escalating or up-dating previously costed roadwork, in estimating replacement cost of previously completed roadwork, and as historical measurements of price trends in highway construction.

The indexes do not necessarily reflect the price movements of non-contract construction or maintenance work. The indexes are designed to measure price changes for a fixed programme of highway construction, in each of the seven provinces. Because price levels in the time base-period (1961) varied from province to province the indexes cannot be used to compare price differences between provinces, but only to compare differences in the rate at which prices are changing in the provinces.

Prices contained in the index are not for units of labour and materials as is usually the case in construction price indexes but rather for units of construction work put in place such as an acre of clearing, a cubic yard of earth excavation or a ton of bituminous hot-mix paving. In addition, the index contains prices of some materials, such as culvert pipe, usually supplied to the contractor by the highway departments. Prices of highway construction work are annual weighted averages of bid prices of units of construction in groups of contracts awarded, classified by price-determining characteristics of the contracts and the bid items such as volume of the bid item, type of contract and geographic location. Prices of material items of supply are prices paid by government departments to suppliers.

Price Indexes of Electric Utility Construction

In electric utility terms, the index is designed to provide an estimate of the impact of price change on the cost of materials, labour and equipment used in constructing and equipping electric utilities in a specified base period. The index provides an estimate of how much more, or less it would cost to reproduce the base-period programme of construction in another period, using the same construction technology as in the base period and assuming rates of profit and productivity in construction are the same in both periods.

As the market does not yield comparable selling prices for such unique transactions as, for example, the sale of a transmission line, it was not possible to produce an index of the prices of completed structures. Completed structure indexes would be appropriate for

précédemment et dont la base était 1956=100. Les utilisateurs ne doivent pas s'attendre à ce que le groupement des indices convertis des grands groupes et des pondérations publiées donne l'indice général publié (1961=100). Cette conversion ne pose aucun problème à l'utilisateur qui désire réviser la pondération des indices convertis des grands groupes en utilisant les poids adaptés à ses fins propres.

Les indices pondérés en fonction de la base sont publiés chaque année; ils mesurent, pour la période allant de 1956 à 1968, l'influence de l'évolution des prix sur le coût des programmes spécifiques de construction de routes au Canada représenté par les marchés de construction de routes d'environ \$50,000 ou plus accordés par certaines administrations provinciales au cours de la période visée par la base de pondération. Les poids des éléments des indices qui représentent l'importance relative des unités de construction en 1956 sont constants. Seules les estimations de prix varient d'une année à l'autre; les indices mesurent donc l'évolution des prix dans le temps. Pour plus de détails sur l'estimation de l'évolution des prix pour la construction routière, se reporter aux pages vi et vii du numéro de décembre de Prices and Price Indexes (n° 62-002 au catalogue de Statistique Canada) et aux pages 9 et 10 du bulletin intitulé Price Indexes of Highway Construction in Canada (n° 62-520 au catalogue de Statistique Canada). L'indice général ou ses éléments servent à la planification et à la budgétisation des programmes de construction routière, à indexer ou à mettre à jour les prix de travaux de routes effectués précédemment, à estimer le coût de remplacement des travaux routiers achevés précédemment et à mesurer chronologiquement l'évolution des prix de la construction routière.

Les indices ne reflètent pas nécessairement l'évolution des prix de la construction effectuée hors marché ou des travaux d'entretien; ils servent à mesurer les variations de prix pour un programme déterminé de construction routière dans chacune des sept provinces. Au cours de la période qui a servi de base (1961), les niveaux de prix ont varié d'une province à l'autre; aussi, on ne peut utiliser les indices pour comparer des différences de prix entre les provinces mais on peut seulement les employer pour comparer les différences entre taux de variation des prix dans les provinces.

Les prix compris dans l'indice ne se rapportent pas aux unités de travail ni de matériaux comme c'est habituellement le cas dans l'indice des prix de la construction; ils se rapportent plutôt aux unités de travail de construction effectué, comme le défrichement d'une acre de terrain, l'excavation d'une verge cube ou l'épandage à chaud d'une tonne de béton bitumineux. En outre, l'indice comprend le prix de certains matériaux, par exemple, les tuyaux de ponceau fournis habituellement à l'entrepreneur par les ministères de la Voirie. Les prix des travaux de construction routière sont des moyennes pondérées des prix de soumission pour les unités de construction par groupe de marchés classés selon les caractéristiques des marchés qui déterminent le prix et les éléments d'offre tels que le volume de chaque poste, le type de marché et la situation géographique. Les prix des matériaux fournis sont les prix payés par les ministères aux fournisseurs.

Indices des prix à la construction dans les services d'électricité

En ce qui concerne les services d'électricité, l'indice a pour but de fournir une estimation des conséquences des variations de prix sur le coût des matériaux, de la main-d'œuvre et du matériel utilisés dans la construction et l'équipement des services d'électricité au cours d'une période de référence donnée. L'indice sert à mesurer combien il faudrait payer en plus ou en moins pour réaliser un programme de construction identique à celui de la période de référence en utilisant les mêmes techniques de construction et en supposant que les taux de rentabilité et de productivité de la construction soient les mêmes pour les deux périodes.

Comme il est impossible d'obtenir directement sur le marché des prix de vente comparables pour des opérations de caractère aussi unique, par exemple, que la vente d'une ligne de transport d'énergie, Statistique Canada n'a pu établir un indice du prix des installations en place. Un tel indice ne

users wishing either to estimate reproduction costs or to deflate capital formation. For such uses the indexes introduced in this publication have specific shortcomings. Nonetheless, they may be helpful for such purposes provided the users understand the deficiencies. Thus the reader is asked to make particular note of Section III, of Occasional Paper Catalogue 62-526 Price Indexes of Electrical Utility Construction - The Necessity for Compromise and Section XI, (of the same paper) Uses and Limitations. In addition, because particular construction projects are unique, the aggregate indexes will not likely be appropriate to specific projects since they relate to an average mix of materials, labour and equipment derived from a variety of projects in a specific base period. Thus, if the component price indexes and their weights included in the aggregate index presented herein are inappropriate for a particular purpose the user should consider selecting appropriate component indexes from among those published herein. These indexes could then be combined into an aggregate index by utilizing weights derived from the projects or assets to be costed or deflated.

Prices used in the indexes are for the most part selling prices reported monthly by manufacturers for materials or equipment. The price reported is for units and terms of sale representative of the volume sales of the manufacturer. Where sales to electric utilities form a small share of the total sales of the manufacturer, the price reported may not adequately represent the price to the construction trade and others directly involved in constructing and equipping electric utility facilities. In such cases, prices charged other manufacturers or wholesalers have been included in the index. Federal sales tax changes are reflected in the index but no adjustments have been made for provincial tax changes. Until December 1964 wage rate data were supplied by the Federal Department of Labour and represented minimum hourly rates paid to construction workers in major cities employed on federal government contracts. In 1965 union basic wage rates reported by major utilities and some contractors were incorporated into the index. The sample selected provides an estimate of wage rate change for urban own account and contract electric utility construction. Some further improvements will be made to improve the coverage relating to rural non-union work for transmission lines.

Construction has been defined as new construction or major reconstruction for distribution systems, transmission lines and transformation or switching stations. Maintenance and operating costs are excluded. Cost data were supplied by major utilities, relating to own account and to contract construction erected during the last half of the 1950's. Weights were derived from these data which indicated the relative importance of the major inputs to the construction. The components of cost relating to distribution and transmission facilities encompass such items as poles, hardware, conductors, insulators, meters, distribution transformers and expenditures for labour, e.g. - linemen and groundmen. Costs relating to construction equipment such as trucks, and components of equipment operating costs such as tires, gasoline and repairs were also included. Transformation and switching stations encompass some of the items listed above but the most important elements of cost relate to transformers and switching equipment. Expenditures for land and rights-of-way have been excluded.

The term Canadian electric utility has been defined to include municipal as well as nonmunicipal utilities but the majority of the cost data tabulated was derived from the major nonmunicipal utilities. Manufacturers who produce electricity for their own use and who may also sell electricity have been excluded from the cost survey.

serait utile que si l'on désirait obtenir une estimation des sommes qu'il faudrait engager pour réaliser à nouveau un programme de construction identique ou encore pour dégonfler une formation de capital. Les indices publiés ici présentent en ce sens certaines lacunes. Ils peuvent néanmoins servir à de telles fins pourvu que les utilisateurs en comprennent les limites. Les lecteurs peuvent se rapporter aux Sections III et XI de la publication Price Indexes of Electrical Utility Construction (Statistique Canada, 62-526): "The Necessity for Compromise" et "Uses and Limitations". De plus, en raison du caractère unique de chaque projet de construction, l'indice synthétique ne pourra sans doute pas s'appliquer à un projet bien précis car il porte justement sur une moyenne des matériaux, de la main-d'oeuvre et du matériel utilisés dans la réalisation de plusieurs projets au cours d'une période de référence donnée. Ainsi, si les indices détaillés et les poids correspondants qui composent les indices synthétiques présentés ici ne conviennent pas à un usage bien précis, l'utilisateur pourra toujours se servir des autres indices détaillés et construire, à l'aide des coefficients de pondération, les indices de son choix, soit pour évaluer le coût d'un projet, soit pour établir des facteurs de dégonflement.

La plupart des prix des matériaux et du matériel utilisés pour établir les indices sont les prix de vente déclarés mensuellement par les fabricants. Ces prix sont représentatifs des unités de mesure et des conditions de vente valables pour les ventes en grande quantité des fabricants. Lorsque les ventes aux services électriques ne représentent qu'un faible pourcentage du chiffre d'affaires d'un fabricant, il est possible que le prix déclaré ne représente pas de façon satisfaisante le prix consenti aux entreprises en construction et aux autres industries s'occupant directement de construction et d'installation de services d'électricité. Dans ces cas, on a inclus dans l'indice les prix facturés aux autres fabricants ou grossistes. On a tenu compte, dans l'établissement de l'indice, des variations de la taxe de vente fédérale; toutefois, il n'a été fait aucun redressement pour les variations de taxe provinciale. Jusqu'en décembre 1964, les données sur les taux de rémunération étaient fournies par le ministère fédéral du Travail et représentaient le salaire horaire minimum versé aux personnes travaillant au titre d'un marché accordé par le gouvernement fédéral dans certaines grandes villes. En 1965, on fit entrer dans l'indice le salaire de base exigé par les syndicats et déclaré par les principaux services et par certains entrepreneurs. L'échantillon choisi représente donc une estimation des variations du taux de rémunération dans la construction en ville de services électriques pour compte propre ou au titre d'un marché. Certaines améliorations à l'indice sont prévues de façon à l'étendre aux personnes non syndiquées travaillant dans les régions rurales à la construction de lignes de transport d'énergie.

Le terme "construction" a été défini comme étant la construction neuve ou la réparation de réseaux de distribution, de lignes de transport d'énergie, de postes de transformation ou de postes de manoeuvre. L'entretien et les frais d'exploitation ne sont pas compris. Les données sur les prix de revient sont fournies par les principaux services d'électricité et portent sur la construction exécutée pour compte propre ou au titre d'un marché au cours de la deuxième moitié des années cinquante. Les poids tirés de ces données représentent l'importance relative des principaux éléments entrant dans la construction. Les composantes du coût de la distribution et du transport comprennent certains éléments comme les poteaux, la quincaillerie, les conducteurs, les isolateurs, les compteurs, les transformateurs de distribution et les dépenses en main-d'oeuvre (monteurs, personnel de service, etc.). Les dépenses entraînées par le matériel de construction (camions et pièces d'équipement) et les frais d'exploitation (pneus, essence et réparations) sont également inclus. Les postes de transformation et les postes de manoeuvre comprennent certains des éléments ci-dessus; les frais les plus importants sont cependant entraînés par les transformateurs et les appareils de connexion. Les dépenses foncières et les droits de passage ont été exclus.

Par définition, l'expression "service d'électricité canadien" englobe aussi bien les services municipaux que les autres; toutefois, la majeure partie des données de coût ont été tirées des déclarations des services non municipaux. Les fabricants qui produisent de l'électricité destinée à l'autoconsommation et qui peuvent également vendre de l'électricité ont été exclus de cette enquête.

Price Indexes of Hydro-electric Generating Stations

The following additional points may be of assistance to users of the hydro-electric generating stations index which was described in some detail in Statistics Canada Occasional Paper, Catalogue 62-533.

- (a) Wage rate data are derived from a variety of sources but mainly from the Canadian Construction Association surveys of union agreements and from Federal Pay Research Bureau studies of salaries paid professional, technical and clerical personnel. Basic wage rates, excluding fringe benefits, were used in index calculations.
- (b) Prices for ready-mix concrete and for earth and gravels in place have been utilized as replacements for input prices of labour, materials and equipment rental for concrete production and embankments in place.
- (c) Prices are included for some categories of expense not previously included in input price indexes for construction: interest during construction, overhead expense and the provision and operation of temporary camp accommodation.
- (d) Weighting patterns exclude expenditure for ancillary facilities for logging and navigation, permanent houses, etc.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto, Montreal and Canadian stock exchanges. The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the common and mining stock indexes are Thursday's closing quotations as reported in the *Globe and Mail* and the *Montreal Gazette*. For preferred stocks, prices are monthly weighted averages of the daily closing prices in which weights are daily total sales. The price reference base for the indexes is the year 1956 which has been adopted as an interim base for recently developed Statistics Canada indexes. The indexes express prices as a percentage of prices in 1956 and arithmetically converted to the 1961=100 base.

Revised indexes on the base 1956=100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the index, apart from the shift in the price reference base, is the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) have been replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-Metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) have been continued. The major group Utilities is continued but the Pipelines index has been added as a sub-group and the previous Power and

Indices de prix des centrales hydroélectriques

Les points supplémentaires ci-après peuvent aider les utilisateurs de l'indice des centrales hydroélectriques décrit en détail dans le bulletin hors-série de Statistique Canada portant le numéro 62-533.

- a) Les données sur le taux de rémunération proviennent de diverses sources et surtout des enquêtes sur les accords syndicaux de l'Association canadienne de la construction et des études du Bureau de recherche sur les traitements portant sur la rémunération des travailleurs intellectuels, des techniciens et du personnel administratif. Pour le calcul de l'indice, on a utilisé les taux de rémunération de base, avantages sociaux non compris.
- b) Au lieu du prix des entrées de main-d'oeuvre, de matériaux et de location de matériel pour la production de béton et des remblais effectués, on a utilisé le prix du béton préparé et celui de la terre et du gravier en place.
- c) L'indice comprend les prix correspondant à certains postes de dépenses qui n'étaient pas repris auparavant dans les indices de prix des entrées dans la construction: intérêts pendant la construction, frais généraux, fourniture et entretien de barraquements temporaires.
- d) Les facteurs de pondération ne comprennent pas les dépenses affectées aux installations auxiliaires pour l'exploitation forestière et la navigation, les maisons permanentes, etc.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières donnent une mesure dans le temps de l'effet du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un placeur hypothétique (et non pas un spéculateur). Le portefeuille représente des titres des sociétés canadiennes cotées à la Bourse de Toronto, de Montréal et à la Bourse canadienne. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres ordinaires et des titres miniers sont les cours de fermeture de la Bourse du jeudi indiqués dans le *Globe and Mail* et dans la *Montreal Gazette*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles du total des ventes quotidiennes. La base de pondération entre les sous-groupes est l'année 1956. Toutes les séries ont été recalculées sur la base de 1961=100. Les indices sont pondérés d'après le nombre d'actions en circulation.

Les indices révisés sur la base 1956=100 ont été publiés pour la première fois dans la livraison de juin 1962 de ce bulletin. La plus importante modification à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice: mines industrielles, boissons, textiles et habillement, pâtes et papiers, et huiles (sous la désignation de pétrole). Le grand groupe des services d'utilité publique a été conservé mais l'indice des pipe-lines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et

Traction sub-group has been replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A new major group Finance is composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights, which were previously limited to major groups, have been extended to sub-groups. Weights in the index continue to be based on shares outstanding.

For the list of stocks currently included in the Investors Index and Preferred Index, see list below.

traction a été remplacé par deux nouveaux sous-groupes: l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve ci-dessous.

Retail Price Indexes

Consumer Price Index for Canada (1961=100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services of items for which there is a continually measurable market price over time, corresponding to a specific quantity of the item.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index is unlikely to represent closely the experience of any one family within the group nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families - (a) living in cities with over 30,000 population, (b) ranging in size from two adults to two adults with four children, and (c) with annual incomes during 1957 ranging from \$2,500 to \$7,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In 1952, the time base was updated to 1949=100 from 1935-39=100 and, at the same time, weights were revised to reflect family expenditure patterns in 1947-48. A subsequent revision of weights based on 1957 expenditures was introduced at the beginning of 1961 and the time base was revised from 1949=100 to 1961=100 at the beginning of 1969.

Full details on the latest weighting patterns and index base revisions are available in the occasional paper "The Consumer Price Index for Canada 1949=100" - Revision based on 1957 Expenditures", Statistics Canada Catalogue No. 62-518 and in the January 1969 issue of the monthly bulletin, Prices and Price Indexes, Catalogue No. 62-002.

Consumer Price Indexes for Regional Cities (1961=100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). The regional indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada except for their individual weighting systems.

Also, city indexes are not as comprehensive in item content as the Canada consumer price index and may underestimate slightly the degree of price movements occurring. In this connection, the shelter component of

Indices des prix de détail

Indice des prix à la consommation au Canada (1961=100)

L'indice des prix à la consommation sert à mesurer le taux de variation du prix qu'il en coûte pour acheter un "panier" de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" demeure le même; il équivaut tout au moins à une quantité égale de biens et services de qualité égale; de plus, il est constitué de produits pour lesquels on peut toujours trouver sur le marché un prix mesurable et correspondant à une quantité déterminée de ce produit.

L'indice porte sur un groupe étendu mais bien déterminé de familles urbaines et rend compte des variations des prix auxquelles l'échantillon en question a dû faire face. Il est fort peu probable que l'indice représente fidèlement l'expérience d'une famille en particulier; de même, il ne faut pas s'attendre à ce qu'il rende compte des variations des prix auxquelles ont fait face des groupes sensiblement différents par le revenu, la taille de la famille et le lieu de résidence. L'échantillon sur lequel porte l'indice est composé de familles - a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille oscille entre deux adultes et deux adultes avec quatre enfants et c) dont le revenu annuel en 1957 oscillait entre \$2,500 et \$7,000. Pour évaluer l'influence des variations de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation porte sur les variations d'environ 300 articles.

L'indice des prix à la consommation au Canada remonte au début du siècle; depuis lors, on a révisé périodiquement la période de référence et les schémas de pondération. Ainsi, en 1952, la période de référence est passée de 1935-1939=100 à 1949=100; à la même occasion, les poids ont été revus de façon à présenter un reflet de la structure des dépenses des familles en 1947-48. La révision suivante des facteurs de pondération était fondée sur les dépenses des consommateurs en 1957 et fut introduite au début de 1961. Enfin, c'est au début de 1969 qu'on porta la période de 1949=100 à 1961=100.

Le lecteur trouvera de plus amples renseignements sur les dernières révisions du schéma de pondération et de la période de référence dans la publication occasionnelle "The Consumer Price Index for Canada (1949=100) - Revision based on 1957 Expenditures" (n° 62-518) et dans la livraison de janvier 1969 du bulletin mensuel "Prices and Price Indexes" (n° 62-002).

Indices des prix à la consommation dans certaines agglomérations urbaines (1961=100)

Ces indices sont publiés mensuellement dans le présent bulletin (voir Tableau 11). Par leur conception et par les éléments qui les composent, ces indices sont en général similaires à l'indice des prix à la consommation au Canada, seuls leurs coefficients de pondération diffèrent.

Aussi, les indices de prix dans les villes ne représentent pas les prix de façon aussi complète que l'indice des prix à la consommation au Canada et ils peuvent sous-estimer légèrement l'importance des mouvements de prix. C'est ainsi que

the city indexes moves on the basis of changes in rents only, whereas changes in both rents and homeownership costs are included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and all-items indexes for cities have tended to underestimate somewhat the rates of price increase, particularly over longer periods. Studies are under way to incorporate homeownership prices in city indexes.

Each index is designed to measure the influence of changes in retail prices taking place in the localities specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in those particular areas.

In using the city indexes, it should be remembered that they are not indicators of comparative levels of prices as between the cities. That is, they do not in any way indicate whether prices are higher or lower in one city than in another.

For comparisons of retail price differentials between cities see Table 13 of this publication and the relevant explanatory note.

Historical Consumer Price Indexes (1969=100) for "Thunder Bay" and "Quebec City" are available, with explanatory notes on request from Retail Prices Section, Prices Division, Statistics Canada.

Measuring the Purchasing Power of Earnings

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price increase. The adjusted average is \$90.91 ($100.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

l'élément "logement" des indices des villes varie en fonction des changements dans les loyers uniquement, alors que l'indice pour l'ensemble du Canada comprend les loyers et les coûts de propriété. A la suite d'une augmentation des coûts de propriété plus rapide que celle des loyers, les indices de l'habitation et de tous les éléments pour les villes ont tendu à sous-estimer quelque peu les taux de croissance des prix, surtout sur de plus longues périodes de temps. On étudie actuellement l'incorporation des prix de propriété dans les indices des villes.

Chaque indice est conçu de façon à mesurer les conséquences des variations des prix de détail survenues dans les agglomérations en question sur le prix d'un panier constant de biens et de services représentant la consommation d'un groupe représentatif de familles appartenant à ces secteurs.

Le lecteur devra toujours garder en mémoire que ces indices ne sont pas des indicateurs qui permettent de comparer le niveau des prix d'une ville à l'autre et qu'ils n'indiquent en aucune façon si les prix sont plus ou moins élevés dans une ville que dans une autre.

Pour étudier les différences de prix au détail entre les villes, il faut consulter le Tableau 13 de ce bulletin et les notes explicatives qui l'accompagnent.

Les indices chronologiques des prix à la consommation (1969=100) pour Québec et Thunder Bay et les notes explicatives qui les accompagnent peuvent être obtenus de la Section des prix de détail de la Division des prix de Statistique Canada.

Calcul du pouvoir d'achat

Toute variation des prix à la consommation influe directement sur la quantité de biens et de services qu'on peut acheter avec un dollar et par conséquent sur le revenu moyen. Pour mesurer le revenu en tenant compte de la variation des prix à la consommation, on peut déduire du revenu moyen réel le montant proportionnel qui correspond à l'augmentation des prix à la consommation ou ajouter au revenu réel le montant qui équivaut à la diminution des prix à la consommation. Ces moyennes corrigées peuvent ensuite servir à déterminer la quantité de biens et de services qu'on aurait pu acheter grâce à un revenu moyen, les prix à la consommation et les habitudes de consommation n'ayant pas changé. On trouvera ci-dessous des exemples de cette méthode.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B et que dans la même période de temps l'indice des prix à la consommation progresse de 100.0 à 110.0. En raison de l'augmentation de 10 % des prix à la consommation, on n'obtiendra plus autant avec \$1 au cours de la semaine B que pendant la semaine A. De même il serait exagéré de dire que, pour une augmentation de la rémunération de \$80 à \$100 le pouvoir d'achat du salaire hebdomadaire moyen s'est élevé de 25 %. On peut ramener cette augmentation à des proportions plus justes en déduisant du nouveau salaire hebdomadaire moyen l'augmentation des prix à la consommation. La rémunération moyenne corrigée s'établira donc à \$90.91 ($100.00/110.0 \times 100.0$), dont on peut dire qu'elle exprime la rémunération hebdomadaire moyenne de la semaine B en dollars de la semaine A, ou encore qu'elle rend compte du niveau effectif de la rémunération hebdomadaire de la semaine B par rapport à la semaine A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$80.00 and the week B figure of \$90.91. Taking the week A average of \$80.00 as equal to 100.0, the week B index becomes 113.6 ($90.91/80.00 \times 100.0$). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than those received in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the rise of 25% in money wages ($100.00/80.00 \times 100.0$).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual and real wages uses 1961 as a reference year. However, the adjustment made in the foregoing illustration can be applied to any reference level; percentage change between any two periods will be the same regardless of the reference period selected.

Inter-City Retail Price Comparisons

Statistics relating to differences in retail prices between Canadian cities were initially developed for food, and subsequently extended to cover such other elements of the family budget as clothing, transportation, household operation, health and personal care, recreation and reading, and tobacco and alcohol. In all, intercity price comparisons are drawn for commodities and services comprising nearly three-quarters of the budget on which the Consumer Price Index for Canada is currently based. Major omissions are shelter (both rented and owned), domestic utilities (fuel, light and water), and restaurant meals. While recognizing the importance of inter-city differentials in any overall comparison of the general price level being encountered by consumers in different urban centres, the problems inherent in drawing

On peut pousser plus loin les calculs et exprimer à l'aide d'un indice la relation entre le salaire moyen de la semaine A (\$80) et celui de la semaine B (\$90.91). Ainsi, si l'on considère que la rémunération moyenne de \$80 de la semaine A était égale à 100.0, l'indice de la semaine B deviendra 113.6 ($90.91/80.00 \times 100.0$). On pourrait appeler cet indice l'indice de la rémunération hebdomadaire effective; il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6 % de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10 % des prix à la consommation. L'augmentation de 25 % des salaires se ramène donc à une augmentation effective de 13.6 % ($100.0/80.00 \times 100.0$).

Il convient de souligner que, même si les estimations de la rémunération moyenne effective résument assez bien la situation d'un large éventail de travailleurs, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur le revenu porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur le revenu ajustées par l'indice des prix à la consommation (les habitudes de consommation étant "fixes") perdront graduellement de leur valeur. Enfin, il ne faut pas oublier qu'une partie du revenu peut être consacrée à l'épargne et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations du revenu effectif calculées à partir de moyennes du revenu brut peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés et de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente la rémunération tant réelle qu'effective prend pour base l'année 1961. Toutefois, les ajustements illustrés dans les exemples ci-dessus peuvent s'appliquer à tout niveau de référence; la variation proportionnelle entre deux périodes sera en effet identique quelle que soit la période de référence choisie.

Comparaisons entre les prix de détail d'une ville à l'autre

À l'origine, la statistique des différences entre les prix de détail d'une ville du Canada à l'autre a été mise au point pour l'alimentation; par la suite, on l'a étendue à d'autres postes du budget familial tels que l'habillement, les transports, l'entretien du ménage, la santé et les soins personnels, les loisirs et la lecture, et le tabac et l'alcool. Au total, les comparaisons d'une ville à l'autre portent sur des biens et des services constituant près des trois quarts du budget servant actuellement à construire l'indice des prix à la consommation au Canada. Les comparaisons omettent de mentionner principalement le logement (location et frais de possession), les services publics au profit des ménages (combustible, éclairage et eau) et les repas pris au restaurant. Sans vouloir nier l'importance des différences en ce qui concerne le logement dans toute comparaison globale du niveau général

valid comparisons between cities are such as to require a good deal more research. Meanwhile, it is considered that, despite the absence of shelter differentials at this time, publication of retail price comparisons for other elements of the budget will go some distance towards serving the varied needs of users.

Table 13 presents the results of an updating of earlier spatial retail price measurements to May 1969, and broadens the scope of the study to include several more cities. A fuller explanation of the study from which this table is derived is contained in the November 1968 and November 1969 issues of Prices and Price Indexes (Statistics Canada, Catalogue Number 62-002).

The original data base of this study was the wide range of retail price quotations collected in the course of production of the national and urban Consumer Price Indexes. In developing these spatial price comparisons efforts were made to achieve comparability by equating qualities of goods and services and by matching types of retail outlets, as far as possible. Price relationships between pairs of cities were derived and subsequently converted to a common base of Winnipeg prices equalling 100 to facilitate comparisons over the whole range of cities. The updating of these measurements of inter-city retail price differentials was accomplished by application of the relative movement of prices, at the item level in each city, over the intervening periods as derived from the relevant city consumer price indexes. These price relationships at the item level were aggregated on the basis of the Canada urban consumer spending pattern, rather than the patterns applicable to individual cities. While differences in spending patterns exist among cities, the magnitude of these differences in the cities covered is not such as to affect most of the spatial comparisons significantly. Because of the previously mentioned absence of shelter price relationships, which may be of considerable significance in any overall comparison of inter-urban retail price differentials, aggregative indexes beyond major budget groupings are not shown.

It should be noted that the retail prices used in this comparisons, being those faced by consumers, include sales and excise taxes as applicable. Variations between provinces in the scale of sales taxes imposed on a wide range of non-food commodities can be of significance in explaining inter-city price differentials for these items.

While these indexes have been expressed in terms of Winnipeg = 100, the selection of Winnipeg as the base city has no special significance, and the indexes may be expressed on the base of any of the individual cities included.

des prix auxquels les consommateurs doivent faire face dans divers centres urbains, il faut bien dire que les problèmes que comporteraient l'établissement d'une comparaison valable d'une ville à l'autre sont tels qu'ils nécessitent encore pas mal de recherche. Entre-temps, on estime que malgré l'absence actuelle de données sur les différences entre les dépenses de logement, la publication de comparaisons des prix de détail pour d'autres postes du budget permettra de faire de gros progrès en ce qui concerne la satisfaction des besoins variés des utilisateurs.

On trouvera au Tableau 13 le résultat d'une mise à jour de mesures de prix de détail tirées précédemment jusqu'à mai 1969; ce tableau élargit la portée de l'étude en y incorporant plusieurs autres villes. Une explication plus détaillée de l'étude dont le tableau en question est tiré figure dans les livraisons de novembre 1968 et novembre 1969 de Prices and Price Indexes (no 62-002 au catalogue).

Les premières données de base pour la présente étude ont été constituées par l'importante collection de prix de détail recueillie lors de la confection des indices nationaux et urbains des prix à la consommation. Au moment d'établir ces comparaisons géographiques de prix, on s'est efforcé d'assurer la comparabilité en prenant des biens et des services de qualité égale et en assortissant autant que possible les points de vente au détail par type. Les relations de prix entre paires de villes ont été calculées puis converties à la base commune des prix de Winnipeg = 100 afin de faciliter des comparaisons pour l'ensemble de toutes les villes. La mise à jour de ces mesures des différences de prix de détail entre les villes a été assurée grâce à l'extension des mouvements relatifs de prix au niveau de chaque article dans chaque ville aux périodes observées selon le calcul établi à partir de l'indice des prix à la consommation pour la ville en question. Ces relations entre les prix au niveau de l'article ont été agrégées sur la base des habitudes de consommation du citoyen pour l'ensemble du Canada et non pas selon les habitudes de dépense applicables à des villes individuelles. Même s'il existe des différences dans les habitudes de dépense d'une ville à l'autre, l'importance de ces différences en ce qui concerne les villes dont il est question ici ne sont pas suffisantes pour influencer sensiblement sur la plupart des comparaisons géographiques. Du fait de l'absence des relations de prix en ce qui concerne le logement, dont il a déjà été question ci-dessus et qui pourrait avoir une importance considérable chaque fois que l'on voudrait tirer une comparaison globale entre les différences de prix à la consommation au détail d'une ville à l'autre, on ne trouvera ici aucun indice synthétique agrégé au-delà des principales composantes du budget.

Il faut remarquer que les prix de détail ayant servi à la présente comparaison sont ceux que doit payer le consommateur et comprennent donc les taxes de vente et les taxes d'accises qui peuvent s'appliquer. Les différences d'une province à l'autre entre les barèmes de taxe de vente imposés sur une grande variété de biens non alimentaires peut avoir une grande importance pour expliquer les différences de prix d'une ville à l'autre pour les articles en question.

Le fait que ces indices aient été exprimés en prenant Winnipeg = 100 ne signifie pas que le choix de Winnipeg comme ville de référence ait une signification particulière et les indices pourraient être exprimés sur la base de n'importe laquelle des villes qui y figurent.

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961=100)

The industry selling price index (Total manufacturing) moved 0.6 % higher in March to 125.9 from the February index of 125.2. Of the 101 industry indexes included in the Total, 46 were higher, 12 declined and 43 were unchanged.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes in March were increases in the foods and beverages group mainly in response to higher prices registered in the slaughtering and meat packing, fish products and poultry processors industries. Advances in the primary metals group reflected higher price levels in the smelting and refining industry. More moderate increases were recorded in the wood industries, and in the chemical and chemical products groups. Declines in March were relatively insignificant.

NOTES SUR LES PRIX ET LES INDICES DE PRIX

Indice des prix de vente dans l'industrie: Industries manufacturières (1961=100)

L'indice des prix de vente dans l'industrie (ensemble des industries manufacturières) a augmenté de 0.6 % en mars pour s'établir à 125.9 contre 125.2 en février. Sur les 101 indices des prix industriels qui composent le total, 46 indices ont augmenté, 12 ont baissé et 43 sont demeurés stationnaires.

En fonction de la contribution relative au changement global de l'ensemble des indices dans les industries manufacturières, les changements les plus remarquables en mars ont été des augmentations dans le groupe des aliments et des boissons, surtout en raison de la hausse des prix dans les établissements d'abattage et les salaisons ainsi que dans les industries de transformation du poisson et de la volaille. Les augmentations enregistrées dans le groupe de la première transformation des métaux sont attribuables à une hausse des prix dans l'industrie de la fonderie et de l'affinage. Des progressions plus modérées se sont produites dans l'industrie du bois et dans le groupe des produits chimiques et des produits connexes. En mars, les régressions ont été relativement négligeables.

February to March Changes in Industry Indexes

General Wholesale Index (1935-39=100)

The general wholesale index moved up 0.8 % in March to 304.2 from the revised February index of 301.7. It was 6.0 % higher than the March 1971 index of 286.9. The eight major group indexes were higher.

The non-ferrous metal products group index rose 2.4 % in March to 265.1 from 258.8 on higher prices for copper and its products, lead and its products, and domestic zinc. An advance on 1.8 % to 363.9 from 357.4 in the animal products group index reflected price increases for fishery products, fresh meats, livestock, leather, eggs and hides and skins. Higher prices for fertilizer materials, and soaps and detergents were chiefly responsible for an increase of 1.0 % to 243.4 from 240.9 in the chemical products group index. The vegetable products groups index moved up 0.7 % to 241.7 from 240.1 mainly on higher prices for tea, coffee and cocoa, milled cereal foods, grains, raw sugar, and potatoes. An increase of 0.7 % to 273.3 from 271.3 occurred in the textile products group index on price increases for cotton fabrics and cotton yarns. Slight advances were recorded for three major group indexes; non-metallic mineral products to 231.0 from 230.6, wood products to 421.6 from 421.0 and iron products to 322.0 from 321.6.

The following table shows some of the more noteworthy changes:

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros a progressé de 0.8 % en mars pour s'établir à 304.2, contre 301.7 (indice rectifié) en février. Il était de 6.0 % supérieur à l'indice de mars 1971 (286.9). Les indices des huit principaux groupes ont augmenté.

L'indice des produits métalliques non ferreux s'est accru de 2.4 % en mars pour passer de 258.8 à 265.1 en raison de la hausse des prix du cuivre et du plomb et de leurs produits ainsi que du zinc d'origine canadienne. Une augmentation de 1.8 % (de 357.4 à 363.9) enregistrée dans le groupe des produits d'origine animale est attribuable à une hausse du prix des produits de la pêche, de la viande fraîche, du bétail, du cuir, des oeufs et des peaux d'animaux brutes. Une majoration du prix des engrais, du savon et des détergers a été en grande partie responsable de la hausse de 1.0 % (de 240.9 à 243.4) de l'indice des produits chimiques. L'indice des produits d'origine végétale a augmenté de 0.7 % (de 240.1 à 241.7) par suite surtout de la hausse des prix du thé, du café, du cacao, des aliments à base de céréales moulues, du grain, du sucre brut et des pommes de terre. Un accroissement de 0.7 % (de 271.3 à 273.3) s'est produit dans l'indice des prix des matières textiles en raison de la hausse des prix des tissus et des filés de coton. De légères augmentations ont été enregistrées dans l'indice des trois principaux groupes; l'indice des produits minéraux non métalliques est passé de 230.6 à 231.0, celui des produits du bois, de 421.0 à 421.6, et celui des produits du fer, de 321.6 à 322.0.

On trouvera ci-dessous un aperçu des variations les plus importantes:

Commodity group and sub-group — Groupe et sous-groupe de produits	Percentage changes — Variations en pourcentage		
	Mar. — 1972 — Mars Feb. — 1972 — Fév.	Mar. — 1971 — Mars Feb. — 1971 — Fév.	Mar. — 1972 — Mars Feb. — 1972 — Fév.

	+ 2.0	+ 0.1	+ 6.1

Security Price Indexes (1961=100)

The Investors Index of common stock prices rose 0.4 % over February, to 168.1. Amongst the three major groups, industrials rose 1.8 % to an all time high of 170.8, utilities eased 0.6 % to 157.7 and finance fell back 5.2 % to 172.3. Within the thirteen industrial sub-groups gains outnumbered losses 7 to 6, the greatest increase being 6.8 % for the industrial mines index, followed by non-metallic minerals up 4.7 % to 172.2, its highest since September of 1965. Petroleum rose 4.3 % to a record high of 261.9. The beverage index slipped 3.5 % to 222.1 while the remaining sub-groups recorded marginal adjustments. In utilities, transportation edged up 0.9 % to 295.1, telephone remained unchanged at 94.0, and electric power dropped 3.5 % to 125.0. In finance, banks retreated 5.8 % to 201.4 and investment and loan dropped 3.0 % to 127.6.

In the same period, the Mining index rose 9.0 % as Golds rose 3.7 % to 105.6 and Base Metals climbed 11.6 % to 122.8.

Of the two supplementary price indexes Uraniums and Primary Oils and Gas showed increases of 8.8 % and 3.5 % respectively.

The Preferred stock index edged up 0.7 % to 70.8 from February.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, advanced 3.1 % to 291.7 in March from the February index of 282.8. Prices were higher for thirteen commodities, lower for five and unchanged for twelve. Principal changes included increases for beef hides, raw sugar, linseed oil, domestic lead, rosin, domestic zinc, tin, domestic copper, hogs, fir timber and oats, while decreases were recorded for raw rubber and raw wool.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets advanced 1.2 % to 280.4 in March from the February index of 277.1. An increase of 1.2 % to 388.8 from 384.1 in the animal products index reflected higher prices for eggs, lambs and calves on both Eastern and Western markets, for poultry and hogs in the East and for steers in the West. Lower prices were shown for cheesemilk in the East and for raw wool in the West. The field products index advanced 1.1 % to 171.9 from 170.1 on higher prices for potatoes and rye on both markets, for corn in the East and flax and hay in the West. Lower prices were shown for hay and oats in the East.

Indices des cours des valeurs mobilières (1961=100)

L'indices des cours de placement des actions ordinaires a augmenté de 0.4 % par rapport à février pour s'établir à 168.1. Parmi les trois groupes importants, l'indice des valeurs industrielles a progressé de 1.8 % pour atteindre le chiffre record de 170.8, celui des services d'utilité publique a enregistré une légère baisse de 0.6 % pour se chiffrer à 157.7 et celui des finances a décliné brusquement de 5.2 % pour s'établir à 172.3. Parmi les treize sous-groupes industriels, les gains ont surpassé les pertes dans une proportion de 7 contre 6; les augmentations les plus importantes ont été marquées dans les mines industrielles (6.8 %) et dans les minéraux non métalliques où l'indice s'est établi à 172.2, ce qui représente une hausse de 4.7 %, la plus forte depuis septembre 1965. Le pétrole a connu une hausse de 4.3 % et a atteint le niveau record de 261.9. L'indice des boissons a décliné de 3.5 % pour s'établir à 222.1, tandis que les autres sous-groupes ont enregistré des variations négligeables. Dans les services d'utilité publique, les transports ont progressé de 0.9 % pour atteindre 295.1, l'indice des téléphones est demeuré stationnaire à 94.0 et celui de l'énergie électrique a chuté de 3.5 % pour se chiffrer à 125.0. Dans le sous-groupe des finances, les banques ont régressé de 5.9 % pour s'établir à 201.4 et les placements et prêts, de 3.0 % pour atteindre 127.6.

Au cours de la même période, l'indice du cours des titres miniers a progressé de 9.0 % alors que l'or a augmenté de 3.7 % pour s'établir à 105.6 et les métaux communs, de 11.6 % (122.8).

Dans le cas des deux autres indices, l'uranium, ainsi que le pétrole et les gaz primaires, ont marqué des augmentations de 8.8 % et de 3.5 % respectivement.

L'indice des actions privilégiées a augmenté de 0.7 % pour se chiffrer à 70.8 par rapport à février.

Indice des prix de trente produits industriels (1935-39=100)

L'indice des prix de trente produits industriels, calculé sous forme de moyenne géométrique non pondérée, a avancé de 3.1 %, passant de 282.8 en février à 291.7 en mars. Le prix de treize produits a augmenté, celui de cinq produits a diminué et celui des douze autres produits est resté stationnaire. Les principaux changements comprennent une augmentation du prix du boeuf, du sucre brut, de l'huile de lin, du plomb d'origine canadienne, de la colophane, du zinc du Canada, de l'étain, du cuivre du Canada, du porc, du sapin et de l'avoine. Des diminutions ont cependant été enregistrées dans les prix du caoutchouc brut et de la laine crue.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a progressé de 1.2 %, passant de 277.1 en février à 280.4 en mars. L'augmentation de 1.2 % de l'indice des produits d'origine animale, qui passe ainsi de 384.1 à 388.8, est imputable à l'augmentation des prix des oeufs, des agneaux et des veaux dans les marchés de l'Est et de l'Ouest de la volaille et du porc dans les marchés de l'Est et des bouillons dans les marchés de l'Ouest. Le prix du lait de fromagerie a diminué dans l'Est et celui de la laine crue, dans l'Ouest. L'indice des produits de grande culture a augmenté de 1.1 %, passant de 170.1 à 171.9, en raison de la hausse du prix des pommes de terre et du seigle dans les deux marchés, du maïs dans l'Est et du lin et du foin dans l'Ouest. On a constaté une diminution des prix du foin et de l'avoine dans l'Est.

Consumer Price Movements

The Consumer Price Index for Canada (1961=100) rose 0.1 % to 137.4 in March from 137.3 in February. All major components recorded fractional increases except Food, which declined 0.4 %, and Tobacco and Alcohol, which remained unchanged. The Transportation index rose 0.4 %, Clothing increased 0.3 % and Housing moved up 0.2 %. Both the Health and Personal Care and the Recreation and Reading components edged up 0.1 %. Between March 1971 and March 1972, the All-Items index advanced 4.6 %.

The Food index declined 0.4 % to 137.1 in March from 137.6 in February. This downward movement was consistent with the pattern of change between these two months in four of the past five years; the exception being in 1971 when food prices were moving up from an unusual low. In the latest month, the level of prices for food consumed at home decreased 0.4 %, whereas restaurant meal prices rose 0.2 %. Eggs and vegetables were the main contributors to the decline in the price of food for home consumption. Egg prices fell 9.4 % in the latest month, to reach their lowest level since February 1965. Vegetable prices decreased 5.7 % between February and March, but were still at a level 9.5 % higher than a year earlier. In the latest month, lettuce and tomatoes each fell in price by over 20 %; quotations for cabbage and celery were also lower, while higher prices were recorded for carrots, potatoes and canned peas. In contrast, the fruit index advanced 4.4 % between February and March 1972, to a level 12.8 % above that of March 1971. In the latest month, the most notable price increases were registered for grapefruit, apples and canned apple juice. The meat, fish and poultry index moved up 0.7 %, with increases for pork (2.3 %) and poultry (2.6 %); beef prices, on the other hand, declined 0.6 %. An increase in the component for bakery and cereal products mainly resulted from a 0.8 % advance in bread prices, though biscuit and flour quotations were also higher. Among other food items, honey rose in price by 2.8 % since the preceding month marking the twelfth successive monthly advance to attain a level nearly 20 % higher than a year earlier. In the latest month, some price reductions were recorded for sugar, jelly powder and lard while ice cream, salad dressing, margarine and pickle prices registered increases. In the twelve months to March 1972, the Food index advanced 6.9 %.

The Housing index rose 0.2 % to 141.2 in March from 140.9 in February as a result of increases of 0.2 % in both the shelter and the household operation components. Within shelter, the new house index advanced 0.8 % and homeowner repair charges rose 0.4 %; rents, on the other hand, edged up only 0.1 %. The major element in the household operation increase was a 1.8 % advance in fuel oil prices resulting from higher quotations in Ottawa and a number of Quebec cities. This latest rise brought the fuel oil index to a level 11.8 % above that of March 1971. Furniture quotations advanced 0.5 % since the preceding month as price increases for living room and dinette suites, and mattresses outweighed reductions for kitchen sets. The appliance index rose 0.4 % as higher prices for washing machines, automatic dryers, sewing machines, and vacuum cleaners outweighed lower quotations for stoves, and electric irons and frying pans. Among other household operations items, reduced prices were recorded for linoleum, dishes and a number of cleaning supplies, while light bulbs returned to regular prices from earlier sales. In the twelve months since March 1971, the Housing index increased 7 %.

The Clothing index rose 0.3 % to 130.2 in March from 129.8 in February, thus recording the smallest

Mouvements des prix à la consommation

L'indice des prix à la consommation au Canada (1961=100) a augmenté de 0.1 % et est passé de 137.3 en février à 137.4 en mars. Tous les principaux indices se sont légèrement accrus sauf celui de l'alimentation qui a diminué de 0.4 % et celui des tabacs et alcools qui est demeuré stationnaire. L'indice des transports a augmenté de 0.4 %, celui de l'habillement a marqué une avance de 0.3 % et celui de l'habitation a progressé de 0.2 %. L'indice des soins personnels et de santé et l'indice des loisirs et de la lecture ont progressé de 0.1 %. Entre mars 1971 et mars 1972, l'indice synthétique a marqué une avance de 4.6 %.

L'indice de l'alimentation a diminué de 0.4 % et est tombé de 137.6 en février à 137.1 en mars. Ce mouvement régressif s'est manifesté entre ces deux mois dans quatre des cinq dernières années; la seule exception a été 1971, année où le prix des aliments ont augmenté à partir d'un prix exceptionnellement bas. Le mois dernier, le prix des aliments consommés à la maison a diminué de 0.4 %, tandis que le prix des repas pris au restaurant a augmenté de 0.2 %. Les oeufs et les légumes ont été les principaux facteurs de la diminution du prix des aliments consommés à la maison. Le prix des oeufs a baissé de 9.4 % le mois dernier pour atteindre son plus bas niveau depuis février 1965. Le prix des légumes a fléchi de 5.7 % entre février et mars, mais il était encore de 9.5 % supérieur à ce qu'il était un an plus tôt. Le mois dernier, le prix de la laitue et des tomates a diminué de plus de 20 %; le prix du chou et du céleri a également diminué, tandis que les carottes, les pommes de terre et les petits pois en conserve se sont vendus plus cher. Par contre, l'indice des fruits a progressé de 4.4 % entre février et mars 1972 et a atteint un niveau de 12.8 % supérieur à ce qu'il était en mars 1971. Le prix des pamplemousses, des pommes et du jus de pommes en conserve a enregistré la hausse la plus considérable. L'indice de la viande, du poisson et de la volaille a progressé de 0.7 %, suite à une hausse du prix du porc (2.3 %) et de la volaille (2.6 %); par contre le prix du boeuf a diminué de 0.6 %. L'accroissement du prix des produits de boulangerie et des céréales est en grande partie imputable à une hausse de 0.8 % du prix du pain bien que le prix des biscuits et de la farine ait également augmenté. Parmi les autres produits alimentaires, on enregistre une hausse de 2.8 % du prix du miel cette douzième augmentation mensuelle consécutive a porté le prix du miel à un niveau de presque 20 % plus élevé que ce qu'il était un an plus tôt. Le mois dernier, on a enregistré des réductions du prix du sucre, de la gelée en poudre et du saindoux; tandis que la crème glacée, la vinaigrette, la margarine et les pickles ont augmenté de prix. Au cours des douze mois précédant mars 1972, l'indice de l'alimentation a progressé de 6.9 %.

L'indice de l'habitation s'est accru de 0.2 % et a atteint 141.2 en mars comparativement à 140.9 en février, par suite d'une hausse de 0.2 % des éléments logement et entretien du ménage. Dans le cas du logement, le prix des maisons neuves a augmenté de 0.8 % et les frais de réparations à la charge des propriétaires se sont accrus de 0.4 %; les loyers n'ont cependant augmenté que de 0.1 %. Le principal facteur de l'augmentation des frais d'entretien du ménage a été une hausse de 1.8 % du prix du mazout à Ottawa et dans certaines villes du Québec. La récente hausse du prix du mazout en a fait porter l'indice à 11.8 % au-dessus de ce qu'il était en mars 1971. Le prix des meubles a augmenté de 0.5 % par rapport au mois précédent, la hausse du prix des meubles de salle de séjour et de salle à manger et du prix des matelas avant dépassé la baisse du prix des meubles de cuisine. L'indice des appareils ménagers a marqué une avance de 0.4 %, la hausse du prix des machines à laver, des sècheuses automatiques, des machines à coudre et des aspirateurs ayant été plus forte que la baisse du prix des cuisinières, des fers à repasser électriques et des poêles à frire. Parmi les autres articles d'entretien du ménage, le linoléum, la vaisselle et certains produits d'entretien ont diminué de prix, tandis que les ampoules sont revenues à leur prix normal en raison de la fin des soldes. Au cours des douze derniers mois, l'indice de l'habitation a avancé de 4.7 %.

L'indice de l'habillement a marqué une avance de 0.3 % pour passer de 129.8 en février à 130.2 en mars, soit la plus

increase between these two months since 1961. The main contributors to the latest month's rise were advances of 0.9 % for clothing service charges and 0.6 % for footwear prices. Among clothing service items, shoe repair charges advanced 1.3 %, laundry 0.9 %, and dry cleaning 0.8 %. The footwear increase mainly resulted from higher prices for men's and women's street shoes. Increased prices for boys' slacks and infants' diapers were partly responsible for a 0.3 % rise in the children's wear component, while women's wear increased 0.2 % mainly because of higher prices for cotton dresses and pyjamas. No change was recorded in the men's wear index. Between March 1971 and March 1972, the Clothing index increased 2.7 %.

The Transportation index rose 0.4 % to 132.8 in March from 132.3 in February mainly because of a 0.4 % increase in the automobile operation component. Gasoline prices rose 0.7 % chiefly as a result of increases in New Brunswick and Quebec, while new car prices declined marginally. General increases were recorded in automobile repair charges with advances being largely attributable to higher labour costs. Among other automobile operation items, license fees were higher in Manitoba and Alberta, and battery prices rose 1.4 %, while tires dipped 0.8 %. The local transportation index edged up 0.1 % as higher taxi fares in Vancouver and some increased transit fares in Edmonton outweighed some reductions in Quebec City local bus fares. In March 1972, the Transportation index stood 3.1 % above its level of March 1971.

The Health and Personal Care index edged up 0.1 % to 147.4 in March from 147.2 in February. The health care component declined marginally because of the removal of the tax on certain drugs in British Columbia. Among personal care items, men's haircut prices rose 0.5 % between February and March, to a level over 11 % above that of March 1971. The increases in the latest month were recorded in London and Calgary. In the twelve months to March 1972, the Health and Personal Care index increased 4.5 %.

The Recreation and Reading index rose 0.1 % to 138.3 in March from 138.1 in February as a result of a 0.2 % increase in recreation prices. General price advances were registered for television repair (4.1 %) and phonograph records (2.9 %), while price reductions were recorded in a number of cities for stereo combinations (2.4 %) and color television sets (1.6 %). In March 1972, the Recreation and Reading index stood 2.4 % above its level of March 1971.

In March 1972, the Tobacco and Alcohol index was unchanged from its February 1972 level of 129.6 and stood 1.6 % above its level of March 1971.

Consumer price index items, when classified by commodities and services, offer another view of the incidence of the change in prices. While the services index rose 0.3 % between February and March, the total commodities index edged down 0.1 % reflecting the 0.4 % decline in food prices. Prices of non-durable commodities, excluding food, increased on average 0.2 % as a result of higher prices for gasoline, fuel oil, footwear and phonograph records. Durables' prices edged up 0.1 % as increased prices for furniture, automobile batteries and a number of appliances outweighed reductions for color television sets, stereo combinations, linoleum and new cars. The rise in the services index was chiefly attributable to increased automobile, television, and shoe repair charges, as well as higher prices for automobile licenses, men's haircuts, laundry and dry cleaning.

faible augmentation entre ces deux mois depuis 1961. Les éléments qui ont le plus contribué à l'accroissement du mois dernier ont été la hausse de 0.9 % des frais d'entretien des vêtements et la hausse de 0.6 % du prix des chaussures. Au nombre des éléments d'entretien de l'habillement, les frais de réparations des chaussures ont augmenté de 1.3 %, les frais de blanchissage, de 0.9 % et les frais de nettoyage à sec, de 0.8 %. L'accroissement du prix des chaussures est principalement attribuable à la hausse du prix des souliers de ville pour hommes et dames. La hausse du prix des pantalons pour garçons et des couches pour bébés est en partie responsable de l'augmentation de 0.3 % de l'indice des vêtements pour enfants; l'avance de 0.2 % de l'indice des vêtements pour dames est en majeure partie imputable à la hausse du prix des pyjamas et des robes en coton. L'indice des vêtements pour hommes est demeuré stationnaire. Entre mars 1971 et mars 1972, l'indice de l'habillement s'est accru de 2.7 %.

L'indice des transports a augmenté de 0.4 % pour atteindre 132.8 en mars, contre 132.3 en février. Cette hausse est surtout attribuable à une augmentation de 0.4 % des frais de voiture. Le prix de l'essence a progressé de 0.7 %, surtout en raison des hausses enregistrées au Nouveau-Brunswick et au Québec; le prix des voitures neuves a quelque peu diminué. On a enregistré une augmentation générale des frais de réparation des voitures, par suite, surtout, de la hausse du coût de la main-d'oeuvre. Parmi les autres frais de voiture, les frais d'immatriculation ont augmenté au Manitoba et en Alberta; le prix des accumulateurs a augmenté de 1.4 %, tandis que celui des pneus a diminué de 0.8 %. L'indice des transports urbains s'est accru de 0.1 %, alors qu'une hausse du prix des courses en taxi à Vancouver et une légère augmentation du prix des billets de transport en commun à Edmonton ont contrebalancé des réductions du prix des billets de transport urbain à Québec. En mars 1972, l'indice des transports était de 3.1 % plus élevé que ce qu'il était en mars 1971.

L'indice des soins personnels et de santé a progressé de 0.1 %, passant de 147.2 en février à 147.4 en mars. L'élément soins de santé a enregistré une faible baisse, conséquence de la suppression de la taxe sur certains produits pharmaceutiques en Colombie-Britannique. Parmi les soins personnels, le prix des coupes de cheveux pour hommes a augmenté de 0.5 % entre février et mars pour s'établir à un niveau qui était de 11 % plus élevé que celui de mars 1971. Les augmentations du mois dernier ont été enregistrées à London et à Calgary. Entre mars 1971 et mars 1972, l'indice des soins personnels et de santé s'est accru de 4.5 %.

L'indice des loisirs et de la lecture a augmenté de 0.1 % pour atteindre 138.3 en mars, contre 138.1 en février, par suite d'une hausse de 0.2 % des loisirs. Des augmentations générales de prix ont été enregistrées pour la réparation des téléviseurs (4.1 %) et pour les disques (2.9 %); dans certaines villes, on a enregistré une diminution du prix des appareils stéréo (2.4 %) et des téléviseurs couleur (1.6 %). En mars 1972, l'indice des loisirs et de la lecture était de 2.4 % plus élevé qu'en mars 1971.

En mars 1972, l'indice des tabacs et alcools est demeuré stationnaire par rapport à février (129.6) et était de 1.6 % supérieur à celui de mars 1971.

Si l'on classe les articles qui entrent dans l'indice des prix à la consommation par biens et services, on obtient une image différente du mouvement des prix à la consommation. Ainsi, bien que l'indice des services ait augmenté de 0.3 % entre février et mars, l'indice pour l'ensemble des marchandises a diminué de 0.1 % en raison de la baisse de 0.4 % du prix des aliments. Le prix des biens non durables, sauf les aliments, a progressé de 0.2 % en moyenne par suite d'une hausse des prix de l'essence, du mazout, des chaussures et des disques. Le prix des biens durables s'est accru de 0.1 %, l'augmentation du prix des meubles, des accumulateurs de voiture et d'un certain nombre d'appareils ménagers ayant été supérieure à la diminution du prix des téléviseurs couleur, des appareils stéréo, des linoléums et des voitures neuves. L'avance de l'indice des services était surtout attribuable à une hausse des frais de réparation des voitures, des téléviseurs et des chaussures, ainsi qu'à une augmentation des frais d'immatriculation pour voiture et du prix des coupes de cheveux pour hommes, du blanchissage et du nettoyage à sec.

TABLE 1. Summary of Current Price Indexes
TABLEAU 1. Récapitulation des indices des prix courants

	Indexes				Percentage changes		
	Indices				Variation proportionnelle		
	March 1972 — Mars	February 1972 — Février	March 1971 — Mars	February 1971 — Février	Mar. 1972 Feb. 1972 — Mars 1972 Fév. 1972	Mar. 1971 Feb. 1971 — Mars 1971 Fév. 1971	Mar. 1972 Mar. 1971 — Mars 1972 Mars 1971
Industrial price indexes — Indices des prix dans l'industrie							
Industry selling price index: manufacturing — 1961=100(1) — Indices des prix de vente dans l'industrie: industries manufacturières:							
General wholesale index — (1935-39=100)(2) — L'indice général de gros	125.9	125.2	120.3	119.8	+ 0.6	+ 0.4	+ 4.7
Vegetable products — Substances végétales	304.2	301.7	286.9	285.9	+ 0.8	+ 0.3	+ 6.0
Animal products — Produits animaux	241.7	240.1	240.3	240.3	+ 0.7	—	+ 0.6
Textile products — Produits textiles	363.9	357.4	321.3	323.1	+ 1.8	+ 0.6	+ 13.3
Wood products — Produits du bois	273.3	271.3	259.8	259.0	+ 0.7	+ 0.3	+ 5.2
Iron products — Produits du fer	421.6	421.0	381.3	375.3	+ 0.1	+ 1.6	+ 10.6
Non-ferrous metals — Métaux non ferreux	322.0	321.6	313.9	313.6	+ 0.1	+ 0.1	+ 2.6
Non-metallic minerals — Minéraux non métalliques	265.1	258.8	258.8	256.2	+ 2.4	+ 1.0	+ 2.4
Chemical products — Produits chimiques	231.0	230.6	223.7	223.5	+ 0.2	+ 0.1	+ 3.3
	243.4	240.9	233.1	232.3	+ 1.0	+ 0.3	+ 4.4
Canadian farm products — (1935-39=100)(3) — Produits agricoles canadiens							
Eastern — Total — De l'est	280.4	277.1	266.1	267.9	+ 1.2	— 0.7	(3)
Western — Total — De l'ouest	314.8	310.3	288.8	291.2	+ 1.5	— 0.8	+ 9.0
Field — Cultures	245.9	243.8	243.5	244.5	+ 0.9	— 0.4	(3)
Animal — Animaux	171.9	170.1	186.6	187.0	+ 1.1	— 0.2	(3)
	388.8	384.1	345.7	348.7	+ 1.2	— 0.9	+ 12.5
Selected price indexes — (2) — Certains indices de prix							
Thirty industrial materials — (1935-39=100) — Trente matériaux industriels	291.7	282.8	266.8	266.8	+ 3.1	—	+ 9.3
Residential building materials — (1961=100) — Matériaux de construction résidentielle	154.1	153.1	140.8	140.1	+ 0.7	+ 0.5	+ 9.4
Non-residential building materials — (1961=100) — Matériaux de construction non résidentielle	139.6	139.1	132.0	130.9	+ 0.4	+ 0.8	+ 5.8
Consumer price indexes — (1961=100) — Indices des prix à la consommation							
All-items — Tous les éléments	137.4	137.3	131.3	130.9	+ 0.1	+ 0.3	+ 4.6
Food — Alimentation	137.1	137.6	128.2	127.5	— 0.4	+ 0.5	+ 6.9
Housing — Habitation	141.2	140.9	134.8	134.5	+ 0.2	+ 0.2	+ 4.7
Clothing — Habillement	130.2	129.8	126.8	125.9	+ 0.3	+ 0.7	+ 2.7
Transportation — Transports	132.8	132.3	128.8	128.3	+ 0.4	+ 0.4	+ 3.1
Health and personal care — Soins personnels et de santé	147.4	147.2	141.0	140.7	+ 0.1	+ 0.2	+ 4.5
Recreation and reading — Loisirs et lectures	138.3	138.1	135.0	134.8	+ 0.1	+ 0.1	+ 2.4
Tobacco and alcohol — Tabacs et alcools	129.6	129.6	127.6	127.6	—	—	+ 1.6
Security price indexes — (1961=100) — Indices des cours des valeurs mobilières							
Investors index — Total — Indices des portefeuillistes	168.1	167.5	149.5	146.7	+ 0.4	+ 1.9	+ 12.4
Industrials — Total — Industriels	170.8	167.7	154.0	151.8	+ 1.8	+ 1.4	+ 10.9
Industrial mines — Mines industrielles	132.8	124.3	157.1	155.8	+ 6.8	+ 0.8	— 15.5
Foods — Aliments	132.1	132.9	140.3	137.0	— 0.6	+ 2.4	— 5.8
Beverages — Boissons gazeuses	222.1	230.2	187.3	187.0	— 3.5	+ 0.2	+ 18.6
Textiles and clothing — Textiles et vêtements	149.9	146.0	102.4	100.7	+ 2.7	+ 1.7	+ 46.4
Pulp and paper — Pâte et papier	100.1	102.2	100.8	105.7	— 0.2	— 4.6	— 0.7
Printing and publishing — Impression et édition	300.9	305.3	247.4	242.6	— 1.4	+ 2.0	+ 21.6
Primary metals — Métaux primaires	103.6	100.8	101.7	100.0	+ 2.8	+ 1.7	+ 1.9
Metal fabricating — Fabrications des métaux	175.0	180.8	153.4	150.1	— 3.2	+ 2.2	+ 14.1
Non-metallic minerals — Minéraux non métalliques	172.2	164.6	138.4	138.1	+ 4.7	+ 0.2	+ 24.4
Petroleum — Pétrole	261.9	251.1	187.1	179.7	+ 4.3	+ 4.1	+ 40.0
Chemicals — Produits chimiques	106.2	107.1	86.0	83.6	— 0.8	+ 2.9	+ 23.5
Construction — Construction	86.9	84.0	59.3	57.7	+ 3.5	+ 2.8	+ 46.5
Retail trade — Commerce de détail	156.8	154.6	120.5	114.9	+ 1.4	+ 4.9	+ 30.1
Utilities — Total — Services publics	157.7	158.6	148.4	146.8	— 0.6	+ 1.1	+ 6.3
Pipeline — Pipe-line	193.1	193.2	163.9	160.5	— 0.1	+ 2.1	+ 17.8
Transportation — Transport	295.1	292.5	261.5	268.1	+ 0.9	— 2.5	+ 12.8
Telephone — Téléphone	94.0	94.0	96.2	96.2	—	+ 2.3	— 4.5
Electric power — Énergie électrique	125.0	129.6	115.3	111.4	— 3.5	+ 3.5	+ 8.4
Gas distribution — Distribution du gaz	202.0	205.4	219.8	218.0	— 1.7	+ 0.8	— 8.1
Finance — Total — Finances	172.3	181.7	132.5	124.4	— 5.2	+ 6.5	+ 30.0
Banks — Banques	201.4	213.8	152.7	142.2	— 5.8	+ 7.4	+ 31.9
Investment and loan — Placements et prêts	127.6	131.6	102.3	98.2	— 3.0	+ 4.2	+ 24.7
Mining stocks — Actions minier							
General index — Indice général	116.1	106.5	115.2	111.3	+ 9.0	+ 3.5	+ 0.8
Gold — Or	105.6	101.8	111.3	111.8	+ 3.7	— 0.4	— 5.1
Base metals — Métaux communs	122.8	110.0	118.4	112.0	+ 11.6	+ 5.7	+ 3.7
Supplementary indexes — Indices supplémentaires							
Uranium — L'uranium	167.6	154.1	173.6	169.5	+ 8.8	+ 2.4	— 3.5
Primary oils and gas — Pétrole et gaz primaires	455.5	439.9	427.3	425.1	+ 3.5	+ 0.5	+ 6.6

*) Gross weighted, including inter-industry shipments. For explanation see page vi. — Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication, voir page vi.

*) Indexes for 1972 are subject to revision. — Les indices pour 1972 sont sujets à révision.

*) Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1970 are subject to revision. See notes page 76 for details of Western grain prices. — La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1970 sont sujets à révision. Voir les renvois de la page 76 pour les prix détaillés des grains de l'Ouest.

TABLE 2. INDUSTRY SELLING PRICE INDEXES BY INDUSTRY AND SELECTED COMMODITIES
 TABLEAU 2. INDICE DES PRIX DE VENTE DANS L'INDUSTRIE PAR INDUSTRIE ET PAR CERTAINS PRODUITS
 1961=100

Industries and selected commodities(1) Industrie et certains produits(1)	Month - Mensuel												Annual Annuel
	J	F	M	A	M	J	J	A	S	O	N	D	
Linseed oilcake - Tourteaux de graine de lin 1968 01 1350 020 1969 1970 1971 130.2 129.4 129.4 129.4 129.4 129.4 129.4 129.4 129.4 129.4 128.5 128.5 129.4 1972 129.2 129.7 129.7													
Soyabean oilcake - Tourteaux de soja 1968 01 1350 023 1969 1970 141.3 132.3 132.3 124.7 122.9 123.3 130.8 130.0 131.2 123.2 123.7 130.5 128.2 1971 128.9 123.3 122.9 121.9 127.2 130.5 134.1 129.7 123.5 121.7 120.7 123.9 125.7 1972 129.4 129.2 141.2													
Macaroni manufacturers - Fabricants de macaroni 1968 01 1391 1969 1970 126.0 126.0 126.0 126.0 126.0 126.0 126.0 126.0 126.0 126.0 126.0 126.0 126.0 1971 132.3 132.3 132.3 132.3 132.3 132.3 132.3 132.3 132.3 132.3 134.9 134.9 132.7 1972 134.9 134.9 134.9													
Miscellaneous food industries - Industrie d'aliments divers. 1968 01 1392 1969 1970 108.1 107.6 107.8 109.2 109.0 108.3 107.5 108.1 107.8 107.9 107.4 107.7 108.0 1971 110.6 109.7 109.7 110.5 110.6 110.2 111.4 111.4 112.1 112.9 113.8 114.3 111.4 1972 117.1 116.9 117.3 117.0 118.6 119.8 120.9 120.6 121.2 120.6 123.9 124.1 119.4 1972 123.4 122.3 123.3 122.5 122.2 123.5 125.1 122.6 122.4 123.6 123.9 124.1 123.2													
Coffee, roasted - Café torréfié 1968 01 1392 018 1969 1970 118.6 114.3 114.4 118.9 118.9 116.0 116.1 117.2 116.1 117.6 114.0 116.1 116.5 1971 114.0 116.0 116.0 117.8 120.2 117.3 119.8 123.7 122.9 123.5 132.5 132.6 121.4 1972 131.6 138.8 141.1 137.7 139.5 145.4 146.6 148.5 148.5 148.5 148.0 143.6 145.5 1972 144.5 141.2 141.2 143.9 145.4 145.4 146.9 143.9 142.8 143.7 143.1 143.7 145.5													
Coffee, instant, incl. extracts - Café, instantané, y compris extraits. 1968 01 1392 019 1969 1970 108.6 114.1 114.0 108.2 107.6 104.1 112.3 119.4 119.2 121.5 118.1 118.3 113.8 1971 144.4 137.6 137.6 137.6 137.6 139.4 138.4 138.4 138.4 148.8 148.8 148.8 145.5 1972 143.6 146.0 141.5 149.8 142.4 150.0 142.4 142.4 141.2 148.8 148.8 148.8 145.5 1972 141.2 141.2 143.2													
Spices, incl. spice seeds - Épices, y compris graines d'épices. 1968 01 1392 036 1969 1970 114.1 114.1 114.1 113.5 113.5 113.5 113.5 113.5 113.5 113.5 113.5 113.5 113.6 1971 113.4 113.4 113.4 113.4 116.0 119.8 119.8 119.8 119.8 125.0 126.8 126.8 119.0 1972 136.4 136.4 136.4 136.8 136.8 136.8 135.3 136.7 136.7 142.6 142.6 144.0 142.2 1972 141.0 141.9 141.9 141.9 141.9 141.9 142.6 142.6 142.6 142.6 142.6 142.6 142.2													
Powders, jelly - Poudres, gelée 1968 01 1392 053 1969 1970 113.1 113.1 115.4 115.4 115.4 119.7 114.3 114.3 119.2 115.0 114.3 115.4 115.4 1971 120.1 115.2 115.2 113.5 114.0 114.0 114.0 122.5 117.4 120.1 116.9 116.4 1972 119.0 119.0 119.0 122.3 122.3 122.3 118.5 116.8 116.8 125.7 120.2 122.7 1972 117.8 119.8 120.0 122.3 115.8 129.5 131.2 122.4 122.4 122.4 124.6 124.6													
Powders, pudding - Poudres, pouding 1968 01 1392 055 1969 1970 113.7 116.4 121.5 119.5 119.2 123.2 118.7 118.5 124.6 119.5 118.7 119.4 119.4 1971 124.9 117.1 117.1 117.1 117.1 117.1 118.7 118.7 126.2 128.3 130.8 119.8 120.8 1972 118.7 118.7 118.7 117.5 117.5 118.7 118.7 118.2 118.2 118.2 130.0 119.2 119.2 1972 119.0 119.0 118.5 122.4 123.6 134.3 134.3 123.7 136.6 131.2 131.2 131.2 126.4													
Margarine 1968 01 1392 105 1969 1970 102.8 100.5 98.6 100.8 102.8 98.6 97.7 95.4 98.6 95.4 98.6 95.4 98.8 1971 97.7 95.4 95.4 97.7 94.0 93.2 95.8 95.8 94.2 94.5 99.4 95.9 1972 107.5 98.4 98.4 99.3 111.0 113.1 111.8 113.1 113.1 112.3 111.3 108.5 113.0 1972 115.1 115.1 115.1 110.5 112.0 110.2 115.2 110.1 111.1 112.5 114.5 114.5 113.0													
Peanut butter - Beurre d'arachides 1968 01 1392 120 1969 1970 100.1 95.0 95.0 100.1 100.1 100.1 100.1 98.9 96.8 104.6 102.5 99.4 99.4 1971 110.5 111.5 112.8 116.4 114.2 112.2 117.3 118.7 121.2 120.4 118.7 125.0 116.6 1972 124.2 127.7 127.7 129.7 134.2 132.8 132.8 130.1 130.1 130.1 130.1 128.8 129.9 1972 131.4 126.5 131.4 131.4 130.0 130.0 130.0 128.2 127.6 126.7 127.6 126.5 128.9													
Potato chips, frills and similar products - Chips, toutes sortes et produits semblables. 1968 01 1392 137 1969 1970 98.1 98.1 98.1 98.1 98.1 98.1 98.1 98.1 98.1 98.1 98.1 98.1 98.1 1971 107.4 107.4 107.4 107.4 107.4 107.4 107.4 107.4 107.4 107.4 107.4 107.4 107.4 1972 107.6 107.6 107.6 107.6 107.6 107.6 107.6 107.6 107.6 107.6 107.6 107.6 107.6													
Soup mixes - Mélanges à soupe 1968 01 1392 156 1969 1970 95.1 94.1 92.5 92.5 92.5 93.5 93.5 94.6 94.6 94.6 91.0 91.0 93.3 1972 91.0 89.9 91.0													
Corn starch, for industrial uses - Féculé de maïs, pour usage industriel. 1968 01 1392 160 1969 1970 122.8 122.8 122.8 124.8 124.8 124.8 124.8 124.8 124.8 124.8 124.8 124.8 124.8 1971 123.8 123.8 123.8 123.8 123.8 123.8 123.8 123.8 123.8 123.8 123.8 123.8 123.8 1972 134.2 133.6 133.6 133.6 133.6 133.6 133.6 133.6 133.6 133.6 133.6 133.6 133.6 1972 137.2 137.2 137.2 144.2 144.2 144.2 144.2 144.2 144.2 144.2 144.2 144.2 142.5													
Tea, blended, packed - Thé, mélangé, en paquet 1968 01 1392 178 1969 1970 95.3 95.3 95.3 98.8 98.8 101.2 94.3 94.3 94.3 94.3 94.3 94.3 95.9 1971 101.1 99.1 99.1 101.1 101.1 101.1 101.1 101.1 101.1 101.1 101.1 101.1 100.8 1972 99.6 99.6 99.6 99.6 99.6 99.6 99.6 99.6 99.6 99.6 99.6 99.6 98.9 1972 94.2 94.2 103.2 100.4 101.4 105.2 105.2 105.2 105.2 105.2 106.7 106.7 102.7 1972 106.7 103.0 108.5

	1972	124.5	125.2	125.9										

(1) Indexes for 1972 are subject to revision. - Les indices pour 1972 sont sujets à révision.

(2) An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in same condition as purchased), necessitated by developments in the industry's production pattern since 1961 have resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix industriels:

	Old Series Ancienne série	New series Nouvelle série
December - 1970 - Décembre	95.1	92.3
January - 1971 - Janvier	95.1	92.1
Average - 1971 - Moyenne	95.2	91.8

(1) Includes gold. - Y compris l'or. (2) Consists of iron products and non-ferrous metals groups above but excluding gold. - Se compose des groupes éléments des produits du fer et des produits des métaux non ferreux moins l'or. (3) These two series comprise the General Wholesale Index. - Ces deux séries comprennent l'indice général de gros. (4) Excludes gold. - Sauf l'or. (5) All indexes for current year are subject to revision. - Les données de l'année courante sont sujettes à révision.

(1) Final to July 1970. See page 79 for details on Western grain prices and specific publications wherein final indexes or earlier years may be found. — Indices définitifs jusqu'en juillet 1970. Pour des données détaillées sur le prix des céréales de l'Ouest, voir page 79 ainsi que les publications spéciales qui contiennent les derniers indices ou ceux des années précédentes.

(2) All indexes for current year are subject to revision. — Les données de l'année courante sont sujettes à révision.

TABLE 4. Wholesale Price Indexes of Selected Primary Commodities(1)

TABLEAU 4. Indices des prix de gros de certains produits bruts(1)

(1935-39=100)

Primary commodities — Produits bruts	Months — Mois				Annual averages — Moyenne annuelle		
	Mar. 1972 — Mars	Feb. 1972 — Fév.	Mar. 1971 — Mars	Feb. 1971 — Fév.	1971	1970	1969
Asbestos, crude — Amiante brut	429.7	429.7	411.6	411.6	420.6	411.6	399.7
Beans, cocoa — Graines de cacao	559.5	532.4	634.7	605.5	582.7	752.7	1,032.8
Beans, coffee — Grains de café	320.9	313.3	320.9	362.9	317.4	391.7	302.6
Coal — Charbon	210.3	210.3	210.3	210.3	210.3	210.3	210.3
Copper, electrolytic — Cuivre électrolytique ...	490.6	469.7	475.5	475.5	492.5	541.6	483.6
Cotton, raw — Coton brut	322.9	322.0	284.0	281.1	292.1	282.0	276.3
Eggs — Oeufs	123.3	112.6	116.1	116.7	122.1	139.6	161.7
Fruits, fresh — Fruits frais	222.4	208.7	255.4	237.2	230.0	229.6	225.8
Grains — Céréales	184.1	182.5	200.3	201.1	192.3	193.7	200.4
Hides and skins — Cuirs et peaux vertes	238.2	190.0	154.0	156.9	157.6	171.4	185.6
Lead, electrolytic — Plomb électrolytique	324.9	304.0	283.0	283.0	283.0	331.0	318.8
Livestock — Bétail	447.9	440.5	380.0	386.9	386.0	396.2	400.3
Nickel	474.1	474.1	474.1	474.1	474.1	474.8	390.6
Onions — Oignons	151.5	156.5	144.7	161.4	180.8	261.6	221.9
Potatoes — Pommes de terre	187.3	167.5	177.8	182.4	194.2	247.2	170.5
Rubber, raw — Caoutchouc brut	107.9	113.0	118.6	116.7	117.4	140.8	179.3
Scrap iron and steel — Déchets de fer et d'acier	265.0	261.3 ^F	309.3	321.4	284.2	328.9	250.0
Silver — Argent	394.8	387.9	435.4	419.4	405.6	478.1	497.5
Steers — Bouvillons	600.1	596.4	543.6	542.2	548.8	510.8	496.6
Sugar, raw — Sucre brut	283.4	271.7	184.1	186.8	178.7	160.9	144.1
Tin — Étain	343.4	328.4	323.7	317.1	324.2	349.6	338.0
Wool, raw domestic — Laine brute indigène	150.8	151.9	143.7	144.1	141.1	152.4	169.1
Wool, raw, imported — Laine brute importée	164.4	164.4	134.7	134.7	135.0	149.3	163.0
Zinc, prime, western — Zinc de première qualité, de l'Ouest	400.3	378.0	333.6	333.6	357.6	341.0	326.1

(1) All indexes for current year are subject to revision. — Les données de l'année courante sont sujettes à révision.

Rubber and plastic - Caoutchouc et plastique	113.2	112.5	122.5	121.9	123.9	123.7	123.4
Other non-durable - Autres non-durables ..	128.1	127.8	124.2	123.9	125.7	122.0	118.7
Services - Services:							
Total	148.5	148.0	142.4	142.0	144.1	138.7	132.3
Excluding shelter - Total - Sauf logement ..	160.8	160.1	153.1	152.5	155.3	148.9	141.8

(1) For explanation see page 86. - Pour de plus amples explications, voir la page 86.

(2) Includes oranges and orange juice, grapefruit, bananas, grapes, canned pineapple, raisins, tea and coffee. - Oranges et jus d'orange, pamplemousse, bananes, raisins, ananas en conserve, raisins secs, thé et café.

(3) Includes television and radio. - Téléviseur et radio.

TABLE 10. Consumer Price Indexes for Canada - Selected Food Items

TABEAU 10. Indices des prix à la consommation pour le Canada - Denrées alimentaires choisies

	Mar. 1972 — Mars	Feb. 1972 — Fév.	Mar. 1971 — Mars	Feb. 1971 — Fév.	1971	1970	1969
<u>Dairy products - Produits laitiers</u>							
Milk, fresh - Lait frais	149.3	149.4	142.9	143.2	145.1	138.9	137.1
Milk, evaporated - Lait condensé	131.1	130.9	113.6	112.6	119.6	112.5	112.9
Powdered skim milk - Poudre de lait écrémé	153.5	152.8	129.4	125.8	139.9	130.3	128.3
Butter, creamery, first grade - Beurre laitier, 1 ^{re} qualité	108.8	108.7	101.8	101.7	104.0	102.3	103.0
Cheese, plain, processed - Fromage ordinaire fondu	149.2	149.4	128.1	126.3	133.4	130.3	127.9
<u>Poultry and eggs - Volaille et oeufs</u>							
Chicken, grade A evisc. - Poulet, qualité A, évis- céré	125.1	121.7	106.2	103.9	112.0	107.7	111.2
Turkey, grade A evisc. - Dinde, qualité A, éviscérée	101.6	100.3	96.6	97.5	95.8	99.1	101.6
Eggs, fresh, grade A large - Oeufs frais, qualité A gros	77.0	85.0	80.8	85.5	87.3	99.0	109.9
Eggs, fresh, grade A medium - Oeufs frais, qualité A moyens	78.4	86.8	81.1	82.6	86.8	98.6	114.1
<u>Beef - Boeuf</u>							
Sirloin steak - Bifteck de faux filet	149.3	150.4	137.0	136.8	143.4	139.7	139.3
Round steak - Bifteck dans la ronde	160.5	160.0	149.5	148.6	148.0	143.7	135.6
Prime rib roast(1) - Rôti de plat de côtes(1)	149.8	153.1	137.4	132.8	139.9	134.4	133.5
Blade roast(2) - Rôti de haut-côté(2)	148.2	152.6	134.4	129.2	133.1	133.5	131.8
Stewing beef - Boeuf pour ragoût	157.3	157.0	144.6	143.4	145.9	142.1	138.3
Hamburg - Boeuf haché	164.4	164.5	145.6	146.2	148.5	144.8	138.8
Liver, sliced - Foie en tranches	125.3	124.2	118.8	119.4	119.1	132.3	115.3
<u>Pork - Porc</u>							
Rib chops, fresh - Côtelettes fraîches	143.5	145.9	117.6	115.6	122.7	137.2	140.8
Shoulder roast, Boston butt, fresh - Rôti dans l'épaule, soc de Boston, frais	126.4	125.2	102.9	99.6	102.4	120.5	129.9
Sausage, pure pork - Saucisse pur porc	126.4	121.8	120.4	118.6	119.6	127.2	127.4
Bacon, side, fancy, sliced, rind off - Bacon, flanc, de fantaisie, en tranches, sans couenne	90.0	86.2	78.9	78.7	76.4	102.2	101.1(6)
Ham, smoked, boneless(3) - Jambon fumé, désossé(3)	136.7	129.0	113.6	118.6	115.4	135.2	138.4
<u>Other meats - Autres viandes</u>							
Lamb, leg roast - Agneau, gigot	120.0	116.9	111.1	111.3	113.7	114.8	109.1
Veal, loin chops, rib end - Veau, côtelettes, bout de côte	177.7	176.2	165.8	164.4	165.0	162.6	151.5
Wiensers or frankfurters - Saucisses de Francfort ..	124.7	124.7	117.5	117.0	119.0	121.5	120.1
Meat loaf, canned, mainly pork - Pain de viande, en conservation, principalement de porc	122.3	121.7	123.6	123.1	123.0	130.7	125.0
<u>Fish - Poisson</u>							
Cod filets, frozen(5) - Filets de morue, conge- lés(5)	186.9	182.6	148.9	147.6	160.6	143.3	135.4
Salmon, canned, fancy pink - Saumon, en boîte, de fantaisie, rose	147.4	147.3	140.0	139.9	143.0	144.1	129.9
<u>Fats and oils - Huiles et corps gras</u>							
Margarine	112.2	113.3	115.8	117.0	114.8	112.1	105.5
Lard, pure - Saindoux pur	117.7	118.7	110.3	111.8	111.4	118.7	103.6
Shortening	120.9	121.3	116.2	114.7	118.7	114.1	109.4
Salad dressing - Vinaigrette	110.5	108.7	104.2	102.8	105.4	104.7	102.7
<u>Cereals and bakery products - Céréales et produits de la boulangerie</u>							
Flour, white, all purpose - Farine blanche, tout usage	135.8	134.2	131.0	130.2	131.3	133.5	134.3
Corn flakes - Flocons de maïs	122.8	123.1	115.1	112.8	119.6	117.4	116.2(7)
Macaroni - Macaronis secs	127.4	127.2	125.1	124.9	126.0	126.4	119.4
Cake mix, white - Mélange à gâteaux, blanc	123.5	123.9	115.7	115.7	118.5	122.1	123.5

Potatoes, No. 1 table - Pommes de terre n° 1 de table	111.4	110.4	109.0	109.0	114.7	134.0	123.1
Onions, No. 1 cooking - Oignons n° 1 à cuire	121.5	120.8	112.4	114.3	128.5	157.4	136.4
Carrots - Carottes	131.8	118.6	97.6	90.9	123.4	109.1	108.8
Turnips, Canada No. 1 - Navet canadien n° 1	125.4	126.1	117.1	115.8	125.1	171.0	141.8
Cabbage - Chou	190.5	206.0	170.6	168.1	150.4	167.4	145.2
Tomatoes, fresh - Tomates fraîches	147.5	186.8	175.8	159.9	162.2	143.7	140.5
Celery stalks, green - Céleri en branche, vert	210.5	214.5	124.9	130.1	141.6	150.3	146.7
Lettuce, head, fresh - Laitue pommée fraîche	163.2	224.6	153.7	144.6	160.8	139.9	158.1
Green peas, frozen, fancy - Pois verts congelés, de fantaisie	121.0	120.3	117.7	116.3	118.1	116.1	115.0
Green beans, fr. cut, frozen - Haricots verts coupés, congelés	104.9	104.9	101.1	102.1	102.7	102.4	102.2
Tomatoes, canned, choice - Tomates en boîte, de choix	131.5	132.0	126.7	126.1	128.9	131.6	126.7
Peas, canned, choice - Pois en boîte, de choix	124.3	123.0	113.7	116.0	117.0	125.7	126.5
Corn, canned, cream, choice - Maïs en boîte, en crème, de choix	119.8	120.1	120.0	119.8	119.9	124.7	123.3
Infants' food, vegetable - Aliments pour bébés, légumes	131.9	131.4	123.1	121.9	124.8	118.9	120.1
Beans, with pork and tomato sauce - Haricots au porc à la sauce tomate	133.8	134.3	129.0	128.8	131.6	129.3	126.8
Soup, vegetable - Soupe aux légumes	100.4	100.1	98.7	100.0	99.3	99.7	97.9
Tomato juice, fancy - Jus de tomate de fantaisie ...	106.5	105.6	97.4	96.2	100.4	100.3	98.9(8)
Beverages - Breuvages							
Tea bags - Thé, sachets, orange pekoe	103.2	103.3	99.1	98.2	100.3	101.9	102.5
Coffee, medium quality - Café, qualité moyenne	126.7	126.3	133.8	133.2	132.2	132.4	115.5
Coffee, instant, dried - Café instantané, séché	112.7	112.4	112.0	111.3	112.3	112.9	107.2
Miscellaneous Groceries - Denrées diverses							
Tomato catsup - Ketchup aux tomates	124.0	123.6	113.2	111.4	115.9	112.6	111.6
Peanut butter, plain - Beurre d'arachides, ordinaire	133.1	133.6	137.2	137.5	136.9	139.8	125.0
Pickles, sweet, mixed - Cornichons sucrés variés ...	131.9	130.7	124.5	124.7	127.7	125.3	121.4
Jelly powders, flavoured - Gelée en poudre aromatisée	128.3	129.2	121.4	119.1	121.5	118.0	117.1

(1) Includes cuts with bone-in and boned and rolled. - Y compris les morceaux avec os, sans os et roulés.

(2) Includes cuts with blade-in and blade removed. - Y compris les morceaux avec ou sans palette.

(3) Indexes based on chain store prices in 7 cities. - Les indices sont fondés sur les prix dans les magasins à succursales multiples de 7 villes.

(4) Indexes based on prices for pectin and pure jam combined. - Les indices sont basés sur les prix de la confiture avec pectine et de la confiture pure.

(5) Indexes based on prices in 16 cities. - Les indices sont fondés sur les prix dans 16 villes.

(6) 1965=100. - 100 en 1965.

(7) 1963=100. - 100 en 1963.

(8) June 1968=100. - 100 en juin 1968.

TABLE 11. Consumer Price Indexes, Regional Cities, 1962-72(1)

TABLEAU 11. Indices des prix à la consommation, agglomérations urbaines, 1962-72(1)

Note: (i) These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. (ii) For inter-city indexes of retail price differentials refer to Table 13. - Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au Tableau 13.

- (1) To assist comparison with other published series the indexes presented have been arithmetically converted from 1956=100 to 1961=100. The 1956=100 indexes are available on request. - Afin de faciliter la comparaison avec les autres séries publiées, les indices qui figurent ici ont été l'objet d'une conversion arithmétique portant l'indice à 100 en 1961 au lieu de 1956. Les indices calculés sur la base de 100 en 1956 sont fournis sur demande.
- (2) The years referred to are fiscal years. For example 1956 represents the period April 1, 1956 to March 31, 1957. - Les années données ici sont des années financières. Par exemple, l'année 1956 représente la période allant du 1^{er} avril 1956 au 31 mars 1957.
- (3) Major components for the provincial indexes were presented in the November 1970 issue of Prices and Price Indexes. - Les principaux éléments des indices pour les provinces ont paru dans la livraison de novembre 1970 de Prices and Price Indexes.
- (4) Direct comparisons should not be made between this index and the highway index published by the Ont. Dept. of highways. The item content of the indexes is different. - On ne peut comparer directement cet indice avec celui de la voirie publié par le Ministère de la voirie de l'Ontario. Les éléments des deux indices sont différents.
- (5) For further detailed explanation see Prices and Price Indexes - March 1971. - Pour plus de renseignements, voir Prices and Price Indexes. - mars 1971.
- (6) For further detailed explanation see occasional paper 62-526. - Pour plus de renseignements, voir le bulletin hors série N° 62-526 au catalogue.
- (7) For further detailed explanation see occasional paper 62-533. - Pour plus de renseignements, voir le bulletin hors série N° 62-533 au catalogue.

Truck Driver - Conducteur de camion	2
Total	100
Implicit weights of the 1961=100 arithmetically converted indexes, materials 51.9, wages 48.1. - Coefficients implicites de Pondération obtenus par conversion arithmétique à 1961=100, matériaux 51.9, main-d'oeuvre 48.1.	
Implicit weights materials 55.1, wages 44.9. - Coefficients implicites de Pondération, matériaux 55.1, main-d'oeuvre 44.9.	
(5 & 8) National Income and Expenditure Accounts, Catalogue 13-001, quarterly. - (N° 13-001 au catalogue, trimestriel).	
This series contains an engineering component as well as a building component, and is therefore not precisely comparable in coverage with the non-residential composite index. The implicit price indexes are adjusted for changes in contractors profit and productivity. - Cette série comprend une composante génie aussi bien qu'une composante construction: elle n'a donc pas tout à fait la même portée que l'indice synthétique pour la construction non-résidentielle. Les indices synthétiques sont corrigés des variations des profits et de la productivité des entrepreneurs.	
For further detailed explanation see Prices and Price Indexes - May 1970. Pour des explications détaillées voir <u>Prix et indices de prix</u> - Mai 1970.	

Explanation of Methods Used and Additional
Sources for Price Series

Explication des méthodes utilisées et sources
supplémentaires des séries de prix

Industrial Price Indexes

Indices des prix industriels

Industry Selling Price Indexes (1961=100)

Indices des prix de vente dans l'industrie (1961=100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue No. 62-528.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", n° 62-528 au catalogue.

General Wholesale Index (1935-39=100)

Indice général des prix de gros (1935-39=100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue No. 62-501).

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (Vol. 23) (n° 62-501 au catalogue).

Farm Input Price Indexes (1961=100)

Indices de prix des entrées dans l'agriculture (1961=100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961=100 time base.

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961=100.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services Used by Farmers, 1935-39=100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39=100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

A detailed description of concepts, methods and data sources is contained in the occasional paper, Farm Input Price Indexes, 1961=100, Catalogue No. 62-534, and is reproduced in the September 1971 issue of Prices and Price Indexes, Catalogue No. 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Le bulletin hors série Farm Input Price Indexes, 1961=100 (n° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans Prices and Price Indexes de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Current price indexes will be published on a regular basis in the quarterly publication, Farm Input Price Indexes, 1961=100, Catalogue No. 62-004, and in the monthly publication Prices and Price Indexes, Catalogue No. 62-002.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel Farm Input Price Indexes, 1961=100 (n° 62-004) et dans le bulletin annuel Prices and Price Indexes (n° 62-002).

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterpart, and publication has been suspended.

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de le publier.

Canadian Farm Products Price Index (1935-39=100)

Indice des prix des produits agricoles canadiens (1935-39=100)

Wheat prices used in the index are buying prices of the Canadian Wheat Board for Nos. 1, 2 and 3 Manitoba Northern at Thunder Bay. Prices for western oats and barley are also supplied by the Wheat Board and quotations relating to No. 2 C.W., No. 3 C.W. and No. 1 Feed Oats and to Nos. 1 and 2 feed barley are included in the price index. Initial payments are first used in the index calculation and are revised as further payments are announced.

Les prix du blé canadien sur lesquels on se base pour calculer l'indice sont les prix payés par la Commission canadienne du blé pour les numéros 1, 2 et 3 Manitoba-nord à Thunder Bay. Les prix de l'avoine et de l'orge de l'Ouest sont également établis par la Commission du blé et les cotes se rapportant au numéro 2 O.C., au numéro 3 O.C. et à l'avoine fourragère n° 1 ainsi qu'à l'orge fourragère n° 1 et 2 font partie de l'indice des prix. Pour calculer l'indice on se sert d'abord des premiers paiements et on les rectifie à mesure que d'autres paiements sont annoncés.

Final payments for the crop year August 1969 - July 1970 were announced on February 4, 1971 for oats and barley, and on June 17, 1971 for wheat.

Les paiements définitifs pour la campagne agricole allant d'août 1969 à juillet 1970 ont été annoncés le 4 février 1971 en ce qui concerne l'avoine et l'orge, et le 17 juin en ce qui concerne le blé.

- (1) Used in original indexes from August 1969 to July 1970. — Utilisé dans les premiers indices d'août 1969 jusqu'en juillet 1970.
- (2) Incorporated retroactively in revised final indexes August 1969 to July 1970. — Inclus rétroactivement dans les indices finals révisés d'août 1969 à juillet 1970.
- (3) Used in indexes August 1970 to present. — Utilisé dans les indices d'août 1970 jusqu'à présent.
- (4) Not yet announced by Wheat Board. — Pas encore annoncé par la Commission canadienne du blé.

Residential and Non-Residential Building Construction Price Indexes

The fixed-weighted input price indexes of materials and wage rates for residential and non-residential building construction are being published here for the convenience of users (Table 20). A more complete description of the characteristics of the indexes appeared in the May 1970 issue of Prices and Price Indexes, and this explanation is available on request from the Prices Division, as is historical monthly data for the series.

Because the indexes measure the impact of price change on the materials and labour inputs to construction, and not the effects of changes in profit margins or productivity, there is thought to be an upward bias in these indexes as indicators of price change for the output of building construction, or buildings in place. Users are therefore warned to exercise caution in making use of the series, for this purpose. A comparison of these series with the implicit price deflators(1) providing an estimate of price change for the output of the industry, derived from the measurement of gross fixed capital formation in constant dollars, will provide some insight into the effects on the price movement of

(1) National Income and Expenditure Division, Statistics Canada.

Indices des prix de la construction résidentielle et non résidentielle

Les indices à pondération fixe des prix des entrées de matériaux et de salaires dans la construction résidentielle et non résidentielle sont publiés ici pour faciliter la tâche aux utilisateurs (Tableau 20). On trouvera une description plus détaillée des caractéristiques des indices dans Prices and Price Indexes de mai 1970. On peut s'en procurer un exemplaire ainsi que les données mensuelles chronologiques sur cette série en s'adressant à la Division des prix.

Comme les indices mesurent l'influence des variations de prix sur les entrées de matériaux et de main-d'oeuvre du bâtiment plutôt que les répercussions des variations de marges bénéficiaires ou de productivité, on les croit surestimés en tant qu'indicateurs des variations de prix de la construction, ou des bâtiments construits. Les utilisateurs devront donc faire preuve de discernement quant ils se serviront des séries à cette fin. Si l'on compare ces séries avec les facteurs de dégonflement(1) des prix implicites (qui donnent une estimation de la variation du prix pour la production de l'industrie), obtenus en mesurant la formation brute de capital fixe en dollars constants, on aura un aperçu des effets de l'ajustement sur l'évolution des prix des indices à pondération fixe des entrées pour

(1) Division du revenu national et de la défense nationale, Statistique Canada.

adjusting the fixed-weighted input indexes for changes in productivity and profit margins.

During the period from 1926-1966 a special sample of respondents supplied materials prices for the index. As of 1961 this sample has been replaced with prices from the ISPI system(2). The latter are published monthly in Table 2 of this publication.

The Construction wage rate series is based on wage rate material supplied by the Labour Standards Branch, Dept. of Labour, and relates to minimum wages paid on government contracts for construction in a variety of trades and cities.

Users are reminded that the indexes were arithmetically rebased to the year 1961=100 and therefore combining the components with the weights as shown will not provide the composite index provided. Users able to provide their own weights for the components can recombine the components to suit their particular needs.

Price Indexes of Machinery & Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized for such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which include adjustments for exchange, duty and federal sales tax can also be provided on request.

Highway Construction Price Indexes (1961=100) (3)

The Price Indexes of Highway Construction in Canada express prices paid by provincial governments in contracts awarded for highway construction each year, as a percentage of prices paid in 1961. The arithmetic conversion of the indexes to a 1961 time base does not change their percentage movements as compared to the

Industry Selling Price Indexes 1956-1968 Cat. 62-528.

The years refer to fiscal years. Thus 1968 refers to the period April 1, 1968 to March 31, 1969.

tenir compte des variations de productivité et de marges bénéficiaires.

Au cours de la période 1926-1966, un échantillon spécial d'enquêtés a donné les prix pour l'indice. En 1961, on a remplacé cet échantillon par les prix tirés du système I.P.V.I.(2). Ces prix sont publiés par mois dans le Tableau 2 du présent bulletin.

La série consacrée au taux de rémunération dans l'industrie du bâtiment est basée sur les chiffres fournis par la Direction des normes du travail du ministère du Travail; elle a trait au salaire minimum versé aux termes de marchés signés avec le gouvernement pour des travaux de construction dans divers corps de métiers et dans diverses villes.

Nous rappelons aux utilisateurs que les indices ont été recalculés sur la base 1961=100 et qu'ils n'obtiendront pas l'indice synthétique fourni en combinant les éléments et les pondérations donnés. Les utilisateurs qui sont à même de fournir leur propre pondération pour les éléments peuvent procéder à leur propre combinaison adaptée à leurs besoins spécifiques.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente des fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labor Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix des marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de la construction routière (1961=100) (3)

Les indices des prix de la construction routière au Canada représentent les prix payés chaque année par les administrations provinciales au titre des marchés de construction routière, en pourcentages des sommes payées en 1961. La conversion des indices à la base 1961=100 ne modifie pas leur évolution en pourcentages comparativement aux indices publiés

(2) Indices des prix de vente dans l'industrie, 1956-1968, n° 62-528 au catalogue.

(3) Il s'agit d'exercices financiers. 1968 représente donc la période du 1^{er} avril 1968 au 31 mars 1969.

previously published indexes to a 1956=100 time base. Users are warned that an aggregation of the converted major group indexes with the published weights will not yield the published 1961=100 all items indexes. The conversion does not create this problem for a user wishing to reweight the converted major group indexes using weights appropriate to his own purpose.

Base-weighted indexes are published annually and measure, for the period 1956 to 1968, the effect of price change on the cost of specific programmes of highway construction in Canada represented by highway construction contracts of approximately \$50,000 or more awarded by specified provincial governments during the weight-base period. Weights of items in the index, representing the relative importance of units of construction in the year 1956 are held constant. Only the estimates of prices change from year to year, and the indexes thus measure the movement of prices through time. For a more complete statement of the problems of estimating price change for highway construction see pages vi & vii of the December 1967 issue of Prices and Price Indexes, Catalogue 62-002 and pages 9 & 10 of the reference paper Price Indexes of Highway Construction in Catalogue 62-520. The all-items index or its components are useful for planning and budgeting for highway construction programmes, in escalating or up-dating previously costed roadwork, in estimating replacement cost of previously completed roadwork, and as historical measurements of price trends in highway construction.

The indexes do not necessarily reflect the price movements of non-contract construction or maintenance work. The indexes are designed to measure price changes for a fixed programme of highway construction, in each of the seven provinces. Because price levels in the time base-period (1961) varied from province to province the indexes cannot be used to compare price differences between provinces, but only to compare differences in the rate at which prices are changing in the provinces.

Prices contained in the index are not for units of labour and materials as is usually the case in construction price indexes but rather for units of construction work put in place such as an acre of clearing, a cubic yard of earth excavation or a ton of bituminous hot-mix paving. In addition, the index contains prices of some materials, such as culvert pipe, usually supplied to the contractor by the highway departments. Prices of highway construction work are annual weighted averages of bid prices of units of construction in groups of contracts awarded, classified by price-determining characteristics of the contracts and the bid items such as volume of the bid item, type of contract and geographic location. Prices of material items of supply are prices paid by government departments to suppliers.

Price Indexes of Electric Utility Construction

In electric utility terms, the index is designed to provide an estimate of the impact of price change on the cost of materials, labour and equipment used in constructing and equipping electric utilities in a specified base period. The index provides an estimate of how much more, or less it would cost to reproduce the base-period programme of construction in another period, using the same construction technology as in the base period and assuming rates of profit and productivity in construction are the same in both periods.

As the market does not yield comparable selling prices for such unique transactions as, for example, the sale of a transmission line, it was not possible to produce an index of the prices of completed structures. Completed structure indexes would be appropriate for

précédemment et dont la base était 1956=100. Les utilisateurs ne doivent pas s'attendre à ce que le groupement des indices convertis des grands groupes et des pondérations publiées donne l'indice général publié (1961=100). Cette conversion ne pose aucun problème à l'utilisateur qui désire réviser la pondération des indices convertis des grands groupes en utilisant les poids adaptés à ses fins propres.

Les indices pondérés en fonction de la base sont publiés chaque année; ils mesurent, pour la période allant de 1956 à 1968, l'influence de l'évolution des prix sur le coût des programmes spécifiques de construction de routes au Canada représenté par les marchés de construction de routes d'environ \$50,000 ou plus accordés par certaines administrations provinciales au cours de la période visée par la base de pondération. Les poids des éléments des indices qui représentent l'importance relative des unités de construction en 1956 sont constants; Seules les estimations de prix varient d'une année à l'autre; les indices mesurent donc l'évolution des prix dans le temps. Pour plus de détails sur l'estimation de l'évolution des prix pour la construction routière, se reporter aux pages vi et vii du numéro de décembre de Prices and Price Indexes (n° 62-002 au catalogue de Statistique Canada) et aux pages 9 et 10 du bulletin intitulé Price Indexes of Highway Construction in Canada (n° 62-520 au catalogue de Statistique Canada). L'indice général ou ses éléments servent à la planification et à la budgétisation des programmes de construction routière, à indexer ou à mettre à jour les prix de travaux de routes effectués précédemment, à estimer le coût de remplacement des travaux routiers achevés précédemment et à mesurer chronologiquement l'évolution des prix de la construction routière.

Les indices ne reflètent pas nécessairement l'évolution des prix de la construction effectuée hors marché ou des travaux d'entretien; ils servent à mesurer les variations de prix pour un programme déterminé de construction routière dans chacune des sept provinces. Au cours de la période qui a servi de base (1961), les niveaux de prix ont varié d'une province à l'autre; aussi, on ne peut utiliser les indices pour comparer des différences de prix entre les provinces mais on peut seulement les employer pour comparer les différences entre taux de variation des prix dans les provinces.

Les prix compris dans l'indice ne se rapportent pas aux unités de travail ni de matériaux comme c'est habituellement le cas dans l'indice des prix de la construction; ils se rapportent plutôt aux unités de travail de construction effectué, comme le défrichement d'une acre de terrain, l'excavation d'une verge cube ou l'épandage à chaud d'une tonne de béton bitumineux. En outre, l'indice comprend le prix de certains matériaux, par exemple, les tuyaux de ponceau fournis habituellement à l'entrepreneur par les ministères de la Voirie. Les prix des travaux de construction routière sont des moyennes pondérées des prix de soumission pour les unités de construction par groupe de marchés classés selon les caractéristiques des marchés qui déterminent le prix et les éléments d'offre tels que le volume de chaque poste, le type de marché et la situation géographique. Les prix des matériaux fournis sont les prix payés par les ministères aux fournisseurs.

Indices des prix à la construction dans les services d'électricité

En ce qui concerne les services d'électricité, l'indice a pour but de fournir une estimation des conséquences des variations de prix sur le coût des matériaux, de la main-d'œuvre et du matériel utilisés dans la construction et l'équipement des services d'électricité au cours d'une période de référence donnée. L'indice sert à mesurer combien il faudrait payer en plus ou en moins pour réaliser un programme de construction identique à celui de la période de référence en utilisant les mêmes techniques de construction et en supposant que les taux de rentabilité et de productivité de la construction soient les mêmes pour les deux périodes.

Comme il est impossible d'obtenir directement sur le marché des prix de vente comparables pour des opérations de caractère aussi unique, par exemple, que la vente d'une ligne de transport d'énergie, Statistique Canada n'a pu établir un indice du prix des installations en place. Un tel indice ne

users wishing either to estimate reproduction costs or to deflate capital formation. For such uses the indexes introduced in this publication have specific shortcomings. Nonetheless, they may be helpful for such purposes provided the users understand the deficiencies. Thus the reader is asked to make particular note of Section III, of Occasional Paper Catalogue 62-526 Price Indexes of Electrical Utility Construction - The Necessity for Compromise and Section XI, (of the same paper) Uses and Limitations. In addition, because particular construction projects are unique, the aggregate indexes will not likely be appropriate to specific projects since they relate to an average mix of materials, labour and equipment derived from a variety of projects in a specific base period. Thus, if the component price indexes and their weights included in the aggregate index presented herein are inappropriate for a particular purpose the user should consider selecting appropriate component indexes from among those published herein. These indexes could then be combined into an aggregate index by utilizing weights derived from the projects or assets to be costed or deflated.

Prices used in the indexes are for the most part selling prices reported monthly by manufacturers for materials or equipment. The price reported is for units and terms of sale representative of the volume sales of the manufacturer. Where sales to electric utilities form a small share of the total sales of the manufacturer, the price reported may not adequately represent the price to the construction trade and others directly involved in constructing and equipping electric utility facilities. In such cases, prices charged other manufacturers or wholesalers have been included in the index. Federal sales tax changes are reflected in the index but no adjustments have been made for provincial tax changes. Until December 1964 wage rate data were supplied by the Federal Department of Labour and represented minimum hourly rates paid to construction workers in major cities employed on federal government contracts. In 1965 union basic wage rates reported by major utilities and some contractors were incorporated into the index. The sample selected provides an estimate of wage rate change for urban own account and contract electric utility construction. Some further improvements will be made to improve the coverage relating to rural non-union work for transmission lines.

Construction has been defined as new construction or major reconstruction for distribution systems, transmission lines and transformation or switching stations. Maintenance and operating costs are excluded. Cost data were supplied by major utilities, relating to own account and to contract construction erected during the last half of the 1950's. Weights were derived from these data which indicated the relative importance of the major inputs to the construction. The components of cost relating to distribution and transmission facilities encompass such items as poles, hardware, conductors, insulators, meters, distribution transformers and expenditures for labour, e.g. - linemen and groundmen. Costs relating to construction equipment such as trucks, and components of equipment operating costs such as tires, gasoline and repairs were also included. Transformation and switching stations encompass some of the items listed above but the most important elements of cost relate to transformers and switching equipment. Expenditures for land and rights-of-way have been excluded.

The term Canadian electric utility has been defined to include municipal as well as nonmunicipal utilities but the majority of the cost data tabulated was derived from the major nonmunicipal utilities. Manufacturers who produce electricity for their own use and who may also sell electricity have been excluded from the cost survey.

serait utile que si l'on désirait obtenir une estimation des sommes qu'il faudrait engager pour réaliser à nouveau un programme de construction identique ou encore pour dégonfler une formation de capital. Les indices publiés ici présentent en ce sens certaines lacunes. Ils peuvent néanmoins servir à de telles fins pourvu que les utilisateurs en comprennent les limites. Les lecteurs peuvent se reporter aux Sections III et XI de la publication Price Indexes of Electrical Utility Construction (Statistique Canada, 62-526): "The Necessity for Compromise" et "Uses and Limitations". De plus, en raison du caractère unique de chaque projet de construction, l'indice synthétique ne pourra sans doute pas s'appliquer à un projet bien précis car il porte justement sur une moyenne des matériaux, de la main-d'oeuvre et du matériel utilisés dans la réalisation de plusieurs projets au cours d'une période de référence donnée. Ainsi, si les indices détaillés et les poids correspondants qui composent les indices synthétiques présentés ici ne conviennent pas à un usage bien précis, l'utilisateur pourra toujours se servir des autres indices détaillés et construire, à l'aide des coefficients de pondération, les indices de son choix, soit pour évaluer le coût d'un projet, soit pour établir des facteurs de dégonflement.

La plupart des prix des matériaux et du matériel utilisés pour établir les indices sont les prix de vente déclarés mensuellement par les fabricants. Ces prix sont représentatifs des unités de mesure et des conditions de vente valables pour les ventes en grande quantité des fabricants. Lorsque les ventes aux services électriques ne représentent qu'un faible pourcentage du chiffre d'affaires d'un fabricant, il est possible que le prix déclaré ne représente pas de façon satisfaisante le prix consenti aux entreprises en construction et aux autres industries s'occupant directement de construction et d'installation de services d'électricité. Dans ces cas, on a inclus dans l'indice les prix facturés aux autres fabricants ou grossistes. On a tenu compte, dans l'établissement de l'indice, des variations de la taxe de vente fédérale; toutefois, il n'a été fait aucun redressement pour les variations de taxe provinciale. Jusqu'en décembre 1964, les données sur les taux de rémunération étaient fournies par le ministère fédéral du Travail et représentaient le salaire horaire minimum versé aux personnes travaillant au titre d'un marché accordé par le gouvernement fédéral dans certaines grandes villes. En 1965, on fit entrer dans l'indice le salaire de base exigé par les syndicats et déclaré par les principaux services et par certains entrepreneurs. L'échantillon choisi représente donc une estimation des variations du taux de rémunération dans la construction en ville de services électriques pour compte propre ou au titre d'un marché. Certaines améliorations à l'indice sont prévues de façon à l'étendre aux personnes non syndiquées travaillant dans les régions rurales à la construction de lignes de transport d'énergie.

Le terme "construction" a été défini comme étant la construction neuve ou la réparation de réseaux de distribution, de lignes de transport d'énergie, de postes de transformation ou de postes de manœuvre. L'entretien et les frais d'exploitation ne sont pas compris. Les données sur les prix de revient sont fournies par les principaux services d'électricité et portent sur la construction exécutée pour compte propre ou au titre d'un marché au cours de la deuxième moitié des années cinquante. Les poids tirés de ces données représentent l'importance relative des principaux éléments entrant dans la construction. Les composantes du coût de la distribution et du transport comprennent certains éléments comme les poteaux, la quincaillerie, les conducteurs, les isolateurs, les compteurs, les transformateurs de distribution et les dépenses en main-d'oeuvre (monteurs, personnel de service, etc.). Les dépenses entraînées par le matériel de construction (camions et pièces d'équipement) et les frais d'exploitation (pneus, essence et réparations) sont également inclus. Les postes de transformation et les postes de manœuvre comprennent certains des éléments ci-dessus; les frais les plus importants sont cependant entraînés par les transformateurs et les appareils de connexion. Les dépenses foncières et les droits de passage ont été exclus.

Par définition, l'expression "service d'électricité canadien" englobe aussi bien les services municipaux que les autres; toutefois, la majeure partie des données de coût ont été tirées des déclarations des services non municipaux. Les fabricants qui produisent de l'électricité destinée à l'autoconsommation et qui peuvent également vendre de l'électricité ont été exclus de cette enquête.

Price Indexes of Hydro-electric Generating Stations

The following additional points may be of assistance to users of the hydro-electric generating stations index which was described in some detail in Statistics Canada Occasional Paper, Catalogue 62-533.

- (a) Wage rate data are derived from a variety of sources but mainly from the Canadian Construction Association surveys of union agreements and from Federal Pay Research Bureau studies of salaries paid professional, technical and clerical personnel. Basic wage rates, excluding fringe benefits, were used in index calculations.
- (b) Prices for ready-mix concrete and for earth and gravels in place have been utilized as replacements for input prices of labour, materials and equipment rental for concrete production and embankments in place.
- (c) Prices are included for some categories of expense not previously included in input price indexes for construction: interest during construction, overhead expense and the provision and operation of temporary camp accommodation.
- (d) Weighting patterns exclude expenditure for ancillary facilities for logging and navigation, permanent houses, etc.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto, Montreal and Canadian stock exchanges. The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the common and mining stock indexes are Thursday's closing quotations as reported in the *Globe and Mail* and the *Montreal Gazette*. For preferred stocks, prices are monthly weighted averages of the daily closing prices in which weights are daily total sales. The price reference base for the indexes is the year 1956 which has been adopted as an interim base for recently developed Statistics Canada indexes. The indexes express prices as a percentage of prices in 1956 and arithmetically converted to the 1961=100 base.

Revised indexes on the base 1956=100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the index, apart from the shift in the price reference base, is the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) have been replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-Metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) have been continued. The major group Utilities is continued but the Pipelines index has been added as a sub-group and the previous Power and

Indices de prix des centrales hydroélectriques

Les points supplémentaires ci-après peuvent aider les utilisateurs de l'indice des centrales hydroélectriques décrit en détail dans le bulletin hors-série de Statistique Canada portant le numéro 62-533.

- a) Les données sur le taux de rémunération proviennent de diverses sources et surtout des enquêtes sur les accords syndicaux de l'Association canadienne de la construction et des études du Bureau de recherche sur les traitements portant sur la rémunération des travailleurs intellectuels, des techniciens et du personnel administratif. Pour le calcul de l'indice, on a utilisé les taux de rémunération de base, avantages sociaux non compris.
- b) Au lieu du prix des entrées de main-d'oeuvre, de matériaux et de location de matériel pour la production de béton et des remblais effectués, on a utilisé le prix du béton préparé et celui de la terre et du gravier en place.
- c) L'indice comprend les prix correspondant à certains postes de dépenses qui n'étaient pas repris auparavant dans les indices de prix des entrées dans la construction: intérêts pendant la construction, frais généraux, fourniture et entretien de baraquements temporaires.
- d) Les facteurs de pondération ne comprennent pas les dépenses affectées aux installations auxiliaires pour l'exploitation forestière et la navigation, les maisons permanentes, etc.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières donnent une mesure dans le temps de l'effet du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un placeur hypothétique (et non pas un spéculateur). Le portefeuille représente des titres des sociétés canadiennes cotées à la Bourse de Toronto, de Montréal et à la Bourse canadienne. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres ordinaires et des titres miniers sont les cours de fermeture de la Bourse du jeudi indiqués dans le *Globe and Mail* et dans la *Montreal Gazette*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles du total des ventes quotidiennes. La base de pondération entre les sous-groupes est l'année 1956. Toutes les séries ont été recalculées sur la base de 1961=100. Les indices sont pondérés d'après le nombre d'actions en circulation.

Les indices révisés sur la base 1956=100 ont été publiés pour la première fois dans la livraison de juin 1962 de ce bulletin. La plus importante modification à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice: mines industrielles, boissons, textiles et habillement, pâtes et papiers, et huiles (sous la désignation de pétrole). Le grand groupe des services d'utilité publique a été conservé mais l'indice des pipe-lines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et

Traction sub-group has been replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A new major group Finance is composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights, which were previously limited to major groups, have been extended to sub-groups. Weights in the index continue to be based on shares outstanding.

For the list of stocks currently included in the Inventors Index and Preferred Index, see Prices and Price Indexes for February 1972.

traction a été remplacé par deux nouveaux sous-groupes: l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans Prix et indices des prix de février 1972.

Retail Price Indexes

Consumer Price Index for Canada (1961=100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services of items for which there is a continually measurable market price over time, corresponding to a specific quantity of the item.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index is unlikely to represent closely the experience of any one family within the group nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families - (a) living in cities with over 30,000 population, (b) ranging in size from two adults to two adults with four children, and (c) with annual incomes during 1957 ranging from \$2,500 to \$7,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In 1952, the time base was updated to 1949=100 from 1935-39=100 and, at the same time, weights were revised to reflect family expenditure patterns in 1947-48. A subsequent revision of weights based on 1957 expenditures was introduced at the beginning of 1961 and the time base was revised from 1949=100 to 1961=100 at the beginning of 1969.

Full details on the latest weighting patterns and time base revisions are available in the occasional paper "The Consumer Price Index for Canada 1949=100" - Revision based on 1957 Expenditures", Statistics Canada Catalogue No. 62-518 and in the January 1969 issue of the monthly bulletin, Prices and Price Indexes, Catalogue No. 62-002.

Consumer Price Indexes for Regional Cities (1961=100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). The regional indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada except for their individual weighting systems.

Also, city indexes are not as comprehensive in price content as the Canada consumer price index and may underestimate slightly the degree of price movements occurring. In this connection, the shelter component of

Indices des prix de détail

Indice des prix à la consommation au Canada (1961=100)

L'indice des prix à la consommation sert à mesurer le taux de variation du prix qu'il en coûte pour acheter un "panier" de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" demeure le même; il équivaut tout au moins à une quantité égale de biens et services de qualité égale; de plus, il est constitué de produits pour lesquels on peut toujours trouver sur le marché un prix mesurable et correspondant à une quantité déterminée de ce produit.

L'indice porte sur un groupe étendu mais bien déterminé de familles urbaines et rend compte des variations des prix auxquelles l'échantillon en question a dû faire face. Il est fort peu probable que l'indice représente fidèlement l'expérience d'une famille en particulier; de même, il ne faut pas s'attendre à ce qu'il rende compte des variations des prix auxquelles ont fait face des groupes sensiblement différents par le revenu, la taille de la famille et le lieu de résidence. L'échantillon sur lequel porte l'indice est composé de familles - a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille oscille entre deux adultes et deux adultes avec quatre enfants et c) dont le revenu annuel en 1957 oscillait entre \$2,500 et \$7,000. Pour évaluer l'influence des variations de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation porte sur les variations d'environ 300 articles.

L'indice des prix à la consommation au Canada remonte au début du siècle; depuis lors, on a révisé périodiquement la période de référence et les schémas de pondération. Ainsi, en 1952, la période de référence est passée de 1935-1939=100 à 1949=100; à la même occasion, les poids ont été revus de façon à présenter un reflet de la structure des dépenses des familles en 1947-48. La révision suivante des facteurs de pondération était fondée sur les dépenses des consommateurs en 1957 et fut introduite au début de 1961. Enfin, c'est au début de 1969 qu'on porta la période de 1949=100 à 1961=100.

Le lecteur trouvera de plus amples renseignements sur les dernières révisions du schéma de pondération et de la période de référence dans la publication occasionnelle "The Consumer Price Index for Canada (1949=100) - Revision based on 1957 Expenditures" (n° 62-518) et dans la livraison de janvier 1969 du bulletin mensuel "Prices and Price Indexes" (n° 62-002).

Indices des prix à la consommation dans certaines agglomérations urbaines (1961=100)

Ces indices sont publiés mensuellement dans le présent bulletin (voir Tableau 11). Par leur conception et par les éléments qui les composent, ces indices sont en général similaires à l'indice des prix à la consommation au Canada, seuls leurs coefficients de pondération diffèrent.

Aussi, les indices de prix dans les villes ne représentent pas les prix de façon aussi complète que l'indice des prix à la consommation au Canada et ils peuvent sous-estimer légèrement l'importance des mouvements de prix. C'est ainsi que

the city indexes moves on the basis of changes in rents only, whereas changes in both rents and homeownership costs are included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and all-items indexes for cities have tended to underestimate somewhat the rates of price increase, particularly over longer periods. Studies are under way to incorporate homeownership prices in city indexes.

Each index is designed to measure the influence of changes in retail prices taking place in the localities specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in those particular areas.

In using the city indexes, it should be remembered that they are not indicators of comparative levels of prices as between the cities. That is, they do not in any way indicate whether prices are higher or lower in one city than in another.

For comparisons of retail price differentials between cities see Table 13 of this publication and the relevant explanatory note.

Historical Consumer Price Indexes (1969=100) for "Thunder Bay" and "Quebec City" are available, with explanatory notes on request from Retail Prices Section, Prices Division, Statistics Canada.

Measuring the Purchasing Power of Earnings

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change in consumer prices into account, can be calculated by dividing actual earnings averages by the percentage change in consumer price levels, or increasing them if the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages goes from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This statement can be removed by reducing the figure of \$100.00 by the amount of the consumer price increase. The adjusted average is \$90.91 ($100.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

l'élément "logement" des indices des villes varie en fonction des changements dans les loyers uniquement, alors que l'indice pour l'ensemble du Canada comprend les loyers et les coûts de propriété. A la suite d'une augmentation des coûts de propriété plus rapide que celle des loyers, les indices de l'habitation et de tous les éléments pour les villes ont tendu à sous-estimer quelque peu les taux de croissance des prix, surtout sur de plus longues périodes de temps. On étudie actuellement l'incorporation des prix de propriété dans les indices des villes.

Chaque indice est conçu de façon à mesurer les conséquences des variations des prix de détail survenues dans les agglomérations en question sur le prix d'un panier constant de biens et de services représentant la consommation d'un groupe représentatif de familles appartenant à ces secteurs.

Le lecteur devra toujours garder en mémoire que ces indices ne sont pas des indicateurs qui permettent de comparer le niveau des prix d'une ville à l'autre et qu'ils n'indiquent en aucune façon si les prix sont plus ou moins élevés dans une ville que dans une autre.

Pour étudier les différences de prix au détail entre les villes, il faut consulter le Tableau 13 de ce bulletin et les notes explicatives qui l'accompagnent.

Les indices chronologiques des prix à la consommation (1969=100) pour Québec et Thunder Bay et les notes explicatives qui les accompagnent peuvent être obtenus de la Section des prix de détail de la Division des prix de Statistique Canada.

Calcul du pouvoir d'achat

Toute variation des prix à la consommation influe directement sur la quantité de biens et de services qu'on peut acheter avec un dollar et par conséquent sur le revenu moyen. Pour mesurer le revenu en tenant compte de la variation des prix à la consommation, on peut déduire du revenu moyen réel le montant proportionnel qui correspond à l'augmentation des prix à la consommation ou ajouter au revenu réel le montant qui équivaut à la diminution des prix à la consommation. Ces moyennes corrigées peuvent ensuite servir à déterminer la quantité de biens et de services qu'on aurait pu acheter grâce à un revenu moyen, les prix à la consommation et les habitudes de consommation n'ayant pas changé. On trouvera ci-dessous des exemples de cette méthode.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B et que dans la même période de temps l'indice des prix à la consommation progresse de 100.0 à 110.0. En raison de l'augmentation de 10 % des prix à la consommation, on n'obtiendra plus autant avec \$1 au cours de la semaine B que pendant la semaine A. De même il serait exagéré de dire que, pour une augmentation de la rémunération de \$80 à \$100 le pouvoir d'achat du salaire hebdomadaire moyen s'est élevé de 25 %. On peut ramener cette augmentation à des proportions plus justes en déduisant du nouveau salaire hebdomadaire moyen l'augmentation des prix à la consommation. La rémunération moyenne corrigée s'établira donc à \$90.91 ($100.00/110.0 \times 100.0$), dont on peut dire qu'elle exprime la rémunération hebdomadaire moyenne de la semaine B en dollars de la semaine A, ou encore qu'elle rend compte du niveau effectif de la rémunération hebdomadaire de la semaine B par rapport à la semaine A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$80.00 and the week B figure of \$90.91. Taking the week A average of \$80.00 as equal to 100.0, the week B index becomes 113.6 ($90.91/80.00 \times 100.0$). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than those received in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the rise of 25% in money wages ($100.00/80.00 \times 100.0$).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual and real wages uses 1961 as a reference year. However, the adjustment made in the foregoing illustration can be applied to any reference level; percentage change between any two periods will be the same regardless of the reference period selected.

Inter-City Retail Price Comparisons

Statistics relating to differences in retail prices between Canadian cities were initially developed for food, and subsequently extended to cover such other elements of the family budget as clothing, transportation, household operation, health and personal care, recreation and reading, and tobacco and alcohol. In all, intercity price comparisons are drawn for commodities and services comprising nearly three-quarters of the budget on which the Consumer Price Index for Canada is currently based. Major omissions are shelter (both rented and owned), domestic utilities (fuel, light and water), and restaurant meals. While recognizing the importance of shelter differentials in any overall comparison of the general price level being encountered by consumers in different urban centres, the problems inherent in drawing

On peut pousser plus loin les calculs et exprimer à l'aide d'un indice la relation entre le salaire moyen de la semaine A (\$80) et celui de la semaine B (\$90.91). Ainsi, si l'on considère que la rémunération moyenne de \$80 de la semaine A était égale à 100.0, l'indice de la semaine B deviendra 113.6 ($90.91/80.00 \times 100.0$). On pourrait appeler cet indice l'indice de la rémunération hebdomadaire effective; il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6 % de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10 % des prix à la consommation. L'augmentation de 25 % des salaires se ramène donc à une augmentation effective de 13.6 % ($100.0/80.00 \times 100.0$).

Il convient de souligner que, même si les estimations de la rémunération moyenne effective résument assez bien la situation d'un large éventail de travailleurs, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur le revenu porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur le revenu ajustées par l'indice des prix à la consommation (les habitudes de consommation étant "fixes") perdront graduellement de leur valeur. Enfin, il ne faut pas oublier qu'une partie du revenu peut être consacrée à l'épargne et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations du revenu effectif calculées à partir de moyennes du revenu brut peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés et de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente la rémunération tant réelle qu'effective prend pour base l'année 1961. Toutefois, les ajustements illustrés dans les exemples ci-dessus peuvent s'appliquer à tout niveau de référence; la variation proportionnelle entre deux périodes sera en effet identique quelle que soit la période de référence choisie.

Comparaisons entre les prix de détail d'une ville à l'autre

À l'origine, la statistique des différences entre les prix de détail d'une ville du Canada à l'autre a été mise au point pour l'alimentation; par la suite, on l'a étendue à d'autres postes du budget familial tels que l'habillement, les transports, l'entretien du ménage, la santé et les soins personnels, les loisirs et la lecture, et le tabac et l'alcool. Au total, les comparaisons d'une ville à l'autre portent sur des biens et des services constituant près des trois quarts du budget servant actuellement à construire l'indice des prix à la consommation au Canada. Les comparaisons omettent de mentionner principalement le logement (location et frais de possession), les services publics au profit des ménages (combustible, éclairage et eau) et les repas pris au restaurant. Sans vouloir nier l'importance des différences en ce qui concerne le logement dans toute comparaison globale du niveau général

valid comparisons between cities are such as to require a good deal more research. Meanwhile, it is considered that, despite the absence of shelter differentials at this time, publication of retail price comparisons for other elements of the budget will go some distance towards serving the varied needs of users.

Table 13 presents the results of an updating of earlier spatial retail price measurements to May 1969, and broadens the scope of the study to include several more cities. A fuller explanation of the study from which this table is derived is contained in the November 1968 and November 1969 issues of Prices and Price Indexes (Statistics Canada, Catalogue Number 62-002).

The original data base of this study was the wide range of retail price quotations collected in the course of production of the national and urban Consumer Price Indexes. In developing these spatial price comparisons efforts were made to achieve comparability by equating qualities of goods and services and by matching types of retail outlets, as far as possible. Price relationships between pairs of cities were derived and subsequently converted to a common base of Winnipeg prices equalling 100 to facilitate comparisons over the whole range of cities. The updating of these measurements of inter-city retail price differentials was accomplished by application of the relative movement of prices, at the item level in each city, over the intervening periods as derived from the relevant city consumer price indexes. These price relationships at the item level were aggregated on the basis of the Canada urban consumer spending pattern, rather than the patterns applicable to individual cities. While differences in spending patterns exist among cities, the magnitude of these differences in the cities covered is not such as to affect most of the spatial comparisons significantly. Because of the previously mentioned absence of shelter price relationships, which may be of considerable significance in any overall comparison of inter-urban retail price differentials, aggregative indexes beyond major budget groupings are not shown.

It should be noted that the retail prices used in this comparisons, being those faced by consumers, include sales and excise taxes as applicable. Variations between provinces in the scale of sales taxes imposed on a wide range of non-food commodities can be of significance in explaining inter-city price differentials for these items.

While these indexes have been expressed in terms of Winnipeg = 100, the selection of Winnipeg as the base city has no special significance, and the indexes may be expressed on the base of any of the individual cities included.

des prix auxquels les consommateurs doivent faire face dans divers centres urbains, il faut bien dire que les problèmes que comporteraient l'établissement d'une comparaison valable d'une ville à l'autre sont tels qu'ils nécessitent encore pas mal de recherche. Entre-temps, on estime que malgré l'absence actuelle de données sur les différences entre les dépenses de logement, la publication de comparaisons des prix de détail pour d'autres postes du budget permettra de faire de gros progrès en ce qui concerne la satisfaction des besoins variés des utilisateurs.

On trouvera au Tableau 13 le résultat d'une mise à jour de mesures de prix de détail tirées précédemment jusqu'à mai 1969; ce tableau élargit la portée de l'étude en y incorporant plusieurs autres villes. Une explication plus détaillée de l'étude dont le tableau en question est tiré figure dans les livraisons de novembre 1968 et novembre 1969 de Prices and Price Indexes (n° 62-002 au catalogue).

Les premières données de base pour la présente étude ont été constituées par l'importante collection de prix de détail recueillie lors de la confection des indices nationaux et urbains des prix à la consommation. Au moment d'établir ces comparaisons géographiques de prix, on s'est efforcé d'assurer la comparabilité en prenant des biens et des services de qualité égale et en assortissant autant que possible les points de vente au détail par type. Les relations de prix entre paires de villes ont été calculées puis converties à la base commune des prix de Winnipeg = 100 afin de faciliter des comparaisons pour l'ensemble de toutes les villes. La mise à jour de ces mesures des différences de prix de détail entre les villes a été assurée grâce à l'extension des mouvements relatifs de prix au niveau de chaque article dans chaque ville aux périodes observées selon le calcul établi à partir de l'indice des prix à la consommation pour la ville en question. Ces relations entre les prix au niveau de l'article ont été agrégées sur la base des habitudes de consommation du citoyen pour l'ensemble du Canada et non pas selon les habitudes de dépense applicables à des villes individuelles. Même s'il existe des différences dans les habitudes de dépense d'une ville à l'autre, l'importance de ces différences en ce qui concerne les villes dont il est question ici ne sont pas suffisantes pour influencer sensiblement sur la plupart des comparaisons géographiques. Du fait de l'absence des relations de prix en ce qui concerne le logement, dont il a déjà été question ci-dessus et qui pourrait avoir une importance considérable chaque fois que l'on voudrait tirer une comparaison globale entre les différences de prix à la consommation au détail d'une ville à l'autre, on ne trouvera ici aucun indice synthétique agrégé au-delà des principales composantes du budget.

Il faut remarquer que les prix de détail ayant servi à la présente comparaison sont ceux que doit payer le consommateur et comprennent donc les taxes de vente et les taxes d'accises qui peuvent s'appliquer. Les différences d'une province à l'autre entre les barèmes de taxe de vente imposés sur une grande variété de biens non alimentaires peut avoir une grande importance pour expliquer les différences de prix d'une ville à l'autre pour les articles en question.

Le fait que ces indices aient été exprimés en prenant Winnipeg = 100 ne signifie pas que le choix de Winnipeg comme ville de référence ait une signification particulière et les indices pourraient être exprimés sur la base de n'importe laquelle des villes qui y figurent.

CANADIAN INTER-CITY RETAIL PRICE COMPARISONS

A STUDY OF

PLACE-TO-PLACE RELATIONSHIPS BETWEEN SELECTED
URBAN CENTRES

AS OF MAY 1971

Measurements of retail price differentials prevailing between a number of Canadian urban centres previously published to reflect inter-city comparisons as of May 1965, May 1968 and May 1969(1) have been further expanded and updated to May 1971. Following a special survey of non-food prices in the Atlantic Provinces in November 1970, identical coverage is now provided for eleven Canadian cities, one representative of each province, along with Ottawa.

Indexes showing May 1971 differentials in retail prices among the eleven Canadian cities are presented in the following table for commodities and services comprising nearly three-quarters of the budget on which the Consumer Price Index for Canada is currently based, with the major omission being shelter (both rented and owned). As in previous studies, the group and sub-group indexes shown in the table were developed from the matching of paired city price quotations, at the item level, on the basis of similar specifications, including brand names whenever possible, and also having regard for comparability of retail outlets and merchandising practices. The group and sub-group indexes shown in the table for food items were derived from a special survey of food prices carried out in May 1971 which permitted direct comparisons with Winnipeg price levels rather than following the past procedures of linking up paired cities to Winnipeg. Similarly, indexes for new passenger cars are based on direct comparisons of prices collected in May 1971.

In the case of non-food items, with the exception of automobiles, price differentials for May 1971 were obtained by adjusting the inter-city relationships computed in May 1965 for Halifax, Montreal, Ottawa, Toronto, Winnipeg, Edmonton and Vancouver by the movement of prices, at the item level, during the intervening six-year period as measured by the various Consumer Price Indexes applicable to each city. For Charlottetown and Regina, the non-food index measurements were updated from consumer price data collected in these cities in May 1969, which had been compared with Halifax and Winnipeg, respectively.

For St. John's, Nfld. and for Saint John, N.B., however, the differential non-food price indexes were computed on the basis of comparisons of retail prices collected in each of these cities in November 1970 and related to those prevailing in Halifax at that time, with these results subsequently adjusted to May 1971 to facilitate comparisons with other cities. Since in Charlottetown many items in the household operation, clothing and personal care components are not priced regularly, estimation techniques were devised which reflected both national price movements and local differences, including the P.E.I. sales tax increase of March 1971 from 7 % to 8 %.

The inter-city price relationships derived for individual items were aggregated by application of the weighting diagram of the Consumer Price Index for Canada. The validity of this approach in this specific context was tested and confirmed in earlier studies by computation and analysis of alternative aggregations obtained by application of individual city, rather than average urban, weighting patterns.

(1) Prices and Price Indexes (Statistics Canada Catalogue No. 62-002) November 1968 and November 1969.

COMPARAISONS ENTRE LES PRIX DE DÉTAIL DANS DIFFÉRENTES
VILLES DU CANADA

ÉTUDE COMPARATIVE

DES RELATIONS ENTRE DIVERS CENTRES URBAINS CHOISIS

EN MAI 1971

Les mesures de la disparité des prix de détail qu'on observe dans un certain nombre de centres urbains du Canada, déjà publiées afin de donner les comparaisons entre les villes aux mois de mai 1965, mai 1968 et mai 1969(1), ont été élargies et mises à jour au mois de mai 1971. À la suite de l'étude spéciale de novembre 1970 sur les prix des produits non alimentaires dans les provinces de l'Atlantique, onze villes canadiennes, une pour chaque province plus Ottawa font maintenant partie de cette étude.

Les indices montrant les différences des prix de détail dans les onze villes canadiennes en mai 1971 sont donnés dans le tableau suivant sur les biens et services qui constituent près des trois quarts du budget servant actuellement à établir l'indice des prix à la consommation au Canada. La principale omission est le logement (location et frais de possession). Comme par les années passées, les indices des groupes et des sous-groupes figurant au tableau ont été obtenus en assortissant les prix de détail de villes appariées au niveau de l'article c'est-à-dire en s'assurant que les spécifications sont semblables, y compris la marque déposée, et aussi en tenant compte de la comparabilité des points de vente au détail et des méthodes de ventes. Les indices des groupes et sous-groupes indiqués dans le tableau pour les produits alimentaires ont été tirés d'une étude spéciale effectuée en mai 1971 sur les prix de l'alimentation et qui nous a permis d'établir des comparaisons directes avec les niveaux des prix à Winnipeg au lieu de suivre l'ancienne méthode qui consistait à associer des villes appariées à Winnipeg. De façon semblable, les indices des prix des voitures neuves sont basés sur des comparaisons directes des prix recueillis en mai 1971.

Exception faite des automobiles, les différences des prix des articles non alimentaires en mai 1971 ont été obtenues en rectifiant les relations entre les villes calculées en mai 1965 pour Halifax, Montréal, Ottawa, Toronto, Winnipeg, Edmonton et Vancouver d'après le mouvement des prix au niveau des articles durant la période intervalle de six ans, tel que ce mouvement a été mesuré par les divers indices des prix à la consommation pour chaque ville. Les mesures de l'indice non alimentaire pour Charlottetown et Regina ont été mises à jour à partir des données sur les prix à la consommation recueillies dans ces deux villes en mai 1969 et comparées respectivement à Halifax et Winnipeg.

Toutefois, les indices différentiels des prix des produits non alimentaires pour St-Jean (T.-N.) et Saint-Jean (N.-B.) ont été calculés à partir des prix de détail recueillis en novembre 1970 pour chacune de ces villes et comparés à ceux observés à Halifax à la même époque; les résultats ont été subséquemment alignés pour mai 1971 afin de faciliter les comparaisons avec les autres villes. En raison du fait qu'à Charlottetown les prix d'un grand nombre d'articles d'entretien ménager, d'habillement et de soins personnels ne sont pas régulièrement fixés, on a recouru à des techniques d'estimation tenant compte à la fois du mouvement national des prix et des différences locales y compris l'accroissement en mars 1971 de la taxe de vente (passant de 7 à 8 %) dans l'Île-du-Prince-Édouard.

Les relations entre les prix de chaque article d'une ville à l'autre déduites par ce processus ont été regroupées en appliquant le diagramme de pondération de l'indice des prix à la consommation pour le Canada. La valeur de ce processus dans ce contexte particulier a été vérifiée et confirmée au cours d'études antérieures à l'aide du calcul par ordinateur et de l'analyse des autres groupements possibles (par ex. si l'on avait appliqué un mode de pondération pour chaque ville au lieu du mode de pondération de la moyenne des villes).

(1) Prix et indices des prix (Statistique Canada, n° 62-002 catalogue), novembre 1968 et novembre 1969.

It should be noted that the retail prices throughout this study, being those paid by consumers, include sales and excise taxes as applicable. Rates of provincial sales tax in effect at the point in time of the latest comparative indexes were as follows:

	Nfld. — T.-N.	N.S. — N.-É.	N.B. — N.-B.	P.E.I. — Î. P.-É.	Qué.	Ont.	Man.	Sask.	Alta. — Alb.	B.C. — C.-B.
	per cent — pourcentage									
May — 1971 — Mai	7	7	8	8	8	5	5	5	—	5

Variations between provinces in the scale of sales taxes imposed on a wide range of non-food commodities can be of significance in explaining inter-city price differentials for these items. Thus, the absence of a provincial sales tax in Alberta is reflected in relatively low comparative price indexes for certain non-food groupings.

As shown in the accompanying table, among the 11 cities for which comparisons are drawn, Montreal and Toronto, Canada's largest urban centres had the lowest food prices in May 1971. The price level for food was highest in St. John's, Nfld. and Charlottetown where it was 10 % above Montreal and Toronto. In general, component indexes within the food group also displayed significant variability from city to city. The price level for dairy products was highest in St. John's, Nfld. at 20 % above the low in Montreal. Comparatively low prices for bread in Montreal, Halifax, Ottawa, Toronto and Edmonton reduced the cereal and bakery products indexes to a level significantly below that of the other cities. The indexes for miscellaneous groceries had a spread of 11 % with the highest index in Charlottetown and the lowest index in Montreal. By comparison with the foregoing differentials, the indexes for fats and oils evidenced a narrower spread of 8 % between the cities with the highest and the lowest price levels; Charlottetown had the highest index and Montreal, Ottawa and Toronto had the lowest indexes. Big price variations considerably among cities showing a spread of 67 % between St. John's, Nfld. where they were the highest and Winnipeg where they were the lowest. Vancouver ranked highest in respect of retail prices for meat, fish and poultry while Toronto was lowest in this regard. There was an inter-city price range of 16 % for fruits and vegetables, with the highest prices prevailing in St. John's, Nfld. and lowest in Montreal, Toronto, Winnipeg and Vancouver.

For the household operation grouping a 15 % range in retail price differentials encompassed comparatively low prices in the Prairie cities, an intermediate level in Toronto and Ottawa, and comparatively high prices in the remaining cities. Within the household operation group the range of retail price differentials among the eleven cities was approximately 15 % for furniture and appliances, with Toronto prices on average below and Saint John, N.B. 8 % above the level prevailing in Winnipeg. Indexes for floor coverings, tiles, utensils and equipment fell within a comparatively narrow range of 7 %. Prices for household supplies tended to be highest in the cities east of Montreal and in Vancouver, the overall spread being 30 % from the high in St. John's, Nfld. to the low in Toronto. The most marked price differentials in the household operation group occurred in household services comprising telephone, postage, household help and insurance on household effects, where the low indexes prevailing in the Prairie cities were primarily due to lower telephone rates. Levels in the other cities ranged from 30 to 67 % higher than in Winnipeg.

Il est à noter que les prix de détail dans cette étude étant ceux payés par le consommateur à l'achat, les taxes de vente et les taxes d'accise qui peuvent s'appliquer y sont comprises. Les taux des taxes de vente provinciales en vigueur au moment des derniers indices comparatifs étaient les suivants:

Les différences d'une province à l'autre entre les barèmes des taxes de vente imposées pour une grande variété de biens non alimentaires peuvent avoir une grande importance dans l'explication des différences de prix des articles en question d'une ville à l'autre. Ainsi, l'absence de taxe de vente provinciale en Alberta explique les indices comparatifs de prix relativement faibles pour certains groupes non alimentaires.

Comme on peut le voir sur le tableau accompagnant le texte, Montréal et Toronto, les deux plus grands centres urbains du Canada, sont, des onze villes choisies pour les comparaisons, celles qui ont eu les prix alimentaires les plus bas en mai 1971. Le niveau des prix pour l'alimentation était le plus élevé à St-Jean (T.-N.) et Charlottetown, où il dépassait de 10 % celui de Montréal et Toronto. Dans l'ensemble, les indices des articles du groupe alimentaire variaient également beaucoup d'une ville à l'autre. Le niveau des prix pour les produits laitiers était le plus élevé à St-Jean (T.-N.) dépassant de 20 % le niveau (le plus bas) de Montréal. Les prix relativement bas du pain à Montréal, Halifax, Ottawa, Toronto et Edmonton ont abaissé les indices de la boulangerie et des produits céréaliers à un niveau beaucoup plus bas que celui de n'importe quelle autre ville. Les indices des denrées diverses d'épicerie ont enregistré un écart de 11 % entre l'indice le plus élevé à Charlottetown et l'indice le plus bas à Montréal. Comparativement à ces différences, les indices des huiles et matières grasses ont connu un écart plus faible, soit 8 % entre les indices les plus élevés à Charlottetown et les indices les plus bas à Montréal, Ottawa et Toronto. Le prix des oeufs a varié considérablement d'une ville à l'autre, enregistrant un écart de 67 % entre St-Jean (T.-N.) où le prix des oeufs au détail était le plus élevé et Winnipeg où il était le plus bas. Le prix de détail des viandes, du poisson et de la volaille était le plus élevé à Vancouver et le plus bas à Toronto. Pour les fruits et légumes, il y avait un écart de 16 % entre les villes, les prix les plus élevés ayant été observés à St-Jean (T.-N.) et les prix les plus bas à Montréal, Toronto, Winnipeg et Vancouver.

Au poste de l'entretien du ménage, on a noté un écart différentiel de 15 % dans les prix de détail, qui a varié d'un niveau relativement faible dans les villes des provinces des Prairies, à un niveau moyen à Ottawa et Toronto et à des niveaux relativement élevés dans les autres villes. Au sein du groupe des dépenses du ménage, l'écart différentiel des prix de détail parmi les onze villes était d'environ 15 % pour les meubles et appareils, les prix à Toronto étant en moyenne de 6 % inférieurs et ceux de Saint-Jean (N.-B.) étant de 8 % supérieurs à ceux de Winnipeg. Les indices des revêtements de sol, des textiles et des matériaux ont joué dans un écart relativement faible de 7 %. Les prix des fournitures ménagères ont eu tendance à être plus élevés dans les villes à l'est de Montréal et à Vancouver; l'écart d'ensemble était de 18 % allant des prix les plus élevés à St-Jean (T.-N.) jusqu'aux plus faibles à Toronto. Les différences de prix les plus marquées dans le groupe des dépenses du ménage ont été observées dans le sous-groupe des services ménagers (comprenant le téléphone, les frais postaux, l'aide ménagère et les assurances sur articles de ménage) dont les indices étaient faibles dans les villes des provinces des Prairies, principalement en raison des tarifs avantageux du téléphone. Les niveaux de prix dans les autres villes ont varié de 30 à 67 % au-dessus du niveau de Winnipeg.

In the case of clothing a mixed pattern of price differentials was evident at both the group and sub-group levels. In general, prices tended to be lowest in Toronto followed by Ottawa and Edmonton, despite some significant variability among sub-group indexes. In many cities higher indexes for men's wear were partially counterbalanced by lower indexes for women's wear. Winnipeg had the lowest prices in children's wear in contrast to the comparatively high index level in St. John's, Nfld. which was partly attributable to sales tax. The footwear, piece goods, clothing services and jewellery sub-group showed an index spread of 10 % between the low in Halifax and the high in St. John's, Nfld.

Comparative price indexes for the transportation group as a whole reflected a general tendency for prices to be lowest in the west. The transportation group indexes showed a 16 % spread between the high and low cities of Montreal and Edmonton, respectively. Price indexes for new passenger cars varied approximately 11 % from the low in Edmonton, which has no sales tax, to the high in Charlottetown where an 8 % sales tax is applicable. Gasoline prices were generally higher in the east, particularly in the Atlantic Provinces. Index levels for public transportation were highest in Montreal, Toronto and Ottawa.

Comparative retail price indexes for the health and personal care group of items were lowest in Montreal and highest in Vancouver. The health care component showed a spread of 27 % between the low in Montreal and the high in Ottawa. It should be noted that the health care component does not cover doctors' fees and other items affected by the country-wide introduction of medicare. In the case of personal care services major price differentials were discernible among the eleven cities surveyed. The highest index was encountered in Vancouver where the consumer paid 59 % more than in Charlottetown for such items as men's haircuts and women's hairdressing.

The comparative index levels amongst the eleven cities for recreation and reading fell within a narrow range of 9 %. The tobacco and alcohol price level which varies significantly due in part to provincial tax differentials, was highest in St. John's, Nfld. and lowest in Ottawa, Toronto and Edmonton.

Les différences des prix dans l'habillement ont été variables tant au niveau des groupes qu'au niveau des sous-groupes. Dans l'ensemble, les prix étaient les plus bas à Toronto, immédiatement suivi par Ottawa et Edmonton malgré la variabilité importante des indices des sous-groupes. Les indices plus élevés des vêtements pour hommes, dans plusieurs villes, ont été en partie contre-balancés par les indices plus faibles des vêtements pour dames. Les prix des vêtements pour enfants ont été les plus élevés à Winnipeg, ce qui contraste avec le niveau relativement élevé de l'indice à St-Jean (T.-N.) dû en grande partie à la taxe de vente. L'indice du sous-groupe des chaussures, des tissus à la pièce, de l'entretien des vêtements et de la joaillerie accuse un écart de 10 %, entre les prix les plus bas à Halifax et les plus élevés à St-Jean (T.-N.).

Les indices comparatifs des prix de l'ensemble du groupe des transports indiquent une tendance généralisée des prix à être plus bas dans l'ouest du pays. Les indices du groupe des transports accusent un écart de 16 % entre le plus élevé à Montréal et le plus bas à Edmonton. Les indices des prix des voitures neuves ont varié d'environ 11 % entre le minimum observé à Edmonton où il n'y a pas de taxe de vente, et le maximum observé à Charlottetown où une taxe de vente de 8 % est imposée. Les prix de l'essence étaient généralement plus élevés dans l'est, en particulier dans les provinces de l'Atlantique. Les niveaux de l'indice des transports publics étaient plus élevés à Montréal, Toronto et Ottawa.

Les indices comparatifs des prix de détail du groupe des soins personnels et de santé ont été les plus bas à Montréal et les plus élevés à Vancouver. L'article soins de santé a accusé un écart de 27 % entre le minimum de Montréal et le maximum à Ottawa. Il est à noter que l'article soins de santé n'inclut pas les honoraires de médecins ni les éléments touchés par l'instauration à l'échelle nationale du plan d'assurance médicale appelé "medicare". Dans le sous-groupe des services de soins personnels, des différences importantes de prix ont été observées entre les onze villes observées. L'indice le plus élevé a été noté à Vancouver où le consommateur a dû payer environ 59 % plus cher qu'à Charlottetown les mêmes articles ou services tels que la coupe de cheveux pour les hommes et les traitements de salon de coiffure pour les femmes.

Les niveaux de l'indice comparatif pour les loisirs et la lecture ont connu entre les onze villes des écarts plus faibles qui ne dépassaient pas 9 %. Les prix des tabacs et des alcools, qui varient beaucoup en raison des différences de taxation entre les provinces, ont été les plus élevés à St-Jean (T.-N.) et les plus bas à Ottawa, Toronto et Edmonton.

TABLEAU I. Indices comparatifs des prix de détail par ville, mai 1971

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961=100)

The industry selling price index (Total manufacturing) moved 0.2 % higher in April to 126.2 from the March index of 125.9. It was 4.1 % higher than the April 1971 index of 121.2. Of the 101 industry indexes included in the Total, 53 were higher, 20 declined and 28 were unchanged.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes were increases recorded in the wood industries group reflecting higher prices in the sawmills and planing mills, and the sash, door and other millwork industries. Increases were also registered in the metal fabricating group, particularly for the metal stamping, pressing and coating industry. Advances in the leather industries group were mainly attributable to higher prices for the leather tanneries, and shoe factories industries. Moderate declines occurred in the paper and allied industries group, resulting from lower prices registered for the pulp and paper mills industry.

NOTES SUR LES PRIX ET LES INDICES DE PRIX

Indice des prix de vente dans l'industrie: Industries manufacturières (1961=100)

L'indice des prix dans l'industrie (ensemble des industries manufacturières) a augmenté de 0.2 % en avril pour s'établir à 126.2 contre 125.9 en mars. Il était de 4.1 % supérieur à l'indice d'avril 1971 (121.2). Sur les 101 indices des prix industriels qui composent le total, 53 ont augmenté, 20 ont diminué et 28 sont demeurés inchangés.

Pour ce qui est de la contribution relative au changement global de l'ensemble des indices dans les industries manufacturières, les variations les plus remarquables ont été des augmentations dans l'industrie du bois, en raison de la hausse des prix dans les scieries, les ateliers de rabotage ainsi que dans l'industrie des portes, châssis et autres bois ouvrés. Des progressions ont aussi été enregistrées dans l'industrie des produits métalliques, surtout pour ce qui est de l'industrie de l'emboutissage, du matriçage et du revêtement des métaux. Les augmentations dans l'industrie du cuir étaient surtout attribuables à la hausse des prix dans les tanneries et les fabriques de chaussures. De légères diminutions se sont produites dans l'industrie du papier et des activités annexes par suite d'une baisse des prix dans l'industrie des pâtes et papiers.

March to April Changes in Industry Indexes

Variations de mars à avril des indices dans l'industrie

	April/March - Avril/Mars			Major group indexes Indice des groupes principaux

General Wholesale Index (1935-39=100)

The general wholesale index declined 0.3 % in April to 303.4 from the March index of 304.2. It was 5.2 % higher than the April 1971 index of 288.4. Four of the eight major group indexes were lower, while four advanced.

The vegetable products group index moved 1.3 % lower in April to 238.6 from 241.7 on price decreases for unmanufactured tobacco, raw sugar, and tea, coffee and cocoa. A decline of 0.7 % to 361.2 from 363.9 in the animal products group index reflected lower prices for fishery products, livestock, and fresh meats. The chemical products group index moved down 0.7 % to 241.8 from 243.4 on price decreases for paint and paint materials. A decline of 0.2 % occurred in the non-ferrous metal products group index to 264.6 from 265.1.

The textile products group index moved up 0.8 % to 275.5 from 273.3 on higher prices for worsted yarns, cotton fabrics and raw cotton. More moderate advances were recorded in the non-metallic mineral products group index to 231.6 from 231.0, the iron products group index to 322.7 from 322.0 and the wood products group index to 422.0 from 421.6.

The following table shows some of the more noteworthy changes:

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros a régressé de 0.3 %, passant de 304.2 en mars à 303.4 en avril. Il était de 5.2 % supérieur à l'indice d'avril 1971 (288.4). Quatre des indices des huit principaux groupes ont augmenté; quatre ont diminué.

L'indice des produits d'origine végétale est descendu de 1.3 % en avril, passant de 241.7 à 238.6, en raison de la baisse du prix du tabac brut, du sucre brut, du thé, du café et du cacao. Une diminution de 0.7 % (de 363.9 à 361.2) enregistrée dans le groupe des produits d'origine animale est attribuable à une baisse du prix des produits de la pêche, du bétail et de la viande fraîche. L'indice des produits chimiques a fléchi de 0.7 % (de 243.4 à 241.8) par suite de la hausse du prix de la peinture et du matériel de peinture. Une diminution de 0.2 % a été enregistrée dans le groupe des produits métalliques non ferreux où l'indice est passé de 265.1 à 264.6.

L'indice des produits textiles a progressé de 0.8 %, passant de 273.3 à 275.5, en raison de la majoration des prix des filés de laine peignée, des tissus de coton et du coton brut. On a constaté des augmentations moins importantes de l'indice des produits minéraux non métalliques (de 231.0 à 231.6), de l'indice des produits du fer (de 322.0 à 322.7) et de l'indice des produits du bois (421.6 à 422.0).

Le tableau ci-dessous présente les variations les plus importantes:

Commodity group and sub-group Groupe et sous-groupe de produits	Percentage changes - Variations en pourcentage		
	Apr. - 1972 - Avr. Mar. - 1972 - Mars	Apr. - 1971 - Avr. Mar. - 1971 - Mars	Apr. - 1972 - Avr. Apr. - 1971 - Avr.
Vegetable products group - Produits d'origine végétale

	+ 1.6	- 1.9	+ 17.8

Security Price Indexes (1961=100)

The Investors Index of common stock prices rose 0.4 % from 168.1 in March to 168.8 in April. Of the three major groups, industrials declined 0.1 % from 170.8, utilities eased 1.0 % from 157.7 to 156.1 and finance gained 4.6 % to 180.2. Amongst the thirteen industrial sub-groups gains outnumbered losses 9 to 4, the greatest increase being 12.9 % for construction to 98.1 followed by textiles & clothing up 6.1 % to 159.1. Other gains were marginal. The greatest drop was pulp and paper from 100.1 to 95.4. Industrial mines eased 1.9 % to 130.3 and non-metallic minerals dropped 1.0 % to 170.4, whilst petroleum decreased 0.8 % to 259.9. In utilities all-sub-groups registered decreases, telephone showing the greatest loss of 2.0 % to 92.1. Of the two sub-groups comprising Finance, Banks recovered from the previous months decrease, gaining 5.8 % to 213.0, whilst Investment & Loan showed a marginal improvement.

In the same period, the index of mining stock prices declined 0.9 % to 115.0 as a result of a decrease in Base Metals of 1.9 % to 120.5 which offset an increase in Golds of 1.1 % to 106.8.

Of the two supplementary price indexes Uramiums, primary oils and gas showed increase of 5.6 % and 2.1 % respectively.

The Preferred Stock Index eased 1.3 % to 69.9 from 70.8 in March.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, moved down 0.4 % to 290.6 in April from the March index of 291.7. Prices were lower for seven commodities, higher for seven and unchanged for sixteen. Principal changes included decreases for raw sugar, hogs and steers while increases were recorded for beef hides, raw cotton, raw wool, sisal, oats and tin.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets declined 1.4 % to 276.5 in April from the March index of 280.4. A decrease of 1.9 % to 168.6 from 171.9 in the field products index reflected lower prices for potatoes and tobacco on the Eastern market. Higher prices were shown for hay on both Eastern and Western markets, and for rye and flax in the West. The animal products index declined 1.2 % to 384.3 from 388.8 on lower prices for steers on both Eastern and Western markets, for hogs and lambs in the East, and for calves and eggs in the West. Higher prices were shown for eggs and calves on the Eastern market and for lambs, cheesemilk and raw wool in the West.

Indices des cours des valeurs mobilières (1961=100)

L'indice des cours de placement des actions ordinaires a augmenté de 0.4 %, passant de 168.1 en mars à 168.8 en avril. En ce qui concerne les trois groupes importants, l'indice des valeurs industrielles a décliné de 0.1 % (170.8 en mars); celui des services d'utilité publique a enregistré une baisse de 1.0 %, passant de 157.7 à 156.1, et celui des finances a progressé de 4.6 % pour s'établir à 180.2. Dans les treize sous-groupes des valeurs industrielles, les gains ont surpassé les pertes dans une proportion de 9 à 4; les augmentations les plus importantes ont été enregistrées dans l'industrie du bâtiment et des travaux publics (hausse de 12.9 % de l'indice qui s'est établi à 98.1) et dans les industries textiles et l'industrie du vêtement (augmentation de 6.1 % de l'indice qui a atteint 159.1). Les autres gains ont été très faibles. La plus forte diminution a été enregistrée dans l'industrie des pâtes et papiers où l'indice est passé de 100.1 à 95.4). L'indice des mines industrielles est descendu de 1.9 % pour s'établir à 130.3, celui des minéraux non métalliques est tombé de 1.0 % pour atteindre 170.4 et celui du pétrole a diminué de 0.8 % pour se fixer à 259.9. Dans les services d'utilité publique, tous les sous-groupes ont enregistré des baisses, l'indice des téléphones accusant la plus forte perte, soit 2.0 %, pour atteindre 92.1. Dans les deux sous-groupes des finances, les banques ont récupéré le terrain perdu les mois précédents, augmentant de 5.8 % pour s'établir à 213.0; les prêts et les investissements se sont très légèrement améliorés.

Au cours de la même période, l'indice du cours des titres miniers a régressé de 0.9 % pour se chiffrer à 115.0, par suite d'une baisse de 1.9 % des métaux communs (120.5) qui a contrebalancé la hausse de 1.1 % de l'indice de l'or (106.8).

Dans le cas des deux autres indices, l'uranium, ainsi que le pétrole et les gaz primaires ont connu des augmentations de 5.6 % et de 2.1 % respectivement.

L'indice des actions privilégiées a décliné de 1.3 %, passant de 70.8 en mars à 69.9 en avril.

Indice des prix de trente produits industriels (1935-39=100)

L'indice des prix de trente produits industriels, calculé sous forme de moyenne géométrique non pondérée, a diminué de 0.4 % passant de 291.7 en mars à 290.6 en avril. Le prix de sept produits a diminué celui de sept autres a augmenté et celui des seize derniers est resté inchangé. Les principaux changements comprennent une diminution du prix du sucre brut, du porc et des bouvillons; des augmentations ont cependant été enregistrées en ce qui concerne dans le prix des peaux de bœuf, du coton brut, de la laine brute du sisal, de l'avoine et de l'étain.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a décliné de 1.4 %, passant de 280.4 en mars à 276.5 en avril. La diminution de 1.9 % de l'indice des produits de grandes cultures, qui passe ainsi de 171.9 à 168.6, est imputable à la baisse des prix des pommes de terre et du tabac sur les marchés de l'Est. Le prix du foin a augmenté sur les marchés de l'Est et de l'Ouest; le prix du seigle et du lin a augmenté dans l'Ouest. L'indice des produits d'origine animale est tombé de 1.2 %, passant de 388.8 à 384.3, en raison des baisses de prix constatées pour les bouvillons sur les marchés de l'Est et de l'Ouest, pour le porc et l'agneau dans l'Est et pour le veau et les oeufs dans l'Ouest. On a constaté une augmentation du prix des oeufs et du veau sur les marchés de l'Est et du prix de l'agneau, du lait de fromagerie et de la laine brute dans l'Ouest.

Consumer Price Movements

The Consumer Price Index for Canada (1961=100) increased 0.6 % to 138.2 in April from 137.4 in March, a rise close to the average increase recorded between these two months in recent years. In the latest month, all major components recorded increases except Recreation and Reading which remained unchanged. The main contributor to the latest month's advance in the All-Items Index was Food which increased 0.9 %. Other components which rose were Tobacco and Alcohol (1.9 %), Clothing (0.7 %), Housing (0.3 %), Transportation (0.2 %) and Health and Personal Care (0.4 %). Between April 1971 and April 1972, the All-Items Index advanced 4.5 %.

The Food index advanced 0.9 % to 138.3 in April from 137.1 in March, an increase similar to those recorded between these two months in recent years. In the latest month, the level of prices for food consumed at home advanced 0.9 % while restaurant meal prices increased 0.4 %. Meat, eggs and fruit were the main contributors to the latest increase in the price of food for home consumption. The meat, fish and poultry index moved up 0.8 %. Beef prices rose 0.4 % with most cuts contributing to the rise. Chicken prices advanced 1.3 % but pork, on average, increased only marginally. Since April 1971, the meat, fish and poultry index rose over 12 % with poultry and pork prices increasing by 18 % and 17 %, respectively, and beef quotations up by 10 % over the twelve-month period. Though egg prices advanced 11.7 % in the latest month they stood only 4 % above their level of a year previous. Fruit prices, on average, rose 6.7 % between March and April to reach a point over 14 % above that of April 1971. In the latest month, notable increases were recorded for all fresh fruits except grapefruit. Most canned, dried and frozen fruit quotations were, however, marginally lower. The vegetable index was the only major component in the Food index to register a decrease, falling 2.7 % between March and April this year in sharp contrast to the previous five years when increases were recorded between these two months. In the latest month, notable decreases were registered for celery, lettuce and cabbage but potatoes, turnips and tomatoes rose in price. Many canned vegetables recorded small price declines. An increase in the component for bakery and cereal products was mainly attributable to higher cake and biscuit prices, although bread quotations fell marginally. Amongst dairy products, fluid milk prices rose as higher store and home delivery quotations were recorded in Vancouver and Victoria. Butter, processed cheese and ice cream prices, however, fell fractionally. Amongst other food items, sugar prices declined, but were still over 25 % above the level of twelve months earlier. Between March and April decreases were also recorded for jelly powders and peanut butter but honey and jam prices registered notable gains. In the twelve months to April 1972, the Food index advanced 7.1 % with the price of food consumed at home increasing 7.4 % and that for restaurant meals 5.3 %.

The Housing index rose 0.3 % to 141.6 in April from 141.2 in March solely because of a 0.5 % increase in the shelter component which mainly resulted from higher mortgage interest costs and new house prices. No change was recorded in the household operation component. The furniture index declined 0.2 % in the latest month as sale prices on living room suites in Halifax, Montreal and Toronto outweighed scattered increases for bedroom and dinette suites, kitchen sets and mattresses. Among other household operation items, reduced prices were recorded for light bulbs and a number of cleaning supplies because of sales, but there were higher quotations for carpets, cotton sheets,

Mouvements des prix à la consommation

L'indice des prix à la consommation au Canada (1961=100) est passé entre mars et avril de 137.4 à 138.2, soit une augmentation de 0.6 %. Cette augmentation est à peu près semblable à celle observée entre ces deux mois au cours des dernières années. Tous les principaux éléments ont enregistré des augmentations le mois dernier, à l'exception de l'indice des loisirs et de la lecture qui est demeuré stationnaire. Le principal facteur de la hausse de l'indice général a été l'augmentation de 0.9 % de l'indice de l'alimentation. Parmi les autres indices qui ont marqué une hausse, on note le tabac et les alcools (1.9 %), l'habillement (0.7 %), l'habitation (0.3 %), les transports (0.2 %) ainsi que les soins personnels et de santé (0.4 %). Entre avril 1971 et avril 1972, l'indice général s'est accru de 4.5 %.

L'indice de l'alimentation est passé de 137.1 en mars à 138.3 en avril; cette augmentation de 0.9 % est comparable à celles enregistrées entre ces deux mois au cours des dernières années. Le mois dernier, l'indice des aliments consommés à la maison a augmenté de 0.9 %; par contre, le prix des repas pris au restaurant n'a augmenté que de 0.4 %. Une hausse des prix de la viandes, des oeufs et des fruits a été la cause principale de cette dernière augmentation de l'indice des aliments consommés à la maison. L'indice de la viande, du poisson et de la volaille a grimpé de 0.8 %; les prix du boeuf ont augmenté de 0.4 %, la plupart des morceaux ayant enregistré des hausses; ceux du poulet ont progressé de 1.3 %; cependant, les prix du porc en moyenne n'ont que très peu augmenté. Depuis avril 1971, l'indice de la viande, du poisson et de la volaille a augmenté de plus de 12 %, les prix de la volaille et du porc augmentant de 18 % et de 17 % respectivement et ceux du boeuf de 10 % au cours de cette période de douze mois. Bien que le prix des oeufs ait augmenté de 11.7 % au cours du mois dernier, il n'a augmenté que de 4 % par rapport à celui enregistré un an plus tôt. Le prix des fruits s'est accru en moyenne de 6.7 % entre mars et avril pour s'établir à un niveau de 14 % supérieur à celui d'avril 1971. Le mois dernier, des augmentations importantes ont été enregistrées dans l'indice de tous les fruits frais, à l'exception des pamplemousses. Le prix de la plupart des fruits en conserve, secs et congelés a toutefois diminué quelque peu. Parmi les aliments importants, seul l'indice des légumes a marqué une baisse, soit 2.7 % entre mars et avril de cette année; cette diminution est d'autant plus remarquable qu'il y avait eu augmentation de cet élément entre ces deux mois au cours des cinq dernières années. Le prix du céleri, de la laitue et du chou a diminué sensiblement au cours du mois dernier; toutefois, celui des pommes de terre, des navets et des tomates a augmenté. Bon nombre de légumes en conserve ont vu leur prix diminuer quelque peu. L'augmentation du prix des produits de boulangerie et des produits céréaliers est surtout attribuable au prix plus élevé des mélanges à gâteaux et de la pâtisserie, bien que le prix du pain ait diminué quelque peu. Parmi les produits laitiers, le prix du lait frais a augmenté du fait que le lait vendu dans les magasins ou livré à domicile a augmenté à Vancouver et à Victoria. Le prix du beurre, du fromage fondu et de la crème glacée a cependant décliné faiblement. Parmi les autres aliments, les prix du sucre ont diminué quoiqu'ils soient demeurés de 25 % supérieurs à ceux d'un an plus tôt. Entre mars et avril, on a constaté ainsi une baisse du prix des poudres à gelée et du beurre d'arachide; les prix du miel et des confitures ont cependant augmenté de façon appréciable. Au cours des douze derniers mois, l'indice des aliments a progressé de 7.1 %, le prix des aliments consommés à la maison augmentant de 7.4 % et celui des repas pris au restaurant de 5.3 %.

L'indice de l'habitation a augmenté de 0.3 %, soit de 141.2 en mars à 141.6 en avril, en raison de l'augmentation de 0.5 % enregistrée à l'élément logement par suite surtout de la hausse des intérêts hypothécaires et du prix des maisons neuves. Aucun changement n'a été observé à l'élément de l'entretien du ménage. L'indice de l'ameublement a régressé de 0.2 % le mois dernier du fait que les rabais sur les soldes de mobiliers de salle de séjour à Halifax, Montréal et Toronto l'ont emporté sur les hausses éparses des prix des mobiliers de chambre à coucher, de salle à dîner, de cuisine, et des prix des matelas. Quant aux autres articles d'entretien du ménage, on note une réduction du prix des ampoules électriques et des produits de nettoyage en raison des soldes, mais on a enregistré une hausse

glassware and dishes. Between April 1971 and April 1972 the Housing index advanced 4.1 %, with increases of 4.9 % and 2.9 % in the shelter and the household operation components, respectively.

The Clothing index increased 0.7 % to 131.1 in April from 130.2 in March, a rise similar to those recorded between these two months in recent years. All major elements, except clothing services, registered increases in the latest month. Men's wear advanced 1.4 % with higher prices for suits, work socks and pyjamas more than offsetting lower quotations due to sales in some cities for such items as topcoats and trousers. The women's wear component rose 0.4 % mainly as a result of increased prices for dresses, nightgowns and sweaters; however, underwear prices were lower because of sales in Toronto. Children's wear and piece goods each advanced 0.8 %; the former as a result of higher prices for boys' slacks, girls' cotton dresses, and infants' diapers and overalls, the latter because of increased cotton and rayon dress material prices. In the twelve months since April 1971 the Clothing index rose 2.5 %.

The Transportation index rose 0.2 % to 133.0 in April from 132.8 in March. The main factor in this rise was a 0.7 % advance in gasoline prices following an increase in the Provincial tax levy in Ontario. In addition, car license fees were raised in Saskatchewan. The inter-city travel component rose 0.3 % in response to a seasonal rise in the train fares index. In April 1972 the Transportation index stood 2.8 % above its level of twelve months previous.

The Health and Personal Care index rose 0.4 % to 148.0 in April from 147.4 in March. The dentists' fees index advanced 2.0 %, reflecting increased fees for all services surveyed. On the other hand, personal care supplies' prices declined 0.4 %, with reductions due to sales for toothpaste, razor blades and cleansing tissues partially offset by higher toilet soap and shaving cream prices. Between April 1971 and April 1972 the Health and Personal Care index increased 4.7 %.

In April 1972, the Recreation and Reading index was unchanged from its March 1972 level of 138.3 and stood 2.2 % above its level of April 1971.

The Tobacco and Alcohol index advanced 1.9 % to 132.1 in April from 129.6 in March as both the tobacco and the alcoholic beverages elements registered increases mainly attributable to the higher tax levies in Ontario. In April 1972, the Tobacco and Alcohol index stood 3.5 % above its level of April 1971.

Consumer price index items, when classified by commodities and services, offer another view of the incidence of the change in prices. While the services index rose 0.3 % between March and April, the total commodities index advanced 0.7 % reflecting price increases of 0.9 % for food and 0.7 % for non-durables excluding food. Higher prices for alcoholic beverages, tobacco, clothing and gasoline were the main cause of the advance in the index for non-durables excluding food. Durables, on the other hand, declined 0.1 % reflecting lower quotations for some furniture. The rise in the services index was chiefly attributable to higher dental fees and mortgage interest costs, and a seasonal increase in the train fares index.

du prix des tapis, des draps de coton, de la verrerie et de la vaisselle. Entre avril 1971 et avril 1972, l'indice de l'habitation a progressé de 4.1 % en raison de l'augmentation de 4.9 % et de 2.9 % des éléments logement et entretien du ménage respectivement.

L'indice de l'habillement a augmenté de 0.7 % pour atteindre 131.1 en avril contre 130.2 en mars, accroissement analogue à ceux enregistrés entre ces deux mois ces dernières années. Tous les principaux éléments, sauf les services d'entretien des vêtements, ont enregistré une hausse le mois dernier. L'indice des vêtements pour hommes a marqué une augmentation de 1.4 % du fait que la hausse du prix des complets, des chaussettes de travail et des pyjamas a plus que compensé la baisse de prix d'articles tels que les paletots et les pantalons dûe à des soldes dans certaines villes. L'élément vêtements pour dames a augmenté de 0.4 %, principalement suite à une hausse du prix des robes, des chemises de nuit et des chandails; toutefois, le prix des sous-vêtements est demeuré inférieur en raison des soldes à Toronto. Les indices des vêtements pour enfants et des tissus à la verge ont progressé chacun de 0.8 %, le premier par suite d'une hausse de prix des pantalons pour garçons, des robes de coton pour fillettes, des couches et des salopettes pour bébés, et le deuxième en raison d'une augmentation du prix des tissus de coton et rayonne pour robes. Au cours des douze mois suivant avril 1971, l'indice de l'habillement s'est accru de 2.5 %.

L'indice des transports est passé de 132.8 en mars à 133.0 en avril, soit une augmentation de 0.2 %. Le principal facteur d'augmentation a été la hausse de 0.7 % du prix de l'essence, suite à l'accroissement du taux de la taxe provinciale en Ontario. En outre, les frais d'immatriculation des voitures ont été majorés en Saskatchewan. L'élément transport interurbain a progressé de 0.3 % par suite de l'augmentation saisonnière du prix des billets de chemin de fer. En avril 1972, l'indice des transports s'établissait à 2.8 % au-dessus de ce qu'il était un an plus tôt.

L'indice des soins personnels et de santé a marqué une augmentation de 0.4 % et est passé de 147.4 en mars à 148.0 en avril. L'indice des honoraires de dentistes est monté de 2.0 %, suite à un accroissement des frais de tous les services enquêtés. Par ailleurs, le prix des articles de soins personnels a diminué de 0.4 %, suite à des réductions de prix sur des soldes de pâte dentifrice, de lames de rasoir et de papier essuie-tout, réductions en partie compensées par une hausse du prix du savon de toilette et de la crème à raser. Entre avril 1971 et avril 1972, l'indice des soins personnels et de santé a augmenté de 4.7 %.

En avril 1972, l'indice de la lecture et des loisirs est demeuré stationnaire par rapport à mars 1972, soit à 138.3, ce qui fait 2.2 % au-dessus de ce qu'il était en avril 1971.

L'indice du tabac et des alcools a augmenté de 1.9 %, passant de 129.6 en mars à 132.1 en avril, du fait que les prix du tabac et des boissons alcooliques ont augmenté en raison principalement d'une hausse des taxes en Ontario. En avril 1972, l'indice des tabacs et des alcools était 3.5 % supérieur à ce qu'il était en avril 1971.

Si l'on classe les articles qui entrent dans l'indice des prix à la consommation par biens et services, on obtient une image différente du mouvement des prix à la consommation. Alors que l'indice des services progressait de 0.3 % entre mars et avril, l'indice de tous les biens marquait une augmentation de 0.7 %, suite à une hausse de 0.9 % du prix des aliments et de 0.7 % du prix des biens non durables (excluant l'alimentation). La hausse du prix des boissons alcooliques, du tabac, de l'habillement et de l'essence a été la principale cause de l'augmentation de l'indice des biens non durables, exclusion faite de l'alimentation. Les biens durables, pour leur part, ont diminué de 0.1 % en raison d'une réduction du prix de certains articles d'ameublement. L'augmentation de l'indice des services est attribuable principalement à une hausse des honoraires de dentistes et des intérêts hypothécaires, ainsi qu'à l'accroissement saisonnier du prix des billets de chemin de fer.

TABLE 1. Summary of Current Price Indexes
TABLEAU 1. Récapitulation des indices des prix courants

	Indexes — Indices				Percentage changes — Variation proportionnelle		
	April 1972 — Avril	March 1972 — Mars	April 1971 — Avril	March 1971 — Mars	Apr. — Avr. 1972 Mar. — Mars	Apr. — Avr. 1971 Mar. — Mars	1972 Apr. — Avr. 1971
Industrial price indexes — Indices des prix dans l'industrie							
Industry selling price index: manufacturing — 1961=100(1) — Indices des prix de vente dans l'industrie: industries manufacturières:							
General wholesale index — (1935-39=100)(2) — L'indice général de gros	126.2	125.9	121.2	120.3	+ 0.2	+ 0.7	+ 4.1
Vegetable products — Substances végétales	303.4	304.2	288.4	286.9	— 0.3	+ 0.5	+ 5.2
Animal products — Produits animaux	238.6	241.7	239.9	240.3	— 1.3	— 0.2	— 0.5
Textile products — Produits textiles	361.2	363.9	320.1	321.3	— 0.7	— 0.4	+ 12.8
Wood products — Produits du bois	275.5	273.3	259.9	259.8	+ 0.8	—	+ 6.0
Iron products — Produits du fer	422.0	421.6	386.2	381.3	+ 0.1	+ 1.3	+ 9.3
Non-ferrous metals — Métaux non ferreux	322.7	322.0	314.5	313.9	+ 0.2	+ 0.2	+ 2.6
Non-metallic minerals — Minéraux non métalliques	264.6	265.1	264.8	258.8	— 0.2	+ 2.3	— 0.1
Chemical products — Produits chimiques	231.6	231.0	225.3	223.7	+ 0.3	+ 0.7	+ 2.8
	241.8	243.4	238.9	233.1	— 0.7	+ 2.5	+ 1.2
Canadian farm products — (1935-39=100)(3) — Produits agricoles canadiens							
Eastern — Total — De l'est	276.5	280.4	265.8	266.1	— 1.4	— 0.1	(3)
Western — Total — De l'ouest	307.2	314.8	288.6	288.8	— 2.4	— 0.1	+ 6.4
Field — Cultures	245.7	245.9	243.0	243.5	— 0.1	— 0.2	(3)
Animal — Animaux	168.6	171.9	185.4	186.6	— 1.9	— 0.6	(3)
	384.3	388.8	346.2	345.7	— 1.2	+ 0.1	+ 11.0
Selected price indexes — (2) — Certains indices de prix							
Thirty industrial materials — (1935-39=100) — Trente matériaux industriels	290.6	291.7	267.6	266.8	— 0.4	+ 0.3	+ 8.6
Residential building materials — (1961=100) — Matériaux de construction résidentielle	155.2	154.1	141.9	140.8	+ 0.7	+ 0.8	+ 9.4
Non-residential building materials — (1961=100) — Matériaux de construction non résidentielle	140.3	139.6	132.8	132.0	+ 0.5	+ 0.6	+ 5.6
Consumer price indexes — (1961=100) — Indices des prix à la consommation							
All-items — Tous les éléments	138.2	137.4	132.2	131.3	+ 0.6	+ 0.7	+ 4.5
Food — Alimentation	138.3	137.1	129.1	128.2	+ 0.9	+ 0.7	+ 7.1
Housing — Habitation	141.6	141.2	136.0	134.8	+ 0.3	(0.9	+ 4.1
Clothing — Habillement	131.1	130.2	127.9	126.8	+ 0.7	+ 0.9	+ 2.5
Transportation — Transports	133.0	132.8	129.4	128.8	+ 0.2	+ 0.5	+ 2.8
Health and personal care — Soins personnels et de santé	148.0	147.4	141.4	141.0	+ 0.4	+ 0.3	+ 4.7
Recreation and reading — Loisirs et lectures	138.3	138.3	135.3	135.0	—	+ 0.2	* 2.2
Tobacco and alcohol — Tabacs et alcools	132.1	129.6	127.6	127.6	+ 1.9	—	+ 3.5
Security price indexes — (1961=100) — Indices des cours des valeurs mobilières							
Investors index — Total — Indices des portefeuilles	168.8	168.1	153.1	149.5	+ 0.4	+ 2.4	+ 10.3
Industrials — Total — Industriels	170.7	170.8	157.1	154.0	— 0.1	+ 2.0	+ 8.7
Industrial mines — Mines industrielles	130.3	132.8	156.9	157.1	— 1.9	— 0.1	— 17.0
Foods — Aliments	133.7	132.1	140.1	140.3	+ 1.2	— 0.1	— 4.6
Beverages — Boissons gazeuses	223.1	222.1	189.7	187.3	+ 0.5	+ 1.3	+ 17.6
Textiles and clothing — Textiles et vêtements	159.1	149.9	106.1	102.4	+ 6.1	+ 3.6	+ 50.0
Pulp and paper — Pâte et papier	95.4	100.1	99.8	100.8	— 4.7	— 1.0	— 4.4
Printing and publishing — Impression et édition	304.8	300.9	254.7	247.4	+ 1.3	+ 3.0	+ 19.7
Primary metals — Métaux primaires	106.1	103.6	101.5	101.7	+ 2.4	— 0.2	+ 4.5
Metal fabricating — Fabrications des métaux	180.8	175.0	160.7	153.4	+ 3.3	+ 4.8	+ 12.5
Non-metallic minerals — Minéraux non métalliques	170.4	172.2	144.8	138.4	— 1.0	+ 4.6	+ 17.7
Petroleum — Pétrole	259.9	261.9	198.3	187.1	— 0.8	+ 6.0	+ 31.1
Chemicals — Produits chimiques	106.8	106.2	91.6	86.0	+ 0.6	+ 6.5	+ 16.6
Construction — Construction	98.1	86.9	62.0	59.3	+ 12.9	+ 4.6	+ 58.2
Retail trade — Commerce de détail	159.2	156.8	122.0	120.5	+ 1.5	+ 1.2	+ 30.5
Utilities — Total — Services publics	156.1	157.7	152.5	148.4	— 1.0	+ 2.8	+ 2.4
Pipeline — Pipe-line	191.9	193.1	169.1	163.9	— 0.6	+ 3.2	+ 13.5
Telephone — Téléphone	293.8	295.1	264.9	261.5	— 0.4	+ 1.3	+ 10.9
Electric power — Énergie électrique	92.1	94.0	99.9	98.4	— 2.0	+ 1.5	— 7.8
Gas distribution — Distribution du gaz	123.7	125.0	122.2	115.3	— 1.0	+ 6.0	+ 1.2
Finance — Total — Finances	199.7	202.0	226.2	219.8	— 1.1	+ 2.9	— 11.7
Banks — Banques	180.2	172.3	137.3	132.5	+ 4.6	+ 3.6	+ 31.2
Investment and loan — Placements et prêts	213.0	201.4	157.0	152.7	+ 5.8	+ 2.8	+ 35.7
	128.8	127.6	108.5	102.3	+ 0.9	+ 6.1	+ 18.7
Mineral stocks — Actions minier							
General index — Indice général	115.0	116.1	120.4	115.2	— 0.9	+ 4.5	— 4.5
Gold — Or	106.8	105.6	113.7	111.3	+ 1.1	+ 2.2	— 6.1
Base metals — Métaux communs	120.5	122.8	125.1	118.4	— 1.9	+ 5.7	— 3.7
Supplementary indexes — Indices supplémentaires							
Uranium — L'uranium	177.0	167.6	187.1	173.6	+ 5.6	+ 7.8	— 5.4
Primary oils and gas — Pétrole et gaz primaires	465.1	455.5	438.9	427.3	+ 2.1	+ 2.7	+ 6.0

Gross weighted, including inter-industry shipments. For explanation see page 85. — Indice pondéré brut comprenant les livraisons inter-industrielles.
Four toute explication, voir page 85.

Indexes for 1972 are subject to revision. — Les indices pour 1972 sont sujets à révision.
Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1970 are subject to revision. See notes page 79 for details of Western grain prices. — La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1970 sont sujets à révision. Voir les renvois de la page 79 pour les prix détaillés des grains de l'Ouest.

	1972	124.5	125.2	125.9	126.2									

(1) Indexes for 1972 are subject to revision. - Les indices pour 1972 sont sujets à révision.

An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in same condition as purchased), necessitated by developments in the industry's production pattern since 1961 have resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix industriels:

	Old Series Ancienne série	New series Nouvelle série
December - 1970 - Décembre	95.1	92.3
January - 1971 - Janvier	95.1	92.1
Average - 1971 - Moyenne	95.2	91.8
